Defense Manpower Data Center Survey & Program Evaluation Division 1600 Wilson Boulevard, Suite 400, Arlington, VA 22209-2593

Acknowledgments

DMDC would like to extend our appreciation to the thousands of military members and their spouses who took the time to participate in the 1999 Survey of Active Duty Personnel and the 1999 Survey of Spouses of Active Duty Personnel and to inform us of their attitudes and opinions.

DMDC is indebted to numerous people for their assistance in the preparation of this report. Direction and currency to the analyses were provided by Colonel Jeff Perry at the Office of the Deputy Assistant Secretary of Defense for Military Personnel Policy (ODASD [MPP]) and Lt. Colonel Joyce Adkins at the Office of the Deputy Assistant Secretary of Defense for Military Community and Family Policy (ODASD [MCFP]). Dr. Timothy Elig, Eric Wetzel, Kristin Williams, and Elizabeth Willis at the Defense Manpower Data Center (DMDC) provided technical review of report.

Data preparation, data analysis, and report preparation were performed at Westat under contract M67004-98-002. Dr. Richard Valliant and Mr. Ismael Flores-Cervantes were responsible for survey weighting. Ms. Katie Hubbell and Dr. Carlos Aricira conducted the data analysis. Dr. Kimya Lee, Dr. Carol Keys, Mr. D. Wayne Hintze, and Dr. Jennifer O'Brien all contributed substantially to the report. They were supported in their efforts by Dawn Williams and Bradford Johnson. Ms. Anne B. Rodgers served as report editor.

Cynthia Helba, Project Director, Westat Laverne C. Wright, Project Officer, DMDC

OVERVIEW OF THE 1999 SURVEY OF ACTIVE DUTY PERSONNEL

Executive Summary

The 1999 Active Duty Surveys (ADS) continues a line of research begun in 1969 with a series of small-scale surveys administered approximately every two years. These surveys were expanded in 1978 to provide senior Department of Defense (DoD) officials with information about both members and spouses (Doering, Grissmer, Hawes, and Hutzler, 1981). DoD also conducted large-scale surveys of active-duty members and spouses in 1985 (Hunt et al., 1986) and 1992 (Westat, 1993, 1994a, 1994b). The 1999 Active Duty Surveys of members and spouses were sponsored by the Office of the Assistant Secretary of Defense for Force Management Policy (OASD [FMP]). The Office of the Deputy Assistant Secretary of Defense for Military Community and Family Policy (ODASD [MCFP]) and the Office of the Deputy Assistant Secretary of Defense for Military Personnel Policy (ODASD [MPP]) provided policy oversight for the surveys.

This report provides an overview of results obtained from the survey of active-duty members. Chapter 1 provides background information on the history of the survey and describes the remainder of the report. Chapter 2, Survey Methodology, provides background on survey administration, analytic procedures used in the report, and the presentation of results. Each subsequent chapter focuses on a different survey topic with findings presented for DoD and for subgroups defined by: Service, paygrade, gender, race/ethnicity, family type, and spouse employment status. Chapter 3, Satisfaction with Military Life, focuses on member satisfaction with military life in general and with various specific components of military life. Chapter 4, Retention, discusses members' stated intent to remain in the military, their significant others' support for continued military service, and actions taken by members to leave the military. Chapter 5, Financial Position of Members, examines items such as household income, personal debt and savings, financial support received from government programs and any financial problems reported by members. Chapter 6, Personnel Tempo, discusses the time commitments required of members, including time away from home in the preceding and upcoming 12 months (including reasons for being away from home), and workload. Finally, Chapter 7, Quality of Life *Programs*, focuses on members' use of quality of life, education, and childcare programs and examines member attitudes about health care for themselves and their family members.

The population of interest for the *1999 Survey of Active Duty Personnel* consisted of all Army, Navy, Marine Corps, Air Force, and Coast Guard active-duty members, below the rank of admiral or general, with at least 6 months of active-duty service when surveys were first mailed. Reservists on active-duty assignments for at least 6 months were also eligible.

The sample consisted of 66,040 members. Eligible respondents returned 33,189 usable surveys by the end of data collection. This resulted in a weighted response rate (corrected for nonproportional sampling) of 51%. Data were weighted to reflect the population of interest, which allowed the 1999 ADS to provide estimates for the military as a whole and for each of the military Services.

An understanding of each Service's unique structure and demographie and earcer characteristics must be considered when comparing survey responses between Services. For example, a younger less married force responds quite differently than seasoned service members raising a family while responding to the professional demands of today's military. Throughout the report, results that may be affected by the differing demographic profiles of the Services are pointed out.

Chapter 3: Satisfaction with Military Life

Chapter 3 describes members' overall satisfaction with the military life and with 37 eomponents of military life. Overall, more members indicated they were *very satisfied/satisfied* (49.5%) with the military way of life than said they were *dissatisfied/very dissatisfied* (28.2%) with the military way of life. The analyses found no association of Service, gender, and race/ethnicity with differences in overall satisfaction with the military way of life. There were, however, differences in the proportion of members indicating that they were *very satisfied/satisfied* related to paygrade and family type. Among officers, proportionately more members of paygrade group O4-O6 (72.4%) indicated they were *very satisfied/satisfied* with military life than did members of paygrade group E7-E9 (68.1%) said they were *very satisfied/satisfied* with military life than did the other enlisted paygrade groups. Proportionately fewer unmarried members without children (40.8%) said they were *very satisfied/satisfied* with military life than did members in all other family types.

When asked about 37 different components of military life, those components for which the highest percentages of members reported that they were *very satisfied/satisfied* were job security (71.6%), dental care for the service member (61.8%), and schools for the members' children (54.5% of members with children). Overall, the components for which the lowest percentages of members reported that they were *very satisfied/satisfied* were cost of living adjustments (COLA) to retirement pay (12.8%) and retirement pay (18.1%). Notable findings were that proportionately more members indicated that they were *very satisfied/satisfied* with medical care for themselves (52.1%) than with medical care for their families (39.5%) and with dental care for themselves (61.8%) compared to dental care for their families (35.6%).

The analyses revealed Service differences in the proportion of members indicating they were *very satisfied/satisfied* with several of the 37 components. Notable among these were that proportionately more Marine Corps and Coast Guard members than members of other Services indicated that they were *very satisfied/satisfied* with unit morale (Marine Corps, 37.1%, and Coast Guard, 36.4%, compared with Army, 28.4%, Air Force, 31.3%, and Navy, 30%) and pace of promotions (Marine Corps, 39%, and Coast Guard, 43.0%, compared with Army, 35.2%, Air Force, 27.7%, and Navy, 31.4%), while proportionately more Air Force (39.0%) and Coast Guard members (37.4%) than those of other Services indicated that they were *very satisfied/satisfied* with the availability of personal/family time (compared with Army, 28.4%, Navy, 31.1%, and Marine Corps, 29.1%). In addition, proportionately more Air Force members (45.8%) said they were *very satisfied/satisfied* with military family support programs than did members in the other Services (compared with Army, 37.5%, Navy, 36.9%, Marine Corps, 37.8%, and Coast Guard, 24.9%).

Paygrade comparisons in the proportion of members indicating that they were *very satisfied/satisfied* showed, as might be expected, that for many of the components, especially financial components, proportionately more officers indicated that they were *very satisfied/satisfied* than did enlisted members. These components included basic pay, special and incentive pay, and housing allowances.

Gender differences in the proportion of members reporting that they were *very satisfied/satisfied* were found for many of the 37 components of military life. Proportionately more female members than male members indicated that they were *very satisfied/satisfied* for 14 of the 37 components of military life. Notable among these gender-related differences were differences in satisfaction with family medical care (52.5% vs. 37.7%); family dental care (46.6% vs. 34.2%), co-location with military spouse (59.7% vs. 47.3%); and SEPRATS/COMRATS, subsistence allowance (35.6% vs. 25.9%). Conversely, proportionately more males than females indicated satisfaction on three of the components: quality of leadership (38.3% vs. 34.9%), unit morale (31.3% vs. 27.5%), and deployments (31.5% vs. 26.6%).

Few racial/ethnic differences in the proportions of members reporting they were *very satisfied/satisfied* with the 37 different components of military life were found. Proportionately more African American members than members of the other racial/ethnic groups reported that they were *very satisfied/satisfied* with schools for their children (60.1%), spouse employment and career opportunities (37.7%), and youth activities on base (47.6%). Proportionately more White members than members of other racial/ethnic groups reported that they were *very satisfied/satisfied* with the type of assignments they received (53.3%).

There were both similarities and differences among paygrade groups for member satisfaction with frequency of PCS moves, training, and job security in 1992 and 1999. In 1992, a higher percentage of O1-O3 paygrade officers were *very satisfied/satisfied* with the frequency of PCS moves than in 1999, while a higher percentage of E5-E6 and E7-E9 enlisted personnel were satisfied with the frequency of PCS moves in 1999 than in 1992. All paygrade groups in 1999 revealed a higher percentage of members who were *very satisfied/satisfied* with training (except the warrant officer and E5-E6 paygrade groups which had similar percentages of members satisfied with training). However, in both 1992 and in 1999, there were no differences between O1-O3 and O4-O6 paygrade groups for satisfaction with training. All paygrade groups in 1999 revealed a higher percentage of members who were *very satisfied/satisfied* with job security than did their corresponding paygrade groups in 1992.

Comparisons by spouse employment status revealed that proportionately more members with spouses in the Armed Forces than members with spouses employed in civilian jobs or voluntarily out of the work force said they were *very satisfied/satisfied* with family medical benefits, housing allowances, and military family support programs. Proportionately more members with spouses employed in civilian jobs or with spouses voluntarily out of the work force than members with spouses in other employment status groups indicated that they were *very satisfied/satisfied* with the types of assignments they received.

Chapter 4: Retention

This chapter presents findings for members' stated retention intention, perceived support for retention from their spouses (or girlfriends/boyfriends), and actions in exploring the possibility of leaving the military.

A majority of members (51.1%) indicated that they were *very likely/likely* to stay in the military if given the choice. Similarly, nearly half (44.7%) of members perceived that their spouse or girlfriend/boyfriend supported their continued service. Retention intention and spouse or girlfriend/boyfriend support for retention both varied by Service, paygrade group, gender, and family type.

Overall, more Air Force and Coast Guard members than other members indicated they perceived that their spouse (or girlfriend/boyfriend) supported their continued service (48.9% and 47.5%, respectively) and more Air Force members than other members indicated that they were likely to stay in the military (56.6%). Conversely, fewer Marine Corps members than other members said they were likely to stay (42.3%) or perceived that their spouse (or girlfriend/boyfriend) supported their continued service (37.1%).

The lowest proportions of members indicating they would be likely to stay or who believed that their spouse or girlfriend/boyfriend supported their continued service were found in the lowest paygrade groups (paygrade group E1-E3 (28.5% and 23.3%, for propensity to remain in the military and spouse support, respectively) and paygrade group E4 (35.5% and 30.7%, respectively)). For both indicators of retention intention, more males than females responded positively as did more members with children than members without children.

Members were also asked if they had taken any of several steps associated with exploring the possibility of leaving the military. These activities ranged from thinking or talking about leaving and/or civilian career options, to preparing a resume or interviewing for a civilian job. As one might expect, more members had discussed leaving the military and/or civilian opportunities with family and friends (64.0%) than had prepared a resume (21.3%), applied for a job (9.0%), or interviewed for a job (5.9%). These analyses indicate that the proportion of members taking each of the steps in exploring alternative career options decreased as the effort level required for each activity increased.

The analysis indicated that proportionately more males than females took most of these steps. Relative differences by gender were largest for activities requiring greater effort such as preparing a resume (22.2% and 15.8% for males and females, respectively), applying for a job (9.6% and 5.9%, respectively), and interviewing for a job (6.3% and 3.6%, respectively).

Chapter 5: Financial Position of Members

Chapter 5 presents comparisons of the financial positions of military members. Subgroup comparisons were made for the following indicators of financial position: total monthly gross income, total level of personal unsecured debt, total level of savings, reccipt of financial support from five government resources, and experiences with 14 types of financial problems.

Overall, the mean gross monthly household income indicated by all members was \$3,309, their mean personal unsecured debt was \$5,288, and their overall mean savings level was \$11,043. Of the five government financial support programs evaluated (i.e., SSI, WIC, Food Stamp Program, AFDC, and Medicaid), proportionately more members received WIC (9.0%) than reported receiving income from the other programs. Finally, a higher percentage of members (60.6%) indicated that they had not experienced any of the listed financial problems than indicated they had experienced any of the problems.

Service comparisons revealed that Air Force and Coast Guard members indicated a higher mean level of gross monthly household income (\$3,575 and \$3,641, respectively) and a higher mean level of savings (\$14,231 and \$13,317, respectively) than did members from other Services. Marine Corps members indicated a lower mean level of personal, unsecured debt (\$4,111) and a lower mean level of savings (\$7,181) than did members of all other Services. A lower percentage of Army and Marine Corps members (54.2% and 54.3%, respectively) than those of the other Services said they had not experienced any of the 14 financial problems. Service differences in members' financial profiles may, at least in part, be explained by Service differences in paygrade distributions. The disproportionately high number of lower paygrades in the Marine Corps suppresses the mean for monthly gross household income and, in all likelihood, the mean for savings as well.

As would be expected, household income, unsecured personal debt, savings, and financial problems were related to paygrade groups. Paygrades O4-O6 had higher mean monthly gross household incomes (\$6,737) and higher mean level of savings (\$61,077) than other paygrade groups. Paygrade group E1-E3 had a lower mean monthly gross household income (\$1,964), a lower mean level of unsecured personal debt (\$2,159), and along with the E4 paygrade group a lower mean level of savings (\$2,553 and \$2,575, respectively) than all other paygrade groups. Proportionately more members in paygrade group O4-O6 (90.9%) and fewer members in paygrade groups E1-E3 and E4 (45.0% and 46.2%, respectively) said they had not experienced any of the suggested financial problems than did all other paygrade groups.

Females had a higher mean monthly gross household income (\$3,500) than did males (\$3,277) and they had a lower mean level of savings (\$10,149) than did males (\$11,193). More males (61.0%) than females (57.9%) said they had not experienced any of the 14 financial problems.

Comparisons among the racial/ethnic groups revealed that White members had a higher mean monthly gross household income (\$3,466) than did other racial/ethnic groups, a higher mean level of unsecured personal debt (\$5,364) than did all racial/ethnic groups except African Americans (\$5,378), and a higher mean level of savings (\$13,658) than did all other racial/ethnic groups. African American members had a higher mean monthly gross household income (\$3,298) than did all other racial/ethnic groups except Whites, and a higher level of mean unsecured personal debt (\$5,738) than did all other racial/ethnic groups. A higher percentage of White members and members who were classified as All Other Races (Alone) (64.3% and 61.7%, respectively) than members in other racial/ethnic groups said they had not experienced any of the suggested financial problems.

Across family types, unmarried members without children had a lower mean monthly gross household income (\$2,272), a lower mean level of unsecured personal debt (\$2,799), and along with unmarried members with children, lower mean levels of savings (\$6,792 and \$5,761, respectively) than did members of all other family types. Fewer unmarried members with children (49.7%) said they had not experienced any of the suggested financial problems than did members with all other family types.

Comparisons of financial position by spouse employment status, revealed that:

- As would be expected, members with spouses who were unemployed had a lower mean monthly gross household income (\$2,899) and a lower level of savings (\$8,329) than members in all other spouse employment status groups. Members with unemployed spouses were also the least likely spouse employment status group to report having none of the 14 listed financial problems.
- Members with spouses voluntarily out of the work force had a lower level of mean unsecured personal debt (\$5,352) and a higher mean level of savings (\$16,750) than did members in all other spouse employment status groups.
- Members married to Armed Forces spouses had higher mean monthly gross household incomes (\$4,494) than did members with spouses in other employment status groups.
- Members with spouses employed in paying civilian jobs had higher mean levels of personal unsecured debt (\$7,179) than did members with spouses in other employment status groups.

A comparison of member (and spouse) use of financial support programs among paygrade groups in the 1999 and 1992 member surveys revealed that proportionately more E1-E3, E4, and E5-E6 enlisted members in 1999 used WIC than did their counterparts in 1992.

Chapter 6: Personnel Tempo

Chapter 6 presents findings for members' past and expected personnel tempo (i.e., time away from permanent duty station for military duties), reasons for being away from their permanent duty station, workload, and reasons for working more than usual.

In general, a majority of members had spent time away from their permanent duty station over the past 12 months in connection with their military duties (72.8%). Proportionately more Army, Marine Corps, and Coast Guard members (81.1%, 74.6%, and 78.4%, respectively) were assigned to duties that took them away from their permanent duty station than were Navy and Air Force members (64.7% and 68.0%, respectively). When asked about future assignments, Army, Navy, Marine Corps, and Coast Guard members said they expected to be away from their permanent duty stations for about as long as they were away in the past 12 months while Air Force members expected to be away slightly more in the future than in the past.

Comparisons of survey findings for the paygrade groups showed that the proportion of members who spent time away from their permanent duty station increased as paygrade group increased – a finding that was observed for both officers and enlisted members. However, the length of time away was not directly related to the proportion who spent time away from their permanent duty station. For example, junior officers (paygrade group O1-O3) spent a longer period of time away from their permanent station over the past year (2.8 months) than did senior officers (paygrade group O4-O6) (2.2 months) despite the fact that proportionately more members of paygrade group O4-O6 than of paygrade group O1-O3 had been away from their permanent duty station. Members were also asked to estimate the length of time that they expected to be away from their permanent duty station during the upcoming 12 months. In general, this prediction of future personnel tempo mirrored the actual personnel tempo that members experienced over the past 12 months. However, there were two slight deviations. Paygrade group E1-E3 expected to be away from their duty station more in the future while paygrade group O4-O6 expected to be away slightly less in the future.

Gender comparisons for personnel tempo indicated that proportionately more male members were assigned to duties away from their permanent duty station than were female members. Male members also said they spent a longer period of time away (2.6 months) than did female members (1.5 months) in the past 12 months. Males expected personnel tempo for future months to be similar to their past personnel tempo while females expected an increased personnel tempo in the upcoming months.

Comparisons of personnel tempo by racial/ethnic group indicated that proportionately more White members (76.1%) were assigned to duties away from their permanent duty station than were all other racial/ethnic groups. However, there were no differences observed among the racial/ethnic groups in the amount of time spent away from the permanent duty station over the past 12 months or in the expected time away for the upcoming 12 months.

No differences based on family type were found for reports of past personnel tempo. Looking only at future personnel tempo, members married to civilian spouses with children expected their future personnel tempo (2.6 months) to be greater than did members in all other family types with children.

A comparison of the differences between past personnel tempo and expected personnel tempo for each family type revealed that, with one exception, each family type's past personnel tempo was similar to that family type's expected personnel tempo. Unmarried members with no children expected an increased personnel tempo in the future over their past experiences (2.7 months vs. 2.4 months).

Comparisons by spouse employment status revealed that proportionately fewer members with military spouses had been away from their permanent duty station than had members with spouses in other employment status groups. Members with military spouses also spent a shorter period of time away (2.0 months) over the last year and expected that their future personnel tempo (2.2 months) would be lower than did members with spouses in other employment status groups.

Members who had been assigned to duties that took them away from their permanent duty station were also asked to indicate the type of roles and missions they had supported in their assignments. Overall, at least 30% of all members had participated in unit training, joint training/field exercises, military education, and other TADs/TDYs during the past year.

The type of duty performed while away from permanent duty station differed by Service. For example, proportionately more Air Force members participated in peacekeeping operations (25.6%) than did members in other Services. Proportionately more Army and Marine Corps members participated in unit training (47.1% and 47.8%, respectively) than did members of other Services. Proportionately more Army members participated in joint training/field exercises (50.9%) and proportionately more Navy members (31.7%) spent time at sea than did members of other Services.

Comparisons among paygrade groups revealed proportionately more members in paygrade group W1-W5 than other paygrade groups were away from their permanent duty stations to participate in joint training/field exercises (47.8%), and a larger proportion of paygrade group O4-O6 than other paygrade groups were away for TADs/TDYs (83.7%). Proportionately fewer members of the E1-E3 paygrade group than other paygrade groups were away for military education (12.7%) and proportionately fewer members of paygrade group E1-E3 were assigned to peacekeeping operations (13.4%) than were other enlisted personnel.

Analysis of the assigned duties listed by gender also revealed that proportionately more males participated in each type of mission than did females. Only one difference was noted among the racial/ethnic groups. Proportionately more White members had been assigned to other TADs/TDYs (43.9%) and military education (31.9%) than had members in other racial/ethnic groups. Additionally, findings among family type showed that proportionately more members without children were assigned to missions that included joint training/field exercises, unit training, and time at sea than were members with children. For spouse employment status, proportionately fewer members with a military spouse were assigned to joint training/field exercises (32.2%), unit training (26.0%), and time at sea (6.0%) than were members whose spouses had another employment status.

Analysis in this area also explored the workload of members. Service eomparisons indicated that members of the Air Force worked fewer average hours per week (50.2 hours) than did members of the other Services. Officers (hours ranging from 56.5 to 57.0) also stated they had worked more average hours than had enlisted personnel (hours ranging from 53.8 to 55.1). Workload of active-duty personnel also varied by gender, family type and spouse employment status. Males indicated they had worked more average hours (55.3 hours) per week over the past year than did females (51.7 hours). Unmarried members without ehildren worked more average hours (54.7 hours) than did unmarried members with children (53.1 hours); members with military spouses said they worked fewer average hours per week (53.0 hours) than did members with spouses in other employment status groups.

Finally, this ehapter considered the primary reasons given by service members for having to work more hours than usual during the past 12 months. Overall, the highest percentage of members indicated mission preparation/training/maintenance (45.7%), mission critical requirements (44.3%), and high workload (39.0%) as reasons for working more hours than usual.

Most of the differences noted were found between Services, paygrade groups, and genders. Of all of the explanations provided, Army, Navy, and Marine Corps members selected mission preparation/training/maintenance (51.9%, 40.7%, and 54.4%, respectively) more often than they selected any other reason. Air Force and Coast Guard members selected mission critical requirements (45.9% and 48.8%, respectively) more than they selected any other reason.

For both the officers and enlisted members, as the paygrade group increased, the proportion of members who gave the following explanations as primary reasons for working more hours also increased: mission critical requirements, manning not sufficient for workload, and high workload. Among enlisted paygrade groups also, as the paygrade groups increased, so did the percentage of members indicating that additional duty taskings were the primary reason for working more than usual. Among explanations as primary reasons for working more hours than usual, those with the largest differences for males and females were mission preparation (11.7% difference), mission critical requirements (10.7% difference), and unit getting ready for deployment (8.0% difference). Males were more likely than females to cite these three reasons.

Comparisons by race/ethnicity identified several differences. Proportionately fewer African American members selected mission preparation/training/maintenance, being tasked with additional duties, high workload, and others not carrying their workload than did all other racial/ethnic groups.

Comparisons among the spouse employment status groups showed that proportionately fewer members with Armed Forces spouses selected mission preparation/training/maintenance as a primary reason for working more hours than usual than did members with spouses in the other status groups.

When member responses for the number of hours worked per week for each paygrade group from the 1992 survey were compared to responses by the corresponding paygrade group from the 1999 survey, differences were noted for the percentages of members working 40 hours or less, 41-50 hours, 51-60 hours, and 61-80 hours per week. The percentage of members working 40 hours or less per week and 41-50 hours per week was smaller for the 1999 paygrade groups than for the 1992 paygrade groups, while the percentages of members working 51-60 hours per week were generally larger for the 1999 paygrade groups than for the 1992 paygrade groups. The comparison between the 1992 and 1999 paygrade groups for members working 61-80 hours per week revealed that the percentage of members who said they worked 61-80 hours was larger for each 1999 paygrade group than it was for its corresponding 1992 paygrade group.

Chapter 7: Quality of Life Programs

Chapter 7 presents an assessment of members' use of and satisfaction with quality of life programs. Comparisons were made for use of quality of life programs (on base and off base), use of education programs, use of childcare programs (on base and off base), and attitudes about health care. Overall, Service members responded that on base quality of life services, programs, and facilities were generally available (85% or more). The programs were generally more available for members in the DoD Services than for the Coast Guard.

Although there were differences between paygrade groups, genders, and spouse employment statuses in the availability of 13 on base quality of life programs, none of the differences was more than 5%. Among the racial/ethnic groups, no differences were found in the availability of the on base quality of life services, programs, and facilities.

Overall, eomparisons of members' use of on base programs revealed that members indicated a higher average monthly use of fitness centers (9.4 times), main exchanges (7.3 times), and commissaries (6.6 times) than of other quality of life programs and services. There were several other notable differences in the average monthly use of the quality of life programs:

- Among the Services, Coast Guard members used four of the quality of life programs fewer average times per month than did members of other Services, including fitness eenters (7.5 times), main exchanges (5.9 times), library services (1.0 times), and bowling centers (1.0 times). This finding was not unexpected because of the lower reported availability of these facilities by Coast Guard members.
- Among paygrades, the lower enlisted paygrade groups had higher average levels of
 monthly use than did other paygrade groups for six of the quality of life programs,
 including fitness eenters, recreation eenters, bowling centers, clubs, commissaries,
 and main exchanges.
- Males used four of the programs more average times per month than did females (outdoor recreation equipment rental (1.1 times vs. 0.8 times), recreation eenters (2.3 times vs. 1.6 times), golf eourses (1.3 times vs. 0.6 times), and auto shops (1.8 times vs. 1.2 times)).
- White members used library services (2.2 times) and recreation centers (1.8 times) fewer times per month than members in other racial/ethnic groups.

There were no patterns in the differences in average monthly use of quality of life programs observed when family types or spouse employment statuses were eompared.

Overall, members responded that the four off base quality of life services, programs, and facilities evaluated (library services, clubs/dance/nightclubs, commissaries/supermarkets/grocery stores, and main exchanges/departments stores) were generally available. (More than 92% of members indicated these programs and facilities were available.) Members indicated a higher average monthly use of off base department stores (7.0 times per month) and off base supermarkets/grocery stores (5.9 times per month) than for library services or clubs. Gender, race/ethnicity, and spouse employment status were not found to be associated with differences in availability of off base programs. There were very small differences (less than 3%) among some paygrade groups and family types in the reported availability of off base library services.

xii

¹ These 13 services, programs, and facilities were: fitness center/gym; library services; outdoor recreation areas; outdoor recreation equipment rental; recreation centers; golf courses; bowling centers; recreation lodging/hotel or resorts; clubs/dance/nightclubs; commissaries/supermarkets/grocery stores; main exchanges/department stores; social activities for service members; auto, crafts, and hobby shops.

One notable difference among the Services in average monthly use of the four off base programs was the higher average monthly use by Coast Guard members of off base supermarkets and grocery stores (8.2 times per month) than by other Services' members. This finding may be explained, at least in part, by lack of access to on base facilities. When use of off base quality of life programs, facilities, and services was compared across the paygrades, there were several differences. Notable among these was the use of off base clubs. As paygrade groups increased in rank among enlisted and officer paygrade groups, average monthly use of clubs decreased; this was not unexpected given the increased age and proportion of married members in the more senior paygrades. Gender and race/ethnicity were not found to be associated with off base program use. Among family types, except for members with spouses in the Reserve Components, members without children used off base clubs more than members with children. Among spouse employment statuses, members with spouses voluntarily out of the work force used the off base clubs less (2.0 times per month) than members in other spouse employment statuses.

A comparison of members' use of education programs revealed that overall, more members replied that they had not used each of the four education programs than had used the programs. There were several notable differences among paygrade groups, genders, and spouse employment statuses concerning members' use of education programs:

- Among paygrade groups, fewer members in paygrade O4-O6 said they used the four programs than did members in other paygrade groups.
- More females than males said they used continuing education (37.2% vs. 28.3%), tuition assistance programs (35.7% vs. 23.7%), and basic skills education (12.6% vs. 9.8%).
- A smaller proportion of members with spouses who were voluntarily out of the work force than members with spouses in other employment status groups used three of the four programs (adult continuing education (27.3%), technical or vocational programs (4.4%), or basic skills education (7.0%)).
- There were few differences among Services, racial/ethnic groups, or family types for members' use of the four education programs.

A comparison of members' use of eight childcare options (friend or neighbor; sitter, nanny, or au pair; on base preschool; off base preschool; on base child development center; off base childcare center/daycare center; on base family childcare home; and on base school-age care program) revealed that overall, more members used friends or neighbors for childcare arrangements (31.6%) than used other childcare options. More members used off base preschools and on base child development centers (7.8% and 12.1%, respectively) than used on base preschools and off base childcare centers/daycare centers (3.9% and 9.2%, respectively). There were several notable patterns of differences related to gender, family type, and spouse employment status for use of childcare arrangements. More females than males and more members with spouses in the Armed Forces than members with spouses in other employment status groups used sitters, nannies, or au pairs, on base child development centers, on base family

childcare home programs, and on base school-age care programs. Among family types, more members with active-duty spouses with children used on base child development centers, and on base family childcare homes than did other members with children.

The assessment of members' attitudes about military health care for their families revealed several notable findings. Overall, more members indicated they were satisfied with out-of-pocket costs for care (48.1%) than indicated satisfaction with other aspects of military family health care. Among the Services, a larger proportion of Navy members than those of other Services responded that they were satisfied with three aspects of military health care for their families (out-of-pocket cost for care, skill of physicians and other medical providers, and overall quality of care). A larger proportion of females than males were satisfied with each of the seven aspects of military health care for their families. As reported, race/ethnicity, family types (with one exception), and spouse employment status (with two exceptions) were not found to be associated with differences in satisfaction with military family health care.

OVERVIEW OF THE 1999 SURVEY OF ACTIVE DUTY PERSONNEL

Chapter 1: Introduction

The 1999 Active Duty Surveys (ADS) continues a line of research begun in 1969 with a series of small-scale surveys administered approximately every two years. These surveys were expanded in 1978 to provide policymakers with information about the total population directly involved with active-duty military life (Doering et al., 1981). The Department of Defense (DoD) also conducted large-scale active-duty surveys in 1985 (Hunt et al., 1986) and 1992 (Westat, 1993, 1994a, 1994b). The 1999 ADS surveys of members and spouses were sponsored by the Office of the Assistant Secretary of Defense for Force Management Policy (OASD[FMP]). The Office of the Deputy Assistant Secretary of Defense for Military Community and Family Policy (ODASD[MCFP]) in coordination with the Office of the Deputy Assistant Secretary of Defense for Military Personnel Policy (ODASD[MPP]) provided policy oversight for the surveys.

There are two 1999 ADS instruments: the 1999 Survey of Active Duty Personnel (Form A), and the 1999 Survey of Spouses of Active Duty Personnel (Form B). Both Form A and Form B are constructed around a core of questions comparable to those used in previous surveys of DoD members, particularly the 1992 DoD Surveys of Officers and Enlisted Personnel and Their Spouses. The questionnaires focus on the experiences, attitudes, and demographic characteristics of active-duty members and their spouses. Like their predecessors, the 1999 ADS were designed to provide timely, policy-relevant information on the military life cycle (Wright, Williams, and Willis, 2000, in preparation). These surveys also provide information on the impact of military policies on the family, career intent, and factors affecting readiness, among other topics.

This report provides an overview of results obtained from the survey of active-duty members. Chapter 2, Survey Methodology, provides background on survey administration, analytic procedures used in the report, and the presentation of results. Each of the remaining chapters in this report focuses on a different survey topic and presents results by demographic subgroups. Chapter 3, Satisfaction with Military Life, focuses on member satisfaction with military life in general and with various specific components of military life. Chapter 4. Retention, discusses members' stated intent to remain in the military, support by significant others for members' continued military service, and any active steps to leave the military taken by members. Chapter 5, Financial Position of Members, examines items such as household income, personal debt and savings, financial support received from government programs, and any financial problems experienced by members. Chapter 6, Personnel Tempo, discusses the time commitments required of members, including time away from home in the preceding and upcoming 12 months (including reasons for being away from home), and workload. Finally, Chapter 7, Quality of Life Programs, focuses on members' use of quality of life programs and services, education, and childcare programs and examines member attitudes about health care for themselves and their family members.

This overview of members' responses is one of a series of reports planned to present results from the 1999 ADS. An overview of responses from spouses is also in preparation by Helba, Lee, Keys, O'Brien, and Perry. Tabular volumes presenting members' responses to all survey items by Service, paygrade, location, and gender are available (Gaines, Deak, Helba, and Wright, 2000a, 2000b). Spouses' responses to *Form B* will be presented in later volumes (Deak, Rockwell, Gaines, Helba, Williams, and Wright, in preparation-a, in preparation-b). Work has also begun on a topical report covering satisfaction and retention. Additional topical reports are planned on (1) member and family demographics, and (2) quality of life programs.

Chapter 2: Survey Methodology

Survey Design and Administration

Survey Design

Like its predecessors, the 1999 Survey of Active Duty Personnel was designed to provide users with timely, policy-sensitive information on the military life cycle. The survey was constructed around a core of questions from previous surveys of active-duty and Reserve members. The questionnaire includes items on attitudes, experiences, and demographics of military members.

A copy of the 20-page, 112-question (some with multiple items) questionnaire is provided in Appendix A. The survey instrument can be grouped into seven sections:

- Assignment Information includes questions on hours worked, permanent duty station, satisfaction with characteristics of the permanent duty station, permanent change of station moves, and time away from the permanent duty station for military duties:
- Career Information includes questions on career intent, reasons for joining, obligation and retention, satisfaction with occupational specialty, and satisfaction with aspects of military service;
- *Military Life* includes questions on importance of military activities, thoughts of leaving the military, civilian vs. military opportunities, and overall satisfaction;
- *Programs and Services* includes questions on the availability and use of on base and off base services, facilities, and programs;
- Family Information includes questions on marital status, spouse occupation and education, dependents, childcare arrangements, and military health care;
- *Economic Issues* includes questions on non-military income, total monthly income and expenses, savings and debt, service and retirement benefits; and
- *Background* includes information on gender, race/ethnic status, education, duty status, Service, paygrade, and time served.

Sample Design

The population of interest for the *Survey of Active Duty Personnel* consisted of all Army, Navy, Marine Corps, Air Force, and Coast Guard active-duty members, with at least six months of active-duty service at the time of initial mailing, below the rank of admiral or general. Reservists on active-duty assignments for at least 6 months at the time of initial mailing were also eligible.

The initial sample consisted of 66,040 members, of whom 60,834 (92%) were determined to be eligible. A total of 33,189 usable surveys were returned by eligible respondents by the end of data collection. This resulted in a weighted response rate (corrected for nonproportional sampling) of 50.7%. Complete details of the sample design and response rates are reported in Wright, George, Flores-Cervantes, Valliant, and Elig (2000).

Survey Administration

Data were collected by mail with procedures designed to maximize response rates. An introductory letter explaining the survey and soliciting cooperation was sent to members. The introductory letter was followed about 3 weeks later by a package containing the questionnaire and instructions for completing and returning the survey. A second letter was sent to thank individuals who had already returned the questionnaire and to ask those who had not to complete and return it. At approximately 3 weeks, 6 weeks, and 9 weeks after the initial survey mailing, second, third, and fourth questionnaires with letters stressing the importance of the survey were mailed to individuals who had not responded to previous mailings. Wright, Williams and Willis (2000) report details of administration.

Data Weighting

Data were weighted to reflect the population of interest. The 1999 Survey used a three-stage process to produce final weights. The first step calculated base weights to compensate for variable probabilities of selection. The second step adjusted the base weights for nonresponse due to both inability to determine the eligibility status of the sampled member and to the sampled member failing to return a survey. Finally, the nonresponse-adjusted weights were poststratified to force estimates to known population totals as of the midpoint of data collection. Further details are reported by Flores-Cervantes and Valliant (2000).

Analytic Procedures

Estimation Procedures

The 1999 ADS Member Survey used a complex sample design that required weighting to produce population estimates. This weighting meant that standard statistical software packages (e.g., SAS, SPSS, BMDP) were inappropriate for computing standard errors, variances, or tests of statistical significance. For the purpose of this report, measures of central tendency, dispersion, and statistical significance were calculated using WesVarPC, a software application specifically designed to provide valid statistical estimates for complex surveys. WesVarPC uses replication methods for variance estimation.³

² Home addresses were used as primary addresses for the initial and Wave 4 (9 weeks after initial mailing) mailings. Unit addresses were used as primary addresses for Wave 2 (3 weeks after initial mailing) and Wave 3 (6 weeks after initial mailing).

³ Replication is an empirical method of establishing sample variation by drawing repeated subsamples from the obtained sample and comparing results to those obtained for the full sample. This empirical calculation of variance is in line with the theory of sample variation, which draws upon the concept of creating repeated samples to establish confidence intervals. Replication methodology produces variance estimates very close to those produced using Taylor series linearization methodology, the main alternate method of variance estimation.

By definition, surveys based on samples (rather than the entire population, which is usually impractical) are subject to sampling error. The standard error of a survey estimate measures the random variation of estimates around the population parameter (i.e., the value if the entire target population was measured). Estimates in this report are either percentages or means, and are reported with a 95% confidence interval.

The analyses in this report use two different techniques to produce the 95% confidence intervals. Confidence intervals for means use the standard confidence interval protocol. Standard confidence intervals are symmetric; that is, the interval below the estimate is of the same size as the interval above the estimate. The 95% confidence interval is obtained by adding or subtracting the 1.96 standard errors from the reported estimate. Proportions in this report, on the other hand, have Wilson upper/lower limit confidence intervals, which are asymmetric (Wilson, 1927; Newcombe, 1998). The Wilson confidence interval is constructed in such a way that the end points are always between 0% and 100%. This means that, if the lower symmetric confidence interval for a small percentage would normally include a negative number, the lower Wilson confidence interval cannot go below 0. Likewise, if the upper symmetric confidence interval for a large percentage would exceed 100% using the standard measure, the Wilson method limits the upper interval to be less than or equal to 100. For example, assume that a reported estimate of 3% has a standard confidence interval of (-1%, 7%). The Wilson confidence interval might be (.2%, 7.9%). Likewise, a reported estimate of 96% with a standard confidence interval of (96%, 102%) might have a Wilson confidence interval of (88.4%, 99.8%). A comparison of the algebra for standard and Wilson confidence intervals is contained in Appendix B.

Analyses in this report compare pairs of percentage estimates in the 1999 data for statistically significant differences, using 95% confidence intervals. When the confidence interval of the first percentage estimate overlaps the confidence interval of the second percentage estimate, the difference between the two estimates is not assumed to be statistically significant. When the two confidence intervals do not overlap, the difference is deemed statistically significant.

To compare data from the 1992 and 1999 surveys, a t-test on two independent samples is used to test the hypothesis that the differences between the two estimates are 0. Estimates where the difference is deemed to be not 0 or statistically significant are noted in the tables with a dagger symbol (i.e., †). Confidence intervals are provided for each estimate to facilitate comparisons within a survey (e.g., comparing satisfied to unsatisfied responses in 1992) but use of these confidence intervals to identify differences between 1992 and 1999 estimates is inappropriate.

Subgroups

The analyses contained in this report focus on findings for DoD as a whole and for subgroups defined by: Service; paygrade group; gender; race/ethnicity; family type; and spouse employment status. Analyses assigned respondents to categories within subgroups primarily through answers provided on the survey. In the case of missing data on Service, paygrade, gender, or race/ethnicity, data were completed using administrative records.

Subgroups were constructed as follows:

- <u>Service</u> is defined by the response to Q108, "In what Service are you?" Based on responses, members are assigned to one of five categories: Army, Navy, Marine Corps, Air Force, or Coast Guard.
- Paygrade is based on Q109, "What is your current paygrade?" The original 20 categories are collapsed into seven categories for analyses: E1-E3; E4; E5-E6; E7-E9; W1-W5; O1-O3; and O4-O6.
- Gender is obtained from Q101, "Are you: (1) Male (2) Female," and is coded accordingly.
- Race/ethnicity is a combination of two survey questions. One question (Q103) asks respondents to indicate if they are Spanish/Hispanic/Latino. The second question (Q104) asks respondents their race. Responses to these two questions are collapsed into five categories: Hispanic, White, African American, All Other Races (Alone), and Reporting More Than One Race.⁴
- Family type describes the makeup of the member's family. It is derived from three survey questions: Q54, "What is your marital status?"; Q59, "How many children or other legal dependents do you have in each age group?"; and Q55, "Is your spouse currently:", which asks for spouse job status. Responses to these three questions are collapsed into eight categories: Active-duty spouse with children; Active-duty spouse without children; Reserve Component spouse with children; Reserve Component spouse with children; Civilian spouse without children; Unmarried with children; and Unmarried without children. The hierarchy followed in assigning responses is first, "Active-Duty Spouse, followed by "Reserve Component Spouse," "Civilian Spouse," and "Unmarried." A hierarchy is necessary because several persons interviewed answered more than one response category for spouse job status. If, for example, a spouse is in the reserves and also works in a civilian job, the category for family type would be "reserve" because this category takes precedence over "civilian" in the hierarchy.
- Spouse employment status is obtained from Q55. The original 16 categories are collapsed into four categories for analyses: Armed Forces Spouse, Civilian Spouse, Unemployed Spouse, and Voluntarily Out Of The Work Force Spouse. Respondents were permitted to select more than one employment status description to identify their spouses' employment status. Therefore, a series of priority rules were established to collapse multiple responses into one of the four mutually exclusive spouse employment statuses described above. First, responses that identified the spouse as either Active Duty or Reserve (full-time) were recoded to Armed Forces Spouse, regardless of any other employment category that may have been selected for this

6

⁴ These reporting categories are consistent with Revisions to the Standards for the Classification of Federal Data on Race and Ethnicity (1997) adopted by the Office of Management and Budget (OMB) and OMB guidance on aggregation and allocation of data on race (OMB Bulletin No. 00-02, 2000).

question (e.g., in school). Second, responses not assigned to the Armed Forces Spouse category, but that indicate that the spouse holds some type of civilian job, were categorized as Civilian Spouses. Third, those spouses not deemed to be either Armed Forces Spouses or Civilian Spouses were considered either Unemployed Spouses or Voluntarily Out Of The Work Force Spouses (e.g., retired, in school, etc.) depending on the responses marked in Q55.

Analytic Variables

The analyses within each chapter focus on a subset of dependent variables examined in total and by the crossing variables listed in the previous section. Some of these variables were recoded for analytic purposes. The list of dependent variables and their treatment are as follows:

- Satisfaction with Military Life (Chapter 3)
 - Member overall satisfaction with the military way of life (Q51) was initially measured using a scale with five anchors: very satisfied, satisfied, neither satisfied nor dissatisfied, dissatisfied, and very dissatisfied. For the purpose of this report, the five categories were collapsed into three categories: very satisfied/satisfied, neither satisfied nor dissatisfied, and dissatisfied/very dissatisfied. Frequencies were then estimated by the crossing variables.
 - Member satisfaction with components of military way of life (Q39) was assessed by a multiple-part question asking members to indicate how satisfied they were with 37 components of military life. Members responded using a scale with six anchors: very satisfied, satisfied, neither satisfied nor dissatisfied, dissatisfied, very dissatisfied, and does not apply, though the anchor indicating that the question was not applicable was not available for all components. For the purpose of this report, the first five categories were collapsed into three categories: very satisfied/satisfied, neither satisfied nor dissatisfied, and dissatisfied/very dissatisfied. For these analyses, when a respondent indicated that a question was not applicable, their response was set to missing. Frequencies were then estimated by the crossing variables.

• Retention (Chapter 4)

- Member stated retention intention (Q32) was assessed by a single question asking how likely the members were to choose to stay in the military if that were an option. Members could respond on a scale with five anchors: very likely, likely, neither likely nor unlikely, unlikely, and very unlikely. For the purpose of this report, the five categories were collapsed into three categories: very likely/likely, neither likely nor unlikely, and unlikely/very unlikely. Frequencies were then estimated by the crossing variables.

- Spouse or girlfriend/boyfriend support (Q34) was measured by a single question, "Does your spouse, girlfriend, or boyfriend think you should stay on or leave active duty?" Response options included strongly favors staying, somewhat favors staying, no opinion, somewhat favors leaving. and strongly favors leaving. For this report, the five response categories were collapsed into three categories: strongly/somewhat favors staying, no opinion, and strongly/somewhat favors leaving. Frequencies were then estimated by the crossing variables.
- Members' active steps to leaving the military (Q48) was assessed using a single question with several response options. Members were asked, "During the past 6 months, have you done any of the following to explore the possibility of leaving the military?" Response options ranged from thinking about leaving or discussing leaving the military to more active steps such as preparing a resume, applying for a job, or interviewing for a job. Members were instructed to mark all responses that applied to them. Frequencies were then estimated by the crossing variables.

• Finance (Chapter 5)

- Total monthly gross household income (Q88) consists of 11 different income ranges: \$1-1,000; \$1,001-2,000; \$2,001-3,000; \$3,001-4,000; \$4,001-5,000; \$5,001-6,000; \$6,001-7,000; \$7,001-8,000; \$8,001-9,000; \$9,001-10,000; \$10,001 and above. Each range was recoded to the category midpoint (e.g., category 1 recoded to \$500) for each eategory. Responses in the \$10,001 and above category were set to \$10,000. Means were then estimated by each of the crossing variables.
- Total level of personal debt (Q94) consists of 11 different debt ranges for the total unsecured amount owed: \$0, \$1-1,000; \$1,001-2,500; \$2,501-5,000; \$5,001-7,500; \$7,501-10,000; \$10,001-12,500; \$12,501-15,000; \$15,001-17,500; \$17,501-20,000; \$20,001 and above. The variable was recoded to the category midpoint and responses in the \$20,001 and above category were set to \$20,000. Means were then estimated by each of the crossing variables.
- <u>Total level of savings</u> (Q89) consists of 13 different savings ranges: \$0; \$1-1,000; \$1,001-2,500; \$2,501-5,000; \$5,001-7,500; \$7,501-10,000; \$10,001-12,500; \$12,501-15,000; \$15,001-17,500; \$17,501-20,000; \$20,001-50,000; \$50,001-100,000; \$100,001 and above. For the purposes of this report, each response was recoded to the mean of that response category and responses in the \$100,001 and above category were set to \$100,000. Means were then estimated by the crossing variables.
- Members receiving financial support from government programs (Q87 D,G,H,J,K) included the following five government financial support programs: Supplemental Security Income (SSI); Special Supplemental Nutrition Program for Women, Infants, and Children (WIC); Food Stamp Program; Aid to Families with Dependent Children (AFDC); and Medicaid. Frequencies were then estimated by the crossing variables.

- Financial problems experienced by members (Q96) included the following problems possibly experienced by members: bounced two or more checks; received a letter of indebtedness; had your wages garnished; fell behind in paying your rent or mortgage; fell behind in paying your credit card, AAFES, or NEXCOM account; was pressured to pay bills by stores, creditors, or bill collectors; had a bill collector contact your unit leader; pawned or sold valuables to make ends meet; borrowed money from friends or relatives to help you with a financial difficulty; borrowed money through an Emergency Loan Assistance Program or a Service Aid Society; had your utilities shut off; had a car, household appliances, or furniture repossessed; was unable to afford needed medical care; and went bankrupt. Members were also given the opportunity to indicate that they had not experienced any of the listed financial problems. Frequencies were then estimated by the crossing variables.

• Personnel Tempo (Chapter 6)

- Members away over the last 12 months (Q14) was assessed by a single question that asked members whether they had been away overnight over the past 12 months because of their military duties. Frequencies were then estimated by the crossing variables.
- Time away over last 12 months (Q17) was assessed by asking those members who had been away how long their total absence had been over the past 12 months. The six response categories were: Less than 1 month; 1 month to less than 3 months; 3 months to less than 5 months; 5 months to less than 7 months; 7 months to less than 10 months; and 10 months to 12 months. Response categories were recoded to the mean. The value used for the first category (Less than 1 month) was .5 months, and the value used for the last category (10 to 12 months) was 11 months. The responses of those who, on Question 14, indicated they had not been away were set to 0. Means were then estimated by the crossing variables.
- Time expected away in the next 12 months (Q21) was assessed by asking members to predict the length of time they would be away over the next 12 months, if they remained in the military. The seven response categories were: I would not expect to be away from my permanent duty station in the next 12 months; less than 1 month; 1 month to less than 3 months; 3 months to less than 5 months; 5 months to less than 7 months; 7 months to less than 10 months; and 10 months to 12 months. As with the previous variable, response categories are recoded to the mean, with those who do not expect to be away set to zero. Means were then estimated by the crossing variables.
- Reasons for being away (Q16) was assessed by asking members to indicate the types of military roles and missions in which they had participated while they were away and the time they spent in these activities. Members were given ten different categories of missions: peacekeeping or other contingency operations; foreign humanitarian assistance mission; unit training at combat training centers; counter drug operations; domestic disaster or civil emergency; time at

sea for scheduled deployments; other time at sea; joint training/field exercises/alerts; military education; and other TADs/TDYs. For the purposes of this report, responses were recoded to yes and no. Members marking any time spent in an activity were coded yes. Frequencies were then estimated by the crossing variables.

- Workload (Q1) was assessed by asking members how many hours per week they had usually worked over the last 12 months. Members were asked to select from the following six eategories: 40 hours or less; 41-50 hours; 51-60 hours; 61-70 hours; 71-80 hours; and 81 hours or more. For the purposes of this report, categories were recoded to the mean, with the exception of the first category, 40 hours or less, which was set to 40, and the sixth category, 81 hours or more, which was set to 81. Means were then estimated by the crossing variables.
- Reasons for working more than usual (Q3) focused on reasons for working more than usual over the past 12 months. The reasons listed were: not applicable; mission critical requirements; mission preparation/training/maintenance; tasked with additional duties (e.g., special projects); unit was getting ready for deployment; manning was not sufficient for workload (i.e., not enough authorizations/billets); unit was undermanned (i.e., authorizations/billets not filled); part of the unit was deployed; demanding supervisor; problems involving subordinates; high workload; poor planning or lack of planning; others were not carrying their workload; inspections and inspection preparation; equipment failure and repairs; and none of the above. Frequencies were then estimated by the crossing variables.

• Quality of Life Programs (Chapter 7)

- Member use of quality of life programs (Q52) was assessed by a multiple part question requesting members to indicate their use of 13 on- and off base quality of life programs, services, and facilities. Members could select a level of monthly use for each service, program, or facility from among eight options. The eight options were: not available; 0 times; 1-5 times; 6-10 times; 11-15 times; 16-20 times; 21-25 times; and 26 times or more. For purposes of this report, responses were recoded into two variables. The first contained two eategories: available or not available. The second reported the usage of the service, program, or facility if available. Values for the number of times used were then recoded to the category mean, with the final eategory set to 26. Frequencies for availability and mean usage were then estimated by the crossing variables. This report evaluates availability and member use for 13 on base programs and 4 off base programs.
- Member use of education programs (Q53) was assessed by a multiple-part question asking them about their use of four education programs during the 12 months preceding the survey. The four programs were: adult continuation education/counseling; tuition assistance programs for college/higher education; technical/vocational programs; and basic skills education. Members responded by indicating either yes or no for each program. Frequencies were then estimated by the crossing variables.

- Member use of childcare programs (Q62 G,H,I,J,K,L,M,O) was assessed by a single question asking the members to identify all of the childcare programs they routinely used in the 12-month period preceding the survey. Members were first asked to indicate if the use of specific childcare programs was "not applicable." Then, members not selecting, "not applicable" were given 16 childcare programs from which to choose. For purposes of this report, responses for those members who did not select "not applicable" were assessed for use of the following eight childcare programs: friend or neighbor; sitter, nanny or au pair; preschool (on base), child development center (on base); childcare center/daycare center (off base), family childcare home (on base); and school-age care program (on base). Frequencies were then estimated by the crossing variables.
- Member attitudes about health care (Q77) were assessed by a multiple-part question requesting members with family members eligible to receive military health care to indicate their levels of satisfaction with the following seven aspects of military health care: my out-of-pocket cost for care; skill of physicians and other medical providers; availability of specialists; ability to get appointments, waiting time in the clinic; overall quality of care; and administrative requirements. Members responded using a scale with five categories: very satisfied, satisfied, neither satisfied nor dissatisfied, dissatisfied, and very dissatisfied. For the purposes of this report, the five categories were collapsed into three categories: very satisfied/satisfied, neither satisfied nor dissatisfied, and dissatisfied/very dissatisfied. Members were first given the option to respond "Does not apply. I don't have any family members eligible to receive military health care." Respondents who had no family members eligible to receive military health care were considered not applicable and excluded from the analyses. Items were then collapsed into three categories, and frequencies were estimated by the crossing variables.

Profile of the Services

An understanding of each Service's unique structure and demographic and career characteristics must be considered when comparing survey responses between Services. For example, a younger less married force responds quite differently than seasoned service members raising a family while responding to the professional demands of today's military.

Table 2.1.
Service By Years of Total Active Federal Military Service (Years of Service)

	Years of Service						
	1-5	6-12	13-20	21+			
Army	50%	25%	19%	6%			
Navy	43%	24%	25%	8%			
Marine Corps	66%	17%	12%	5%			
Air Force	36%	24%	30%	10%			
Coast Guard	42%	23%	27%	8%			

Note: From September 1999, Active Duty Military Master and Loss Edit File. Defense Manpower Data Center: Arlington, VA.

Appendix B of the document contains a series of tables presenting the analytic subgroups by Service. Throughout the report, results that may be affected by the differing demographic profiles of the Services are pointed out.

Presentation of Results

Each chapter in this report focuses on significant differences when all subgroups are compared. That is, subgroups with response distributions differing statistically from all other groups are noted, while differences between two subgroups only are not pointed out. Some of these differences, although statistically significant, may be small, and thus, may not be relevant to the formulation of military policy.

Discussion of differences between proportions focuses on the comparison between the two proportions, rather than the absolute levels in each comparison group. As such, proportions are discussed using phrases such as "proportionately more" or "proportionately fewer." Because all differences reported are statistically significant, the use of the word "significantly" is redundant and not used.

All percentages presented in this report have associated confidence intervals, included in an accompanying table or figure. Confidence intervals in the figures appear as "whiskers" above and below the estimate in question, while the tables present confidence intervals below the estimate.

The tables and figures in the report are numbered independently and sequentially within each chapter. The titles describe the subgroup and dependent variables presented in the table or figure. The tables contain subgroups across the top, with dependent variables down the side. The numbers contained in the tables are percentages or means, with confidence intervals italicized in parentheses. Figures consist of column charts, with each column representing percentages or means of collapsed dependent variable responses for a particular subgroup category.

Data Suppression

Unstable estimates in table cells were suppressed or annotated. Estimates may be unstable because of a small sample size for that cell or large variance in the data or weights. The following rules were used:

- A cell estimate was not published if the sample size in that cell was less than 30. These cells are annotated "NR" (Not Reported).
- A cell estimate was published with an asterisk if the responding cell sample size was 30 to 59.
- A cell estimate was published with an asterisk if the relative standard error for that estimate was greater than 30%.

When comparisons are made using a small cell size (i.e., between 30 and 59) or a relative standard error (greater than 30%), it is also noted in the text.

Chapter 3: Satisfaction with Military Life

This chapter describes members' responses concerning their satisfaction with military life. The first section examines military members' overall satisfaction with the military way of life. The following section explores members' satisfaction with different components of military life. This and all remaining chapters in the report present findings for the following groups: Service, paygrade, gender, race/ethnicity, family type, and spouse employment status. Also included in this chapter is a comparison of 1999 and 1992 survey data for member satisfaction with three components of military life. The final section of this chapter summarizes the important findings for each section. ⁵

Members' Overall Satisfaction with the Military Way of Life

Question 51 asked members how satisfied they were with the military way of life.

Now, taking all things together, how satisfied are you with the military way of life?

- Very satisfied
- Satisfied
- Neither satisfied nor dissatisfied
- Dissatisfied
- Very dissatisfied

For the purposes of this report, the five response categories were collapsed into three categories: very satisfied/satisfied, neither satisfied nor dissatisfied, and very dissatisfied/dissatisfied. Complete tables supporting the figures and analysis reported here appear in Appendix C of this document and in Gaines et al. (2000a).

In general, proportionately more members indicated that they were *very satisfied/satisfied* with the military way of life (49.5%) than said they were *very dissatisfied/dissatisfied* with military life (28.2%) (Table 51.1, Gaines et al., 2000a).⁶

Figure 3.1 shows the percentage of members in each Service who said they were *very satisfied/satisfied* with the military way of life. There are no differences in these percentages when all five are compared collectively. However, a comparison of DoD Services shows that a higher proportion of Air Force members said they were *very satisfied/satisfied* with the military way of life (56.7%) than did members of other DoD Services.

⁵ An understanding of each Service's unique structure and manning profile must provide the context to compare survey responses between Services (see Table 2.1, Table B-2, and Table B-3).

⁶ Differences discussed in text are statistically significant.

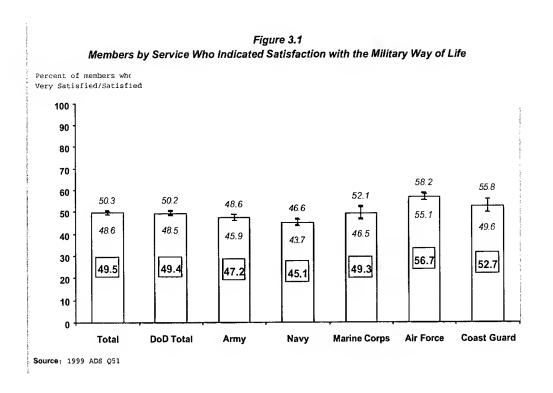

Figure 3.2 shows responses concerning satisfaction with the military way of life across paygrades. Within military paygrade groups, satisfaction increased with rank. Overall, proportionately fewer members in paygrade groups E1-E3 and E4 said they were *very satisfied/satisfied* with military life (36.1% and 37.2%, respectively) than did all other paygrade groups. Among only the officer paygrade groups, proportionately more members in paygrade group O4-O6 than in paygrade group O1-O3 responded that they were *very satisfied/satisfied* with the military way of life (72.4% vs. 60.2%). Among the enlisted paygrade groups, a higher proportion of the E7-E9 paygrade group responded that they were *very satisfied/satisfied* with the military way of life (68.1%) than did all other enlisted paygrade groups.

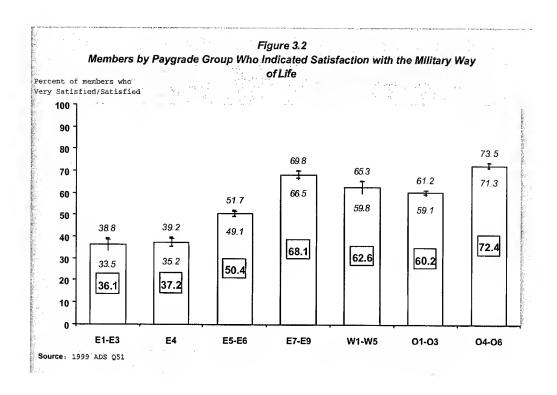

Figure 3.3 shows satisfaction with the military way of life for males and females. As the figure shows, gender was found not to be associated with differences in satisfaction with the military way of life.

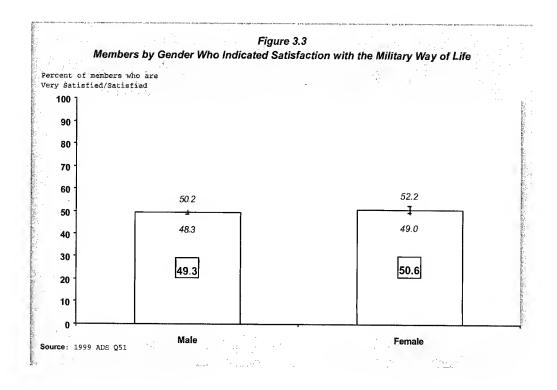

Figure 3.4 shows members' satisfaction with the military way of life by racial/ethnic groups. As indicated in the figure, race/ethnicity was found not to be associated with differences in satisfaction with the military way of life.

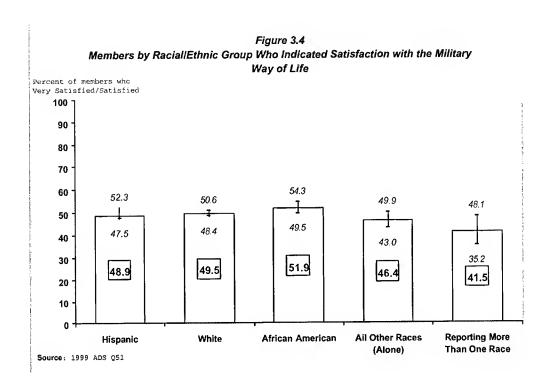

Figure 3.5 shows satisfaction with the military way of life by family type. Proportionately fewer unmarried members without children (40.8%) said they were *very satisfied/satisfied* with military life than did members with all other family types. When members without children are compared to their counterparts with children (i.e., active-duty spouse, Reserve Component spouse, civilian spouse, unmarried), proportionately more unmarried members with children and members married to civilians with children were *very satisfied/satisfied* with military life (50.6% and 55.4%, respectively) than were their counterparts without children.

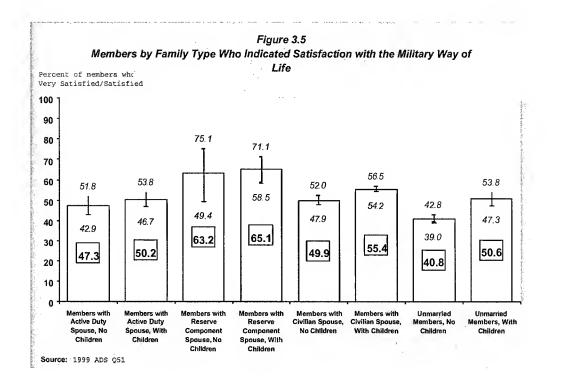

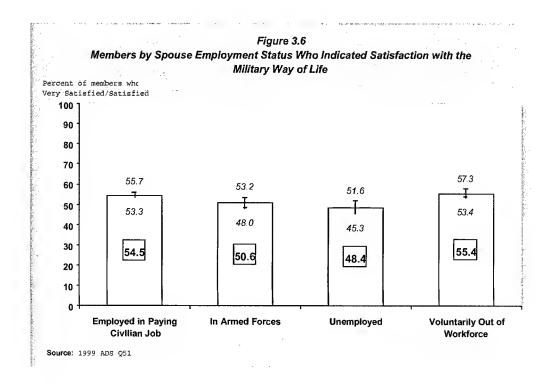

Figure 3.6 shows responses concerning satisfaction with the military way of life by spouse employment status. Proportionately more members with spouses in the categories employed in paying civilian jobs and voluntarily out of the work force indicated they were *very satisfied/satisfied* with the military way of life (54.5% and 55.4%, respectively) than did those members with spouses in other employment status groups.

Members' Satisfaction with Components of Military Life

Question 39 asked members how satisfied they were with 37 specific components of military life.

How satisfied are you with each of the following?

- A. Basic Pay
- B. Special and incentive pay
- C. Reenlistment bonus or continuation pay program
- D. Housing allowance
- E. SEPRATS/COMRATS, subsistence allowance
- F. Military housing
- G. Medical care for you
- H. Dental care for you
- I. Retirement pay you would get
- J. Cost of living adjustments (COLA) to retirement pay
- K. Other retirement benefits such as medical care and use of base services
- L. Pace of your promotions
- M. Chances for future advancement
- N. Training and professional development
- O. Type of assignments received
- P. Deployments
- Q. Other military duties that take you away from permanent duty station
- R. Availability of equipment, parts, and resources
- S. Level of manuing in your unit
- T. Your unit's morale
- U. Your personal workload
- V. Amount of personal/family time you have
- W. Off duty educational opportunities
- X. Quality of leadership
- Y. Military values, lifestyle, and tradition
- Z. Amount of enjoyment from your job
- AA. Frequency of PCS moves
- BB. Job security
- CC. Location or station of choice, homeporting
- DD. Co-location with your military spouse
- EE. Medical care for your family
- FF. Dental care for your family
- GG. Youth activities on base
- HH. Schools for your children
- II. Spouse employment and career opportunities
- JJ. Military family support programs
- KK. Acceptable and affordable childcare

Members responded using a scale with either five or six categories. All questions included: *very satisfied, satisfied, neither satisfied nor dissatisfied, dissatisfied,* and *very dissatisfied*. For the purposes of this report, the five categories were collapsed into three categories: *very satisfied/satisfied, neither satisfied nor dissatisfied,* and *very dissatisfied/dissatisfied.* Those indicating that the question was not applicable to them, when this option was available, were excluded. Complete tables supporting the figures and analysis reported here appear in Appendix C of this document and in Gaines et al. (2000a). Because respondents determined for themselves whether a question was applicable to them the tables in the text and Appendix C include some seemingly inappropriate responses. For example, in Table 3.23, there are unmarried members without children reporting their level of satisfaction with medical and dental care for their families. Because it is unclear whether these members answered in error or were expressing their opinions based on the experiences of their colleagues, these seemingly inappropriate responses are included in the tables but not discussed in the text.

For this analysis and report, the 37 components of military life were grouped into four general categories: military pay and allowances, military benefits, military job characteristics, and military programs and services. To further simplify the presentation of results, military job characteristics were divided into two additional groups: work environment and military lifestyle. The four categories of military life and the issues assessed in each category are shown in Table 3.1.

٠

⁷ Fourteen of the questions included a *does not apply* response option. Components for which respondents could choose *does not apply* were: special and incentive pay; reenlistment bonus or continuation pay program; housing allowance; SEPRATS/COMRATS, subsistence allowance; military housing; location or station of choice, homeporting; co-location with your military spouse; medical care for your family; dental care for your family; youth activities on base; schools for your children; spouse employment and career opportunities; military family support programs; and acceptable and affordable childcare.

⁸ Tables in Appendix C and in Gaines et al. (2000a) present all response options for each question including *not applicable*. Therefore, the percentage estimates in the supporting tables will vary from those presented in the analytical tables in this chapter for variables where response options were excluded from the analyses.

⁹ These groupings were logically determined.

Table 3.1.

Components Of Military Life, By Category

Military Pay and Allowances

Basic pay

Special and incentive pay

Reenlistment bonus or continuation pay program

Housing allowance

SEPRATS/COMRATS, subsistence allowance

Military Benefits

Military housing

Medical care for you

Dental care for you

Medical care for your family

Dental care for your family

Retirement pay you would get

Cost of living adjustments (COLA) to retirement pay

Other retirement benefits such as medical eare and use of base services

Military Job Characteristics

Work Environment

Pace of your promotions

Chances for future advancement

Training and professional development

Type of assignments received

Availability of equipment, parts, and resources

Level of manning in your unit

Your unit's morale

Off-duty educational opportunities

Quality of leadership

Job security

Your personal workload

Military Lifestyle

Deployments

Other military duties that take you away from permanent duty station

Amount of personal/family time you have

Military values, lifestyle, and tradition

Amount of enjoyment from your job

Frequency of PCS moves

Location or station of choice, homeporting

Co-location with your military spouse

Military Programs and Services

Youth activities on base

Schools for your children

Spouse employment and eareer opportunities

Military family support programs

Acceptable and affordable childcare

Overall Findings

The components of military life for which the highest percentages of members reported satisfaction were job security (71.6%), dental care for the member (61.8%), and schools for members' children (54.5%). Members' overall satisfaction percentage also exceeded 50% for medical care for members (52.1%), type of assignments received (50.3%), and training and professional development (50.2%). Overall, the lowest satisfaction percentages among Services were for cost of living adjustments (COLA) to retirement pay (12.8%) and retirement pay (18.1%) (see Tables 3.2 through 3.6).

Other notable general findings include:

- *Military pay and allowances*. Within this category of components, 22.7% of members said they were *very satisfied/satisfied* with basic pay.
- *Military benefits*. Members were more satisfied with medical care for themselves (52.1%) than with medical care for their families (39.5%) and with dental care for themselves (61.8%) than with dental care for their families (35.6%). The level of member satisfaction with military housing was 26.8%.
- *Military job characteristics*. Among the issues examined, 30.8% of members said they were *very satisfied/satisfied* with deployments.
- *Military programs and services*. In these components, 32.9% of members indicated they were *very satisfied/satisfied* with spouse employment and career opportunities, and 20.7% of members said they were *very satisfied/satisfied* with childcare.

Service Comparisons

Tables 3.2-3.6 show the percentage of members in each Service who said they were *very satisfied/satisfied* with the components of military life. Service differences of interest include:

• *Military pay and allowances* (Table 3.2). Proportionately more Navy members (25.7%) than members of other Services responded positively (*very satisfied/satisfied*) regarding housing allowance.

- Military Job Characteristics (Work Euvironment) (Table 3.4).
 - **Army.** Proportionately fewer Army members than other members indicated they were *very satisfied/satisfied* with the level of unit manning (18.9%). Among DoD Services, a lower percentage of Army members than those of other Services said they were *very satisfied/satisfied* with training and professional development (46.3%), off-duty educational opportunities (37.5%) and personal workload (36.4%).
 - Navy. Among DoD Services, a higher proportion of Navy members responded that they were very satisfied/satisfied with job security (76.0%) than did those of other Services.
 - Marine Corps. Among DoD Services, a higher percentage of Marine Corps members stated they were *very satisfied/satisfied* with the level of unit manning (29.2%) than did those of other Services.
 - Air Force. Proportionately more Air Force members (52.3%) responded *very satisfied/satisfied* with off-duty educational opportunities than did members of other Services. Proportionately fewer Air Force members (27.7%) said they were *very satisfied/satisfied* with promotion pace than did those of other Services.
 - **Army and Marine Corps.** Smaller percentages of Army and Marine Corps members said they were *very satisfied/satisfied* with the availability of equipment, parts, and resources (19.2% and 20.4%, respectively) than did members of other Services.
 - Navy and Air Force. Proportionately fewer Navy and Air Force members responded *very satisfied/satisfied* concerning their chances for future advancement (33.6% and 36.6%, respectively) than did members of other Services.
 - Marine Corps and Air Force. The proportion of members reporting they were very satisfied/satisfied with training and professional development was higher for the Marine Corps (54.8%) and Air Force (54.1%) than for the other Services. Proportionately more Marine Corps members (43.3%) and Air Force members (39.2%) than those of other DoD services said they were very satisfied/satisfied with the quality of leadership.
 - Marine Corps and Coast Guard. Higher percentages of Marine Corps and Coast Guard members indicated satisfaction with unit morale (37.1% and 36.4%, respectively) and the pace of promotions (39.0% and 43.0%, respectively) than did those of other Services.
 - Air Force and Coast Guard. Proportionately more Air Force and Coast Guard members were satisfied with the type of assignments they received (54.9% and 58.6%, respectively) and the availability of equipment, parts, and resources (28.0% and 28.7%, respectively) than were members of other Services.

- Military Job Characteristics (Military Lifestyle) (Table 3.5).
 - **Army.** Proportionately fewer Army members (40.8%) stated that they were *very satisfied/satisfied* with location or station of choice, homeporting than did members of other Services.
 - **Navy.** Among DoD services, proportionately fewer Navy members (43.7%) responded that they were *very satisfied/satisfied* with military values, lifestyle, and tradition than did members of other Services.

- **Marine Corps.** A higher proportion of Marine Corps members (57.1%) than those of all other Services said they were *very satisfied/satisfied* with military values, lifestyle, and tradition. Proportionately fewer Marine Corps members (30.6%) than members of other Services stated they were *very satisfied/satisfied* with the frequency of PCS moves.
- Air Force. Proportionately more Air Force members said they were *very* satisfied/satisfied with the frequency of PCS moves (42.1%) and with co-location with their military spouses (61.0%) than did those of any other Service.
- Air Force and Coast Guard. Higher percentages of Air Force and Coast Guard members indicated that they were *very satisfied/satisfied* with the amount of personal/family time available (39.0% and 37.4%, respectively) and with the amount of enjoyment derived from their jobs (48.6% and 51.7%, respectively) than were those of other Services.

childcare	(19.8, 21.6)	(19.9, 21.7)	(18.0, 21.2)	(20.7, 24.2)	(17.5, 22.7)	(19.6, 23.1)	(13.9, 20.7)

Paygrade Comparisons

Tables 3.7-3.11 show satisfaction with the components of military life by paygrade groups. Differences among the paygrade groups identified include:

• Military Pay and Allowances (Table 3.7). As expected, a higher proportion of officer paygrade groups than warrant officers or enlisted paygrade groups responded very satisfied/satisfied with basic pay, special and incentive pay, and housing allowance. Satisfaction with basic pay ranged from 16.5% for the E1-E3 paygrade group to 50.6% for the O4-O6 paygrade group.

- E7-E9 Paygrade Group. As expected, among enlisted paygrade groups, a higher percentage of the E7-E9 paygrade group (23.5%) than other paygrade groups said they were *very satisfied/satisfied* with basic pay. Also among enlisted paygrade groups, the E7-E9 paygrade group had a lower proportion of *very satisfied/satisfied* responses for reenlistment bonus or continuation pay program (9.8%) than did all other enlisted paygrade groups.
- W1-W5 Paygrade Group. Proportionately fewer members in the W1-W5 paygrade group (11.9%) said they were *very satisfied/satisfied* with SEPRATS/COMRATS, subsistence allowance than did members of all other paygrade groups.
- O1-O3 Paygrade Group. Proportionately more members in the O1-O3 paygrade group (35.1%) than members of other paygrade groups said they were *very satisfied/satisfied* with the housing allowance.
- **O4-O6 Paygrade Group.** Among officers, the O4-O6 paygrade group had the highest percentage of satisfaction (41.3%) with special and incentive pay.
- **E7-E9 and W1-W5 Paygrade Group.** The E7-E9 and W1-W5 paygrade groups had lower proportions of *very satisfied/satisfied* responses for reenlistment bonus or continuation pay program (9.8% and 8.3%, respectively) than did all other paygrade groups.

Table 3.7.

Members By Paygrade Group Who Indicated Satisfaction With Components Of Military Life: Military Pay And Allowances

		Enlisted				Warrant Officers	Officers	
		E1-E3	E4	E5-E6	E7-E9	W1-W5	01-03	O4-O6
a.	Basic pay	16.5	16.1	17.6	23.5	25.3	47.8	50.6
		(14.7, 18.6)	(14.7, 17.6)	(16.7, 18.5)	(22.1, 25.0)	(23.0, 27.8)	(46.6, 49.0)	(49.2, 51.9)
b.	Special and incentive pay	23.4	20.9	19.4	22.0	25.6	35.4	41.3
		(21.4, 25.6)	(19.1, 22.9)	(18.3, 20.6)	(20.6, 23.6)	(22.7, 28.7)	(33.8, 37.1)	(39.5, 43.1)
c.	Reenlistment bonus or	27.7	22.8	15.3	9.8	8.3	24.7	32.3
	continuation pay program	(25.0, 30.5)	(20.7, 25.0)	(14.3, 16.5)	(8.5, 11.3)	(6.0, 11.3)	(22.7, 26.7)	(29.7, 35.0)
d.	Housing allowance	22.4	22.0	19.8	21.4	19.7	35.1	31.2
		(19.6, 25.5)	(20.1, 24.0)	(18.7, 21.0)	(20.0, 22.7)	(17.6, 22.0)	(34.0, 36.3)	(30.0, 32.4)
e.	SEPRATS/COMRATS,	26.4	28.4	27.0	27.7	11.9	28.4	28.3
	subsistence allowance	(23.8, 29.2)	(26.1, 30.7)	(25.8, 28.2)	(26.1, 29.2)	(10.1, 13.9)	(27.1, 29.7)	(27.1, 29.6)

- *Military Benefits* (Table 3.8). Overall, as paygrade groups approached retirement paygrade (i.e., E7-E9 paygrade group or O4-O6 paygrade group), the percentage of *very satisfied/satisfied* responses for other retirement benefits such as medical care and use of services decreased.
 - **E1-E3 Paygrade Group.** A larger proportion of paygrade group E1-E3 indicated they were *very satisfied/satisfied* with their own medical care (61.0%) and with other retirement benefits such as medical care and use of base services (34.7%), than did members in all other paygrade groups. Among enlisted paygrade groups, the E1-E3 paygrade group had a larger proportion of *very satisfied/satisfied* responses than did other enlisted paygrade groups for satisfaction with medical care for the member (61.0%) and dental care for the member (66.0%).
 - **E7-E9 Paygrade Group.** Among enlisted paygrade groups, the E7-E9 paygrade group had a lower percentage of *very satisfied/satisfied* responses for dental care for the member (57.0%) than did other enlisted paygrade groups.
 - **O1-O3 Paygrade Group.** Among officers, paygrade group O1-O3 had a higher proportion of *very satisfied/satisfied* responses than did paygrade group O4-O6 for medical care for the member (55.4% vs. 51.3%) and for medical care for the family (37.8% vs. 30.0%).
 - **O4-O6 Paygrade Group.** As expected, given their higher expected retirement pay, a larger proportion of paygrade group O4-O6 indicated they were *very satisfied/satisfied* with retirement pay (42.4%), and with cost of living adjustments (COLA) to retirement pay (21.9%) than did members in all other paygrade groups.
 - **E1-E3 and E4 Paygrade Groups.** Proportionately more members in paygrade groups E1-E3 (51.6%) and E4 (46.7%) said they were *very satisfied/satisfied* with medical care for their families than did members of all other paygrade groups.
 - **E7-E9, W1-W5, O4-O6 Paygrade Groups.** Proportionately fewer members in paygrade groups E7-E9 (30.0%), W1-W5 (28.4%), and O4-O6 (30.1%) stated they were *very satisfied/satisfied* with dental care for their families than did members in all other paygrade groups.

- Military Job Characteristics (Work Environment) (Table 3.9).
 - E1-E3 Paygrade Group. Proportionately more members of paygrade group E1-E3 (30.6%) than members of all other paygrade groups said they were *very satisfied/satisfied* with the level of unit manning.
 - **E4 Paygrade Group.** A smaller proportion of paygrade group E4 (21.9%) than members of other paygrade groups indicated they were *very satisfied/satisfied* with unit morale. Among enlisted paygrade groups, a smaller proportion of paygrade group E4 (43.1%) than any other paygrade groups said they were *very satisfied/satisfied* with training and professional development.
 - **E7-E9 Paygrade Group.** Proportionately more members of paygrade group E7-E9 than members of other paygrade groups indicated they were *very* satisfied/satisfied with the off-duty educational opportunities (54.4%) and with job security (76.4%). Among enlisted paygrade groups, a larger proportion of paygrade group E7-E9 than other paygrade groups said they were *very* satisfied/satisfied with unit morale (40.3%), quality of leadership (43.2%), promotion pace (37.8%), training and professional development (56.1%), and type of assignments (64.3%).

- W1-W5 Paygrade Group. Proportionately fewer members of paygrade group W1-W5 (14.1%) said they were *very satisfied/satisfied* with the level of manning than did members of all other paygrade groups.
- **O1-O3 Paygrade Group.** Paygrade group O1-O3 had a higher percentage of very satisfied/satisfied responses for pace of promotions (51.1%) and for chances for future advancement (60.6%) than did all other paygrade groups. Among officer paygrade groups, a larger proportion of paygrade group O1-O3 than paygrade group O4-O6 said they were very satisfied/satisfied with job security (73.7% vs. 68.4%).
- O4-O6 Paygrade Group. Proportionately more members of paygrade group O4-O6 than members of other paygrade groups were *very satisfied/satisfied* with unit morale (49.2%), quality of leadership (50.8%) and the type of assignments received (77.8%). Among officer paygrade groups, proportionately more members of paygrade group O4-O6 than of paygrade group O1-O3 said they were *very satisfied/satisfied* with the availability of equipment, parts, and resources (25.4% vs. 21.7%) and off-duty educational opportunities (43.6% vs. 37.7%).
- **E1-E3 and E4 Paygrade Groups.** Among enlisted paygrade groups, proportionately more members of paygrade groups E1-E3 and E4 than other paygrade groups indicated they were *very satisfied/satisfied* with chances for future advancement (39.8% and 37.4%, respectively).
- O1-O3 and O4-O6 Paygrade Groups. Officers in O1-O3 and O4-O6 paygrade groups had higher percentage of *very satisfied/satisfied* responses for training and professional development than did members of all other paygrade groups (62.7% and 63.5%, respectively).

- Military Job Characteristics (Military Lifestyle) (Table 3.10). Among officer
 paygrade groups, as the paygrade group increases, satisfaction with the military
 lifestyle components of job characteristics also increases. Two exceptions are noted
 (amount of personal time with family and location or station of choice). Other
 notable differences among the paygrade groups include:
 - **E1-E3 Paygrade Group.** Proportionately fewer members of paygrade group E1-E3 (20.7%) than members of other paygrade groups indicated they were *very satisfied/satisfied* with the frequency of PCS moves.
 - **E4 Paygrade Group.** Proportionately fewer members of paygrade group E4 (39.3%) than other paygrade groups indicated they were *very satisfied/satisfied* with military values, lifestyle, and tradition.

- **E7-E9 Paygrade Group.** A higher percentage of paygrade group E7-E9 indicated they were *very satisfied/satisfied* with the amount of personal/family time they had (37.3%) and the frequency of PCS moves (49.8%) than did members of all other paygrade groups. Among enlisted paygrade groups, a larger proportion of paygrade group E7-E9 than other enlisted paygrade groups said they were *very satisfied/satisfied* with deployments (36.4%), other military duties that take them away from permanent duty station (33.3%), military values, lifestyle, and tradition (56.8%), job enjoyment (55.2%), location or station of choice (53.5%), and co-location with military spouse (63.1%).
- **O4-O6 Paygrade Group.** Proportionately more members of paygrade group O4-O6 than members of all other paygrade groups indicated they were *very satisfied/satisfied* with deployments (41.6%), other military duties that take them away from permanent duty station (38.8%), military values, lifestyle, and tradition (71.1%), and enjoyment they derived from their jobs (63.9%). Among officer paygrade groups, a higher proportion of the O4-O6 paygrade group than of the O1-O3 paygrade group said they were *very satisfied/satisfied* with the frequency of PCS moves (44.9% vs. 42.1%) and co-location with military spouse (68.9% vs. 58.1%).

Military Programs and Services (Table 3.11).

O39. How satisfied are you with each of the following?

- **O4-O6 Paygrade Group.** Among officer paygrade groups, proportionately more members of paygrade group O4-O6 than of paygrade group O1-O3 indicated they were very satisfied/satisfied with schools for their children (59.0% vs. 54.2%) and spouse employment and career opportunities (34.8% vs. 30.5%).
- E1-E3 and E4 Paygrade Groups. A smaller proportion of paygrade groups E1-E3 and E4 indicated they were very satisfied/satisfied with schools for their children (38.3% and 44.1%, respectively) than did members of any other paygrade group.
- E5-E6 and E7-E9 Paygrade Groups. Among enlisted paygrade groups, proportionately more members of paygrade groups E5-E6 and E7-E9 said they were very satisfied/satisfied with spouse employment and carcer opportunities (35.0% and 37.8%, respectively) than did other paygrade groups.
- O1-O3 and O4-O6 Paygrade Groups. A higher percentage of paygrade groups O1-O3 and O4-O6 said they were very satisfied/satisfied with acceptable and affordable childcare (29.2% and 27.6%, respectively) than did members of other paygrade groups.

Table 3.11. Members By Paygrade Group Who Indicated Satisfaction With Components Of Military Life: Military Programs And Services

This table shows the percentage of respondents who said the	ey were very satisfied/satisfied with these components of military life

Gender Comparisons

Tables 3.12-3.16 present comparisons of male and female responses concerning satisfaction with the components of military life. Of the 37 components of military life for which differences between male and female levels of satisfaction existed, more females than males indicated satisfaction with aspects of benefits and programs and services. The responses of male and female members differed in the following ways:

• *Military Pay and Allowances* (Table 3.12). Proportionately more females than males responded that they were *very satisfied/satisfied* with basic pay (28.4% vs. 21.7%), housing allowance (29.5% vs. 22.2%), and SEPRATS/COMRATS, subsistence allowance (35.6% vs. 25.9%).

Table 3.12.

Members By Gender Who Indicated Satisfaction With Components Of Military Life: Military Pay And Allowances

Allowances	
O30 How satisfied are you with each of the following?	

	Male	Female
a. Basic pay	21.7	28.4
	(21.0, 22.3)	(26.8, 30.2)
b. Special and incentive pay	23.2	25.3
	(22.4, 24.0)	(23.0, 27.8)
c. Reenlistment bonus or continuation pay program	19.9	20.5
	(19.0, 20.9)	(18.2, 23.0)
d. Housing allowance	22.2	29.5
	(21.4, 22.9)	(27.8, 31.3)
e. SEPRATS/COMRATS, subsistence allowance	25.9	35.6
	(25.1, 26.7)	(33.2, 38.0)

• *Military Benefits* (Table 3.13). Proportionately more females than males stated they were *very satisfied/satisfied* with their personal dental care (67.0% vs. 60.9%), family medical care (52.5% vs. 37.7%), and family dental care (46.6% vs. 34.2%).

Table 3.13.

Members By Gender Who Indicated Satisfaction With Components Of Military Life: Military Benefits

Q39. How satisfied are you with each of the following?

		Male	Female
f.	Military housing	26.4	29.2
		(25.4, 27.4)	(26.7, 31.9)
g.	Medical care for you	51.9	52.7

	(38.4, 40.2)	(42.1, 46.0)

- Military Job Characteristics (Military Lifestyle) (Table 3.15).
 - **Male.** A higher percentage of males than females indicated they were *very satisfied/satisfied* with deployments (31.5% vs. 26.6%).
 - **Female.** Proportionately more females than males indicated they were *very satisfied/satisfied* with the amount of personal/family time (37.1% vs. 31.2%) and co-location with military spouse (59.7% vs. 47.3%).

Table 3.15.

Members By Gender Who Indicated Satisfaction With Components Of Military Life: Military Lifestyle

This table shows the percentage of respondents who said they were very satisfied/satisfied with these components of military life.

		Male	Female
p. D	Deployments	31.5	26.6
		(30.7, 32.4)	(24.9, 28.3)
q. C	Other military duties that take you away from permanent	26.0	26.5
d	luty station	(25.4, 26.7)	(24.8, 28.3)
v. A	Amount of personal/family time you have	31.2	37.1
		(30.4, 32.0)	(35.3, 38.9)
y. N	Military values, lifestyle, and tradition	49.6	46.3
		(48.8, 50.4)	(44.4, 48.2)
z. A	Amount of enjoyment from your job	44.4	42.4
		(43.6, 45.3)	(40.4, 44.4)
aa. F	requency of PCS moves	36.3	38.7
		(35.5, 37.0)	(36.8, 40.6)
ee. L	ocation or station of choice, homeporting	46.5	46.7
		(45.6, 47.5)	(44.8, 48.6)
dd. C	Co-location with your military spouse	47.3	59.7
		(45.5, 49.1)	(56.3, 63.1)

• *Military Programs and Services* (Table 3.16). Proportionately more females than males stated they were *very satisfied/satisfied* with spouse employment and career opportunities (39.1% vs. 32.2%), military family support programs (42.7% vs. 36.4%), and acceptable and affordable childcare (24.6% vs. 20.1%).

Table 3.16.

Members By Gender Who Indicated Satisfaction With Components Of Military Life: Military Programs And Services

Q39. How satisfied are you with each of the following?

	Male	Female
Spouse employment and career opportunities Military family support programs	39.5	42.9
	(38.3, 40.7)	(40.2, 45.5)
hh. Schools for your children	54.5	54.3
	(53.3, 55.7)	(50.9, 57.8)
ii. Spouse employment and career opportunities	32.2	39.1
	(31.3, 33.2)	(36.5, 41.8)
jj. Military family support programs	36.4	42.7
	(35.6, 37.3)	(40.2, 45.3)
kk. Acceptable and affordable childcare	20.1	24.6
	(19.2, 21.0)	(22.2, 27.2)

Race/Ethnicity Comparisons

Tables 3.17-3.21 show satisfaction differences among racial/ethnicity groups for each component of military life. Notable findings include:

• *Military Pay and Allowances* (Table 3.17). As indicated in the table, race/ethnicity was found not to be associated with differences in satisfaction with military pay and allowances.

Table 3.17.

Members By Racial/Ethnic Group Who Indicated Satisfaction With Components Of Military Life:
Military Pay And Allowances

Q39. How satisfied are you with each of the following?

This table shows the percentage of respondents who said they were very satisfied/satisfied with these components of military life.

				Not H	ispanic	
		Hispanic	White	Black/African American	All Other Races (Alone)	Reporting More Than One Race
a.	Basic pay	21.4	23.5	21.6	21.4	16.2
		(19.4, 23.6)	(22.8, 24.3)	(19.8, 23.5)	(18.9, 24.2)	(12.5, 20.9)
b.	Special and incentive pay	23.4	23.8	23.4	22.3	20.7
		(20.8, 26.1)	(22.9, 24.8)	(21.4, 25.6)	(19.0, 26.0)	(15.5, 27.0)
c.	Reenlistment bonus or	19.2	21.3	15.7	18.7	21.7*
	continuation pay program	(16.4, 22.2)	(20.3, 22.2)	(13.6, 18.0)	(15.7, 22.1)	(15.2, 29.9)
d.	Housing allowance	24.3	23.3	24.1	21.2	17.8
		(21.8, 26.9)	(22.5, 24.1)	(22.3, 26.0)	(18.6, 24.0)	(13.5, 23.1)
e.	SEPRATS/COMRATS,	28.2	27.4	27.5	25.6	22.7
	subsistence allowance	(25.8, 30.7)	(26.5, 28.4)	(25.4, 29.8)	(23.0, 28.4)	(17.4, 29.1)

• *Military Benefits* (Table 3.18). Proportionately more African American members indicated they were *very satisfied/satisfied* with medical care for their families (50.5%) and with dental care for their families (45.7%) than did all other racial/ethnic groups.

Table 3.18.

Family Type Comparisons

Tables 3.22-3.26 show satisfaction with military life components by family type. Findings of note include:

- *Military Pay and Allowances* (Table 3.22).
 - **Members with No Children.** A higher percentage of members without children indicated they were *very satisfied/satisfied* with reenlistment bonus or continuation pay than did their counterparts with children, with the exception of members married to Reserve Component members. Data for members married to Reserve Component members were not included because of potentially unstable estimates resulting from small cell sizes.
 - **Members with Civilian Spouses, No Children.** Proportionately more members with civilian spouses and no children (25.2%) said they were *very satisfied/satisfied* with basic pay than did members with civilian spouses and children (21.9%). The same pattern holds for housing allowance (28.3% vs. 20.0%) and SEPRATS/COMRATS, subsistence allowance (28.3% vs. 24.4%).

Table 3.22.

Members By Family Type Who Indicated Satisfaction With Components Of Military Life: Military Pay And Allowances

- *Military Benefits* (Table 3.23).
 - Members with Civilian Spouses, with Children. A larger proportion of members with civilian spouses with children indicated that they were *very satisfied/satisfied* with retirement pay (19.2%) than did members with civilian spouses without children (16.5%).
 - Unmarried Members, with Children. Proportionately more unmarried members with children said they were *very satisfied/satisfied* with military housing (28.1%), than did unmarried members without children (21.7%).
 - Members with Civilian Spouses, No Children and Unmarried Members, No Children. Proportionately more members with civilian spouses and no children and unmarried members with no children said they were *very satisfied/satisfied* with other retirement benefits (23.1% and 31.4%, respectively) than did their counterparts with children (19.3% and 21.0%, respectively).

Spouse Employment Comparisons

Tables 3.27-3.31 compare responses on satisfaction with military life components by spouse employment status. Notable findings include:

• *Military Pay and Allowances* (Table 3.27). Proportionately more members with Armed Forces spouses indicated they were *very satisfied/satisfied* with the housing allowance (27.3%)¹⁰ and SEPRATS/COMRATS, subsistence allowance (32.9%) than did members with spouses in other employment status groups.

Table 3.27.

Members By Spouse Employment Status Who Indicated Satisfaction With Components Of Military

Life: Military Pay And Allowances

Q39. How satisfied are you with each of the following?

This table shows the percentage of respondents who said they were very satisfied/satisfied with these components of military life.

		Employed in Paying Civilian Job	In Armed Forces	Unemployed	Voluntarily Out of Work Force
a.	Basic pay	22.4	25.5	19.1	24.6
		(21.5, 23.4)	(23.5, 27.5)	(16.8, 21.6)	(23.4, 25.8)
b.	Special and incentive pay	21.2	22.9	19.5	24.7
		(20.1, 22.5)	(20.2, 25.8)	(16.6, 22.6)	(23.2, 26.3)
c.	Reenlistment bonus or	15.5	19.2	16.0	20.7
	continuation pay program	(14.3, 16.9)	(16.5, 22.3)	(12.7, 20.0)	(18.7, 22.9)
d.	Housing allowance	22.0	27.3	20.9	22.5
		(20.9, 23.2)	(25.2, 29.4)	(18.3, 23.7)	(21.1, 24.0)
e.	SEPRATS/COMRATS,	26.0	32.9	21.4	25.5
	subsistence allowance	(25.0, 27.0)	(30.2, 35.6)	(18.6, 24.4)	(24.1, 27.0)

• *Military Benefits* (Table 3.28). Proportionately more members with spouses in the Armed Forces responded that they were *very satisfied/satisfied* with medical care for their families (52.9%) and dental care for their families (51.6%) than did members with spouses in all other employment status groups.

49

This finding is not unexpected because dual active-duty military couples may each receive a housing allowance, if in different locations, commensurate with their rank. Members married to non-military spouses receive only the military member's allowance.

Table 3.28.

Members By Spouse Employment Status Who Indicated Satisfaction With Components Of Military Life: Military Benefits

This table shows the percentage of respondents who said they were very satisfied/satisfied with these emponents of military life.

		Employed in Paying Civilian Job	In Armed Forces	Unemployed	Voluntarily Out of Work Force

- *Military Programs and Services* (Table 3.31).
 - Members with Spouses in the Armed Forces. Members with spouses in the Armed Forces had a higher percentage of very satisfied/satisfied responses for spouse employment and career opportunities (50.8%) and for military family support programs (43.2%) than did members with spouses in all other employment status groups.
 - **Members with Unemployed Spouses.** Members whose spouses were unemployed responded with a lower percentage of *very satisfied/satisfied* responses for spouse employment and career opportunities (10.5%) than did members with spouses in all other employment status groups.

Table 3.31.

Members By Spouse Employment Status Who Indicated Satisfaction With Components Of Military Life: Military Programs And Services

This table shows the percentage of respondents who said they were very satisfied/satisfied with these components of military life.

	Employed in Paying Civilian Job	In Armed Forces	Unemployed	Voluntarily Out of Work Force

Comparison of Member 1999 and 1992 Satisfaction with Military Life

This section compares the 1999 and 1992 member responses concerning satisfaction with military life. For these comparisons, paygrades have been collapsed into the following groups for the two surveys: E1-E3, E4, E5-E6, E7-E9, W1-W5¹¹, O1-O3, and O4-O6.

In both surveys, members were asked to indicate how satisfied they were with specific components of military life. ¹² Question 39 of the 1999 survey, shown on page 18 of this chapter, asked members to indicate how satisfied they were with 37 components of military life. Questions 136 of the 1992 officer survey and 137 of the 1992 enlisted personnel survey, shown next, asked members to indicate how satisfied they were with 14 components of military life.

Below is a list of issues associated with the military way of life. Considering current policies, please indicate your level of satisfaction/dissatisfaction with each issue.

- Personal freedom
- Acquaintances/friends hips
- Work group/co-workers
- Assignment stability
- Pay and allowances
- Environment for families
- Frequency of moves

- Retirement benefits
- Opportunity to serve one's country
- Satisfaction with current job
- Promotion opportunities
- Job training/in-service education
- Job security
- Working/environmental conditions

¹¹ Because there was no W5 rank in 1992, the 1992 data for warrant officers reflects the ranks W1-W4.

¹² Because the question on overall satisfaction was asked on different scales in 1992 and 1999, it is not possible to make valid comparisons.

For purposes of this report, three components from each survey were compared. They are:

- Frequency of PCS moves (Q39AA, 1999 survey) with frequency of moves (Q136, 1992 officer survey and Q137, 1992 enlisted personnel survey);
- Training and professional development (Q39N, 1999 survey) with job training/inservice education (Q136, 1992 officer survey and Q137, 1992 enlisted personnel survey); and
- Job security (Q39BB, 1999 survey) with job security (Q136, 1992 officer survey and Q137, 1992 enlisted personnel survey).

Members responded using a scale with five anchors in both the 1999 survey and in the 1992 surveys. The five anchors were very satisfied, satisfied, neither satisfied nor dissatisfied, dissatisfied, and very dissatisfied. For the purposes of this report, these five response options were collapsed into three categories: very satisfied/satisfied, neither satisfied nor dissatisfied, and dissatisfied/very dissatisfied.

Table 3.32 shows the percentage of members by paygrade group in 1992 who were *very satisfied/satisfied* with the three components of military life. Table 3.10, page 33, displays the percentage of members by paygrade group in 1999 who were *very satisfied/satisfied* with the frequency of PCS moves. Table 3.9, page 32 shows the percentage of members by paygrade group in 1999 who were *very satisfied/satisfied* with training and professional development and with job security.

Differences in member satisfaction with frequency of moves, training, and job security among officers and among enlisted members for the 1999 and 1992 surveys include:

- Frequency of PCS moves. A comparison of each 1992 paygrade group with its counterpart in 1999 revealed that a higher percentage of members in the O1-O3 paygrade group in 1992 than in 1999 were *very satisfied/satisfied* with the frequency of PCS moves (46.3% vs. 42.1%). In 1999 compared to 1992, a higher percentage of members in paygrade group E5-E6 (38.7% vs. 42.8%) and E7-E9 (44.7% vs. 49.8%) were *very satisfied/satisfied* with the frequency of PCS moves.
 - All paygrade groups. In 1992, proportionately more members in paygrade groups E7-E9, O1-O3, and O4-O6 than members in other paygrade groups were very satisfied/satisfied with the frequency of PCS moves (44.7%, 46.3%, and 45.7%, respectively). This pattern of results did not recur in 1999. In 1999, proportionately more members in paygrade group E7-E9 than members in other paygrade groups were very satisfied/satisfied with the frequency of PCS moves (49.8%).

- Enlisted paygrade groups. Among enlisted paygrade groups in both 1992 and 1999, the proportion of members very satisfied/satisfied with the frequency of PCS moves increased as the paygrade group increased.
- Officer paygrade groups. In 1992, there were no differences among officer paygrade groups for satisfaction with frequency of PCS moves. In 1999, however, the proportion of officers who were very satisfied/satisfied with the frequency of PCS moves increased as the officer paygrade group increased.
- Training. When each 1992 paygrade group is compared with its 1999 counterpart, a higher percentage of members in each 1999 paygrade group than in the corresponding 1992 paygrade group was found to be *very satisfied/satisfied* with training, with two exceptions: percentages of *very satisfied/satisfied* E5-E6 members were similar in 1992 and 1999 (45.9% and 47.7%, respectively) and percentages of *very satisfied/satisfied* warrant officers were similar in 1992 and 1999 (48.6% and 48.0%, respectively).
 - All paygrade groups. In 1992, proportionately fewer members in paygrade groups E1-E3 and E4 (39.6% and 37.5%, respectively) than members in other paygrade groups were very satisfied/satisfied with training. This pattern of results did not recur in 1999. In 1999, proportionately fewer members in paygrade group E4 only (43.1%) than members in other paygrade groups were very satisfied/satisfied with training. Also, in 1999 but not in 1992, proportionately more members in paygrade groups O1-O3 and O4-O6 (62.7% and 63.5%, respectively) than members in other paygrade groups were very satisfied/satisfied with training.
 - Enlisted paygrade groups. Among enlisted paygrade groups in both the 1992 and 1999 surveys, proportionately more members in paygrade group E7-E9 were very satisfied/satisfied with training (50.6% and 56.1%, respectively) than were members in other enlisted paygrade groups.
 - Officer paygrade groups. There were no differences in member satisfaction with training between officer paygrade groups in either 1992 or 1999.
- **Job Security.** When each 1992 paygrade group is compared with its counterpart paygrade group in 1999, more members in each 1999 paygrade group than in the corresponding 1992 paygrade group were *very satisfied/satisfied* with job security. The differences in member satisfaction with job security ranged from 20.6% higher in 1999 than in 1992 for warrant officers to 40.6% higher in 1999 than in 1992 for the E4 paygrade group.
 - All paygrade groups. In the 1992 data, there were no differences among very satisfied/satisfied responses for job security across all paygrade groups. However, when all paygrade groups are compared in the 1999 data, proportionately more members in paygrade groups E7-E9 (76.4%) than members in all other paygrade groups were very satisfied/satisfied with job security.

- Enlisted paygrade groups. When only the enlisted paygrade groups are compared, for both the 1992 and 1999 data, proportionately more members in paygrade group E7-E9 were *very satisfied/satisfied* with job security (51.5% and 76.4%, respectively) than were members in the other enlisted paygrade groups.
- Officer paygrade groups. In 1992, proportionately more members in paygrade group O4-O6 than in paygrade group O1-O3 were *very satisfied/satisfied* with job security (45.6% vs. 42.4%). In 1999, this pattern of results was reversed; proportionately more members in paygrade group O1-O3 than in paygrade group O4-O6 were *very satisfied/satisfied* with job security (73.7% vs. 68.4%).

Table 3.32.
1992 ADS: Members By Paygrade Group Who Indicated Satisfaction With Components Of Military Life

Q136/137. Considering current policies, please indicate your level of satisfaction/dissatisfaction with each issue.

This table shows the percentage of respondents who said they were very satisfied/satisfied with these components of military life.

Summary

Chapter 3 describes members' overall satisfaction with the military life and members' satisfaction with 37 components of military life. Overall, more members indicated they were very satisfied/satisfied (49.5%) with the military way of life than said they were dissatisfied/very dissatisfied (28.2%) with the military way of life. The analyses found no association of Service, gender, and race/ethnicity with differences in overall satisfaction with the military way of life. There were, however, differences in the proportion of members indicating that they were very satisfied/satisfied related to paygrade and family type. Among officers, proportionately more members of paygrade group O4-O6 (72.4%) indicated they were very satisfied/satisfied with military life than did members of paygrade group O1-O3 (60.2%), and among the enlisted, proportionately more members of paygrade group E7-E9 (68.1%) said they were very satisfied/satisfied with military life than did the other enlisted paygrade groups. Proportionately fewer unmarried members without children (40.8%) said they were very satisfied/satisfied with military life than did members in all other family types.

When asked about 37 different components of military life, those for which the highest percentages of members reported that they were *very satisfied/satisfied* were job security (71.6%), dental care for the service member (61.8%), and schools for members' children (54.5% of members with children). Overall, the components for which the lowest percentages of members reported that they were *very satisfied/satisfied* were cost of living adjustments (COLA) to retirement pay (12.8%) and retirement pay (18.1%). One notable finding was that proportionately more members indicated that they were *very satisfied/satisfied* with medical care for themselves (52.1%) than with medical care for their families (39.5%) and with dental care for themselves (61.8%) compared to dental care for their families (35.6%).

The analyses revealed Service differences in the proportion of members indicating they were *very satisfied/satisfied* with several of the 37 components. Notable among these were that proportionately more Marine Corps and Coast Guard members than members of other Services indicated that they were *very satisfied/satisfied* with unit morale (Marine Corps, 37.1%, and Coast Guard, 36.4% compared with Army, 28.4%, Air Force, 31.3%, and Navy, 30%) and pace of promotions (Marine Corps, 39%, and Coast Guard, 43.0%, compared with Army, 35.2%, Air Force, 27.7%, and Navy, 31.4%), while proportionately more Air Force (39%) and Coast Guard members (37.4%) than those of other Services indicated that they were *very satisfied/satisfied* with the availability of personal/family time (compared with Army, 28.4%, Navy, 31.1%, and Marine Corps, 29.1%). In addition, proportionately more Air Force members (45.8%) said they were *very satisfied/satisfied* with military family support programs than did members in the other Services (compared with Army, 37.5%, Navy, 36.9%, Marine Corps, 37.8%, and Coast Guard, 24.9%).

Paygrade comparisons in the proportion of members indicating that they were *very satisfied/satisfied* showed, as might be expected, that for many of the components, especially financial components, proportionately more officers indicated that they were *very satisfied/satisfied* than did enlisted members. These components included basic pay, special and incentive pay and housing allowance.

Gender differences in the levels of members reporting that they were *very* satisfied/satisfied were found for many of the 37 components of military life. Proportionately more female members than male members indicated that they were *very satisfied/satisfied* for 14 of the 37 components of military life. Notable among these gender-related differences were differences in satisfaction with family medical care (52.5% vs.37.7%); family dental care (46.6% vs. 34.2%), co-location with military spouse (59.7% vs. 47.3%); and SEPRATS/COMRATS, subsistence allowance (35.6% vs. 25.9%). Conversely, proportionately more males than females said they were *very satisfied/satisfied* with three of the components: quality of leadership (38.3% vs. 34.9%), unit morale (31.3% vs. 27.5%), and deployments (31.5% vs. 26.6%).

Few racial/ethnic differences in the proportions of members reporting they were *very satisfied/satisfied* with the 37 different components of military life were found. Proportionately more African American members than members of the other racial/ethnic groups reported that they were *very satisfied/satisfied* with schools for their children (60.1%), spouse employment and career opportunities (37.7%), and youth activities on base (47.6%). Proportionately more White members than members of other racial/ethnic groups reported that they were *very satisfied/satisfied* with the type of assignments received (53.3%).

Comparisons by family type revealed that there were few differences between members with children for all spouse types and members without children for all spouse types. There was one notable exception. Proportionately more members without children than members with children indicated that they were *very satisfied/satisfied* with the reenlistment bonus or continuation pay programs, with the exception of members married to Reserve Component members. ¹³

Comparisons by spouse employment status revealed that proportionately more members with spouses in the Armed Forces than members with spouses employed in civilian jobs or out of the work force said they were *very satisfied/satisfied* with family medical benefits, housing allowances, and military family support programs. Proportionately more members with spouses employed in civilian jobs or with spouses voluntarily out of the work force than members with spouses in other employment status groups indicated they were *very satisfied/satisfied* with the types of assignments they received.

In 1992, a higher percentage of members of the O1-O3 paygrade group were *very satisfied/satisfied* with the frequency of PCS moves than in 1999, while a higher percentage of the members of the E5-E6 and E7-E9 paygrade group were *very satisfied/satisfied* with the frequency of PCS moves in 1999 than in 1992. There were no differences among the officer paygrade groups in 1992 in satisfaction with the frequency of PCS moves, but proportionately more O4-O6 than O1-O3 officers in 1999 were *very satisfied/satisfied* with the frequency of PCS moves. Among the enlisted paygrade groups, in both 1992 and 1999, proportionately more members in the E7-E9 paygrade group than in other enlisted paygrade groups were *very satisfied/satisfied* with frequency of PCS moves (44.7% and 49.8% for 1992 and 1999, respectively).

When each 1992 paygrade group is compared to its corresponding paygrade group in 1999, all paygrade groups in 1999 revealed a higher percentage of members who were *very satisfied/satisfied* with training (except the warrant officer and E5-E6 paygrade groups which had similar percentages of members satisfied with training). Patterns of responses were similar in both years. In both 1992 and in 1999, there were no differences between officer paygrade groups for satisfaction with training and among enlisted paygrade groups, proportionately more members in the E7-E9 paygrade group than in other enlisted paygrade groups were *very satisfied/satisfied* with training each year (50.6% and 56.1% for 1992 and 1999, respectively)

All paygrade groups in 1999 revealed a higher percentage of members who were *very satisfied/satisfied* with job security than did their corresponding paygrade groups in 1992. Patterns of responses varied in 1992 and 1999 for officers. In 1992, proportionately more members of the O4-O6 paygrade group than members of the O1-O3 paygrade group were *very satisfied/satisfied* with job security while in 1999, proportionately fewer members of the O4-O6 paygrade group than members of the O1-O3 paygrade group were *very satisfied/satisfied* with job security. Among enlisted paygrade groups, each year proportionately more members in the E7-E9 paygrade group than in other enlisted paygrade groups were *very satisfied/satisfied* with job security (51.5% and 76.4% for 1992 and 1999, respectively).

58

¹³ Members married to Reserve Component members were not included in the comparisons because of potentially unstable estimates resulting from small cell sizes.

Chapter 4: Retention

This chapter describes members' responses concerning their intent to remain in the military. The first section explores members' stated retention intention. This section is followed by an exploration of members' perception of their spouse or girlfriend/boyfriend support for retention. The third section of the chapter describes the active steps toward leaving the military that the members reported taking. ¹⁴ The final section of this chapter summarizes the important findings for each section.

Stated Retention Intention

Question 32 asked members about their intent to remain in the military.

Suppose that you have to decide whether to stay on active duty. Assuming you could stay, how likely is it that you would choose to do so?

- Very likely
- Likely
- Neither likely nor unlikely
- Unlikely
- Very unlikely

For the purpose of this report, the five response categories were collapsed into three categories: *very likely/likely, neither likely nor unlikely,* and *unlikely/very unlikely.* Complete tables supporting the figures and analysis reported here appear in Appendix D of this document and in Gaines et al. (2000a).

In general, proportionately more members indicated that they were *very likely/likely* to stay in the military if able (51.1%) than said they were *unlikely/very unlikely* to stay (34.7%) (Table 32.1, Gaines et al., 2000a).

Figure 4.1 shows the percentage of members of each Service who said they were *very likely/likely* to remain in the military if that option were available. Proportionately fewer Marine Corps members (42.3%) than members of the other Services indicated they were *very likely/likely* to stay in the military. Among DoD Services, proportionately more Air Force members (56.6%) than those of other Services said they would be *very likely/likely* to stay.

¹⁴ An understanding of each Service's unique structure and demographic and career characteristics must be considered when comparing survey responses between Services (see Table 2.1, Table B-2, and Table B-3).

¹⁵ All differences reported are statistically significant.

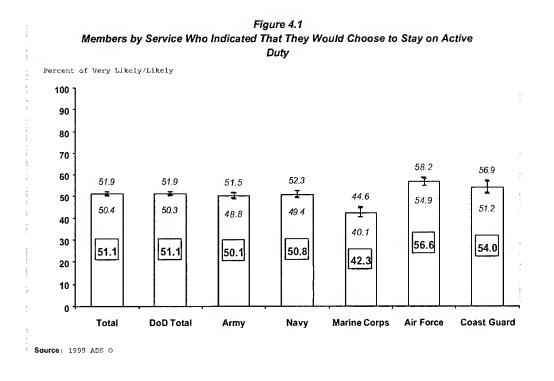

Figure 4.2 compares responses concerning retention intention across paygrades. Overall, proportionately fewer members in paygrades E1-E3 and E4 responded that they were *very likely/likely* to stay in the military (28.5% and 35.5%, respectively) than did members of the other paygrade groups. A larger proportion of paygrade group O4-O6 (72.5%) than any other paygrade group said they were *very likely/likely* to stay on active duty. Among officers, paygrade group O1-O3 had a smaller proportion of members than paygrade group O4-O6 responding *very likely/likely* concerning their retention intention (54.0% vs. 72.5%).

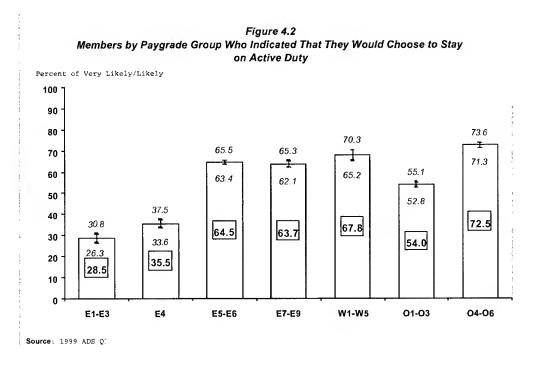

Figure 4.3 compares responses concerning retention intention for males and females. As shown, proportionately more males than females responded that they were *very likely/likely* to stay in the military (51.6% vs. 48.6%).

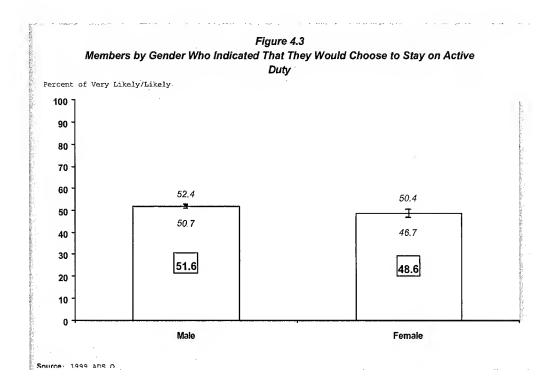

Figure 4.4 shows retention intention differences among racial/ethnic groups. Overall, proportionately more African American members indicated they were *very likely/likely* to stay in the military (59.0%) than did all other racial/ethnic groups. There were no differences among the racial/ethnic groups in the reporting of positive retention intentions other than that reported for African Americans.

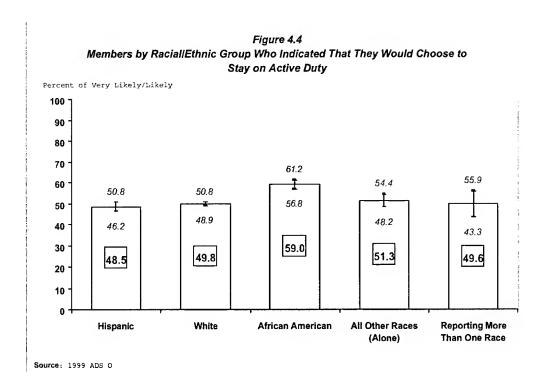

Figure 4.5 shows retention intention differences by family type. Overall, within each family type a greater proportion of members with children responded that they were *very likely/likely* to stay in the military than did members with the same spouse characteristics but without children. Across all family types, proportionately more active-duty members who have children and are married to Reserve Component members stated they were *very likely/likely* to stay in the military (70.8%), than did active-duty members with other family types. Active-duty members who have children and are married to civilian spouses had the second highest percentage of *very likely/likely* responses (62.4%). Proportionately fewer unmarried members with no children responded *very likely/likely* (35.2%) than did members with other family types.

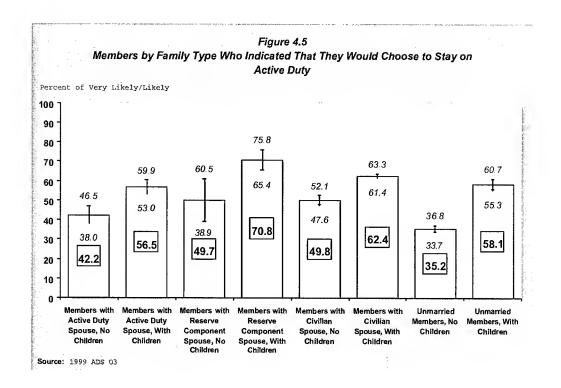

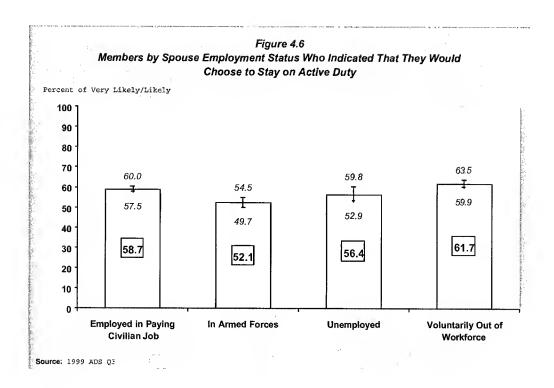

Figure 4.6 compares responses on retention intention in relation to spouse employment status. As presented, spouse employment status was not found to be associated with differences in retention intention.

Spouse or Girlfriend/Boyfriend Support for Retention

Question 34 asked members about the support for staying in the military offered by their spouses or boyfriends/girlfriends.

Does your spouse, girlfriend, or boyfriend think you should stay on or leave active duty?

- Strongly favors staying
- Somewhat favors staying
- Has no opinion one way or the other
- Somewhat favors leaving
- Strongly favors leaving
- Does not apply, I don't have a spouse or girlfriend/boyfriend

For this report, the first five response categories were collapsed into three eategories: strongly/somewhat favors staying, no opinion, and somewhat/strongly favors leaving. Respondents indicating that the question did not apply to them were excluded from the analyses. Appendix D and Gaines et al. (2000a) contain detailed tables that support the figures and analysis presented here.

In general, proportionately more members indicated their spouse or girlfriend/boyfriend strongly/somewhat favors staying (44.7%) on active duty than said their spouse or girlfriend/boyfriend somewhat/strongly favors leaving (39.4%) active duty (Figure 4.7).

Figure 4.7 presents the percentage of members by Service who said their spouse or girlfriend/boyfriend *strongly/somewhat favors* their staying on active duty. As shown on the figure, proportionately more members of the Air Force (48.9%) than members of other DoD Services indicated that their spouses or significant others supported their continued service. Proportionately fewer Marine Corps members (37.1%) than those of other Services said they had the support of their spouses or significant others for continued military service. One possible explanation for this finding is that a smaller proportion of Marine Corps members are married than are members of other Services (see Appendix B, Table B.5).

64

¹⁶ Tables in Appendix D and in Gaines et al. (2000a) present all response options for Question 39 including *does not apply*. Therefore, the percentage estimates in the supporting tables will vary from those presented in the analytical tables in this chapter for variables where the *does not apply* response option was excluded from the analyses.

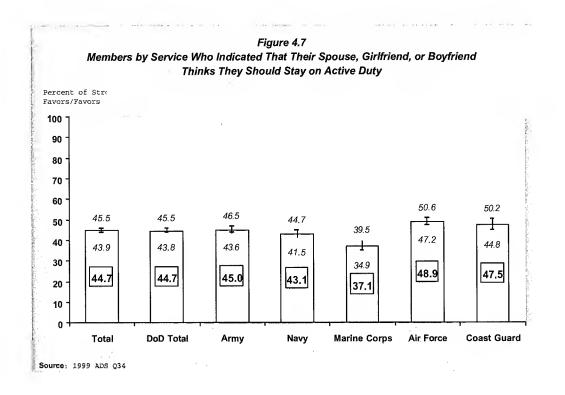

Figure 4.8 compares responses concerning spouse or girlfriend/boyfriend support for retention by paygrade. In general, retention support increases as members achieve higher rank within the enlisted and officer paygrade groups. Proportionately fewer members in paygrade group E1-E3 (23.3%) perceived favorable support than did members in paygrade E4 (30.7%). Proportionately more enlisted personnel in paygrades E5-E6 (55.7%) and E7-E9 (56.6%) believed they had favorable support than did the two lowest enlisted paygrade groups. Among officers, proportionately more of the O4-O6 paygrade group (58.1%) perceived favorable support for staying in than did the O1-O3 paygrade group (43.2%).

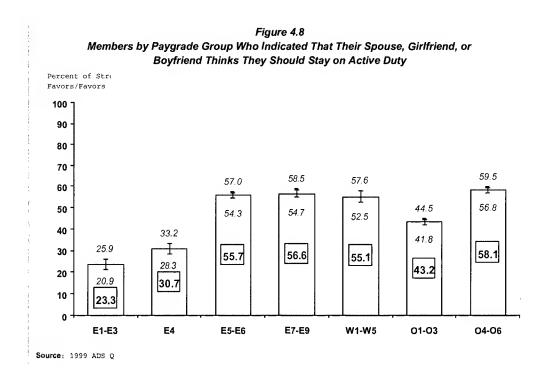

Figure 4.9 illustrates the differences in perceived spouse or girlfriend/boyfriend support for retention for male and female members. Proportionately more males (45.4%) perceived favorable support for staying on active duty by a spouse or girlfriend/boyfriend than did female members (40.5%).

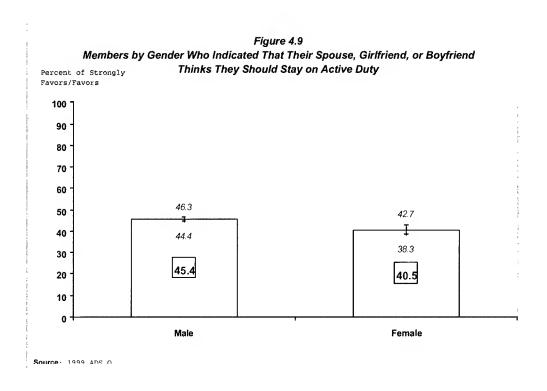

Figure 4.10 indicates that proportionately more African Americans (52.1%) perceived spouse or girlfriend/boyfriend support for retention than did all other racial/ethnic groups except those Reporting More Than One Race.

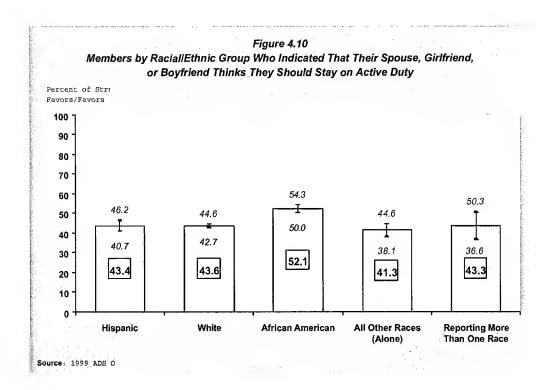

Figure 4.11 presents perceived spouse or girlfriend/boyfriend support for retention by family type. As previously shown for retention intention, support for retention also differs between families that do or do not have children. Within each family type, a larger percentage of members with children perceived that their spouse or girlfriend/boyfriend *strongly/somewhat* favors staying than did members who did not have children. Proportionately fewer unmarried members without children (20.6%), indicated they had perceived support for staying on active duty than did members in all the other types of families.

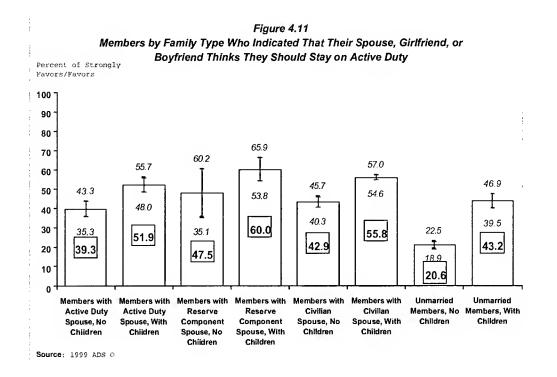

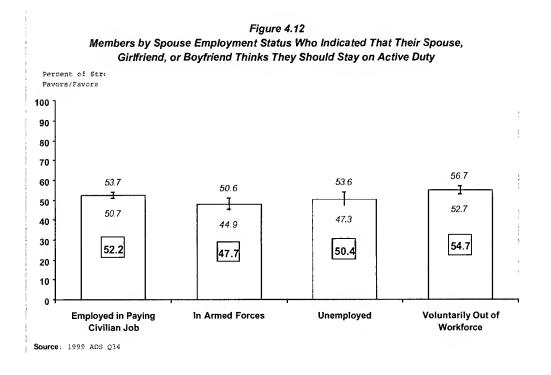

Figure 4.12 shows there is no relationship between perceived spouse or girlfriend/boyfriend support for retention and spouse employment status.

Members' Active Steps to Leaving the Military

As another measure to gauge retention intent, Question 48 asked members about steps they may have taken to explore the possibility of leaving active duty:

During the past 6 months, have you done any of the following to explore the possibility of leaving the military. (MARK ALL THAT APPLY.)

- Thought seriously about leaving the military
- Wondered what life might be like as a civilian
- Discussed leaving and/or civilian opportunities with family members or friends
- Talked about leaving with your immediate supervisor
- Gathered information on education programs or colleges
- Gathered information about civilian job options (e.g., read newspaper ads, attended a job fair)
- Attended a program that helps people prepare for civilian employment
- Prepared a resume
- Applied for a job
- Interviewed for a job
- None of the above

Because they were instructed to mark all responses that applied to them, percentages reported in Tables 4.1 through 4.6 do not sum to 100%.

Overall, only 13.4% of members had not taken any of the actions listed in the question that dealt with the possibility of leaving the military. Proportionately more members indicated that they had discussed leaving the military or civilian opportunities with family and friends (64.0%) than had taken any other type of action. The actions that the next highest proportion of members reported taking were thinking seriously about leaving (58.5%) and wondering what civilian life might be like (57.0%). Approximately one-half (49.8%) of all members reported they had gathered information about civilian job options. Proportionately fewer members reported taking more active steps related to leaving. These more active steps included preparing a resume (21.3%), attending programs that prepare for civilian employment (10.4%), applying for a job (9.0%), and interviewing for a job (5.9%). In general, the proportion of members who had taken each step toward leaving decreased as the activity level of the step increased (Table 4.1).

Service Comparisons

Table 4.1 shows the percentage of members from each Service indicating they had taken actions to explore the option of leaving the military. Proportionately fewer Air Force members (34.5%) than members of all other Services responded that they had gathered information on education programs or colleges. Among DoD Services, a smaller proportion of Air Force members (53.8%) said they had thought seriously about leaving the military than did members of all other DoD Services.

Table 4.1.

Actions Taken During Past 6 Months To Explore The Possibility Of Leaving The Military, Members By Service

Q48. During the past 6 months, have you done any of the following to explore the possibility of leaving the military? (MARK ALL THAT APPLY.)

		Ï		DoD			
	Total	Total	Army	Navy	Marine Corps	Air Force	Coast Guard
Thought seriously about leaving the military	58.5	58.6	60.7	59.4	60.5	53.8	57.8
	(57.7, 59.4)	(57.7, 59.4)	(59.5, 62.0)	(57.7, 61.1)	(58.5, 62.5)	(52.2, 55.3)	(54.8, 60.7)

None of the above	13.4	13.4	13.0	12.7	12.4	15.1	11.1
	(12.8, 14.0)	(12.8, 14.1)	(12.2, 14.0)	(11.6, 14.0)	(10.9, 14.2)	(14.0, 16.3)	(9.4, 13.1)

Paygrade Comparisons

Table 4.2 compares responses about steps taken toward leaving the military by paygrade groups. Overall, among enlisted paygrade groups, the proportion of members who gathered information about civilian job options increased as paygrade increased and ranged from 34.0% of paygrade group E1-E3 to 58.1% of paygrade group E7-E9. Similarly among enlisted members, as paygrade increased, the proportion of members reporting that they had attended programs that help prepare for civilian employment or had prepared resumes also increased. Other notable findings include:

• E1-E3 Paygrade Group. Proportionately fewer members in paygrade group E1-E3 discussed leaving and/or civilian opportunities with family or friends (52.6%), talked about leaving with an immediate supervisor (19.1%), gathered information about civilian job options (34.0%), attended a program that helps prepare for civilian employment (3.3%), and prepared a resume (9.0%) than did members of all other paygrade groups.

• E4 Paygrade Group.

- Proportionately more members in paygrade group E4 thought seriously about leaving the military (68.3%), gathered information on education programs or colleges (51.4%), and talked about leaving with an immediate supervisor (36.2%) than did members of all other paygrade groups.
- Among enlisted paygrade groups, proportionately more members in paygrade group E4 wondered what life might be like as a civilian (59.6%) and discussed leaving and civilian opportunities with family or friends (71.0%) than did members of other enlisted paygrade groups.
- A smaller proportion of the E4 paygrade group (9.4%) than any other paygrade groups stated they had not taken any of the listed actions within the past 6 months.
- W1-W5 Paygrade Group. Proportionately fewer members in paygrade group W1-W5 (53.0%) had wondered about civilian life than had the two paygrade groups of commissioned officers.
- O1-O3 Paygrade Group. Proportionately more members in paygrade group O1-O3 than O4-O6 stated they had wondered about civilian life (62.5% vs. 59.1%) and gathered information on education programs or colleges (30.7% vs. 19.6%).
- **O4-O6 Paygrade Group.** Proportionately more members in paygrade group O4-O6 than members in paygrade group O1-O3 had talked about leaving with an immediate supervisor (25.1% vs. 22.2%), attended a program that helps prepare for civilian employment (12.1% vs. 8.4%), applied for a job (8.0% vs. 6.0%) and interviewed for a job (7.0% vs. 4.7%).

Table 4.2.

Actions Taken During Past 6 Mouths To Explore The Possibility Of Leaving The Military, Members By Paygrade

Q48. During the past 6 months, have you done any of the following to explore the possibility of leaving the military? (MARK ALL THAT APPLY.)

		Enli	isted		Warrant Officers	Offi	cers

None of the above	16.4	9.4	13.8	13.0	13.6	14.8	14.9
	(14.5, 18.5)	(8.3, 10.6)	(12.9, 14.8)	(11.7, 14.1)	(11.8, 15.6)	(13.9, 15.9)	(13.9, 16.0)

Gender Comparisons

Table 4.3 compares responses from male and female members concerning steps they had taken toward leaving the military. Notable differences include:

• Males.

- Proportionately more males than females wondered what life might be like as a civilian (57.5% vs. 53.6%), discussed leaving and/or civilian opportunities with family and friends (64.5% vs. 60.7%), and gathered information about civilian job options (51.5% vs. 40.1%).

- Proportionately more males than females took the following active steps to explore the possibility of leaving: prepared a resume (22.2% vs. 15.8%), applied for a job (9.6% vs. 5.9%), and interviewed for a job (6.3% vs. 3.6%).

• Females.

- Proportionately more females than males had gathered information on education programs or colleges (43.1% vs. 39.4%), and indicated they had not taken any of the listed actions to explore leaving the military (15.4% vs. 13.0%).

Table 4.3.

Actions Taken During Past 6 Months To Explore The Possibility Of Leaving The Military, Members By Gender

Q48. During the past 6 months, have you done any of the f (MARK ALL THAT APPLY.)	ollowing to explore the possibility of l	eaving the military?
	Male	Female
Thought seriously about leaving the military	58.7	57.5
	(57.7, 59.7)	(55.8, 59.2)

Thought seriously about leaving the military	58.7	57.5
	(57.7, 59.7)	(55.8, 59.2)
Wondered what life might be like as a civilian	57.5	53.6
	(56.7, 58.4)	(51.7, 55.5)
Discussed leaving and/or civilian opportunities with family members or	64.5	60.7
friends	(63.7, 65.4)	(58.9, 62.4)
Talked about leaving with your immediate supervisor	27.8	26.9
	(27.0, 28.5)	(25.4, 28.4)
Gathered information on education programs or colleges	39.4	43.1
	(38.6, 40.3)	(41.0, 45.2)
Gathered information about civilian job options	51.5	40.1
	(50.7, 52.3)	(38.4, 41.9)
Attended a program that helps prepare for civilian employment	10.5	9.8
	(10.0, 11.0)	(8.7, 10.9)
Prepared a resume	22.2	15.8
	(21.6, 22.9)	(14.6, 17.0)
Applied for a job	9.6	5.9
	(9.1, 10.1)	(4.7, 7.5)
Interviewed for a job	6.3	3.6
	(5.9, 6.7)	(2.8, 4.5)
None of the above	13.0	15.4
	(12.4, 13.7)	(14.1, 16.9)

Race/Ethnicity Comparisons

Table 4.4 shows that there are no differences among the racial/ethnic groups in actions taken to explore leaving the military.

Table 4.4.

Actions Taken During Past 6 Months To Explore The Possibility Of Leaving The Military, Members By Racial/Ethnic Group

Q48. During the past 6 months, have you done any of the following to explore the possibility of leaving the military? (MARK ALL THAT APPLY.)

		Not Hispanic				
	Hispanic	White	Black/African American	All Other Races (Alone)	Reporting More Than One Race

	(11.5, 14.9)	(13.0, 14.5)	(10.9, 13.6)	(11.3, 15.2)	(8.9, 18.2)	

Family Type Comparisons

Table 4.5 displays members' reports concerning actions taken toward leaving the military by family type. Notable differences include:

- Unmarried Members, with Children. Proportionately more unmarried members with children than unmarried members without children indicated they had talked with a supervisor about leaving (31.1% vs. 26.0%), attended programs to prepare for civilian employment (13.0% vs. 8.1%), and applied for a job (11.6% vs. 7.6%).
- Unmarried Members, No Children. Proportionately more unmarried members without children (58.5%) wondered what civilian life might be like than did unmarried members with children (53.1%). Proportionately more unmarried members without children (47.1%) gathered information on education programs or colleges than did unmarried members with children (41.5%).
- Members with Active Duty Spouses, with Children and Unmarried Members, with Children. Proportionately more members with active-duty spouses with children and unmarried members with children interviewed for a job (6.2% and 7.6%, respectively) than did their counterparts without children.
- Members with Civilian Spouses, with Children and Unmarried Members, with Children. Proportionately more members with civilian spouses with children and unmarried members with children gathered information about civilian job options (56.5% and 51.1%, respectively) and prepared a resume (25.0% and 24.5%, respectively) than did their counterparts without children.

Table 4.5.

Actions Taken During Past 6 Months To Explore The Possibility Of Leaving The Military, Members By Family Type

Q48. During the past 6 months, have you done any of the following to explore the possibility of leaving the military? (MARK ALL THAT APPLY.)

	Members with Active Duty Spouse		Members with Reserve Component Spouse		Members with Civilian Spouse		Unmarried Members	
	No	With	No	With	No	With	No	With
	Children	Children	Children	Children	Children	Children	Children	Children
Thought seriously about leaving the military	59.4	61.7	60.3	53.4	59.8	57.5	59.0	59.9
	(54.6, 64.0)	(58.1, 65.1)	(46.6, 72.5)	(47.5, 59.2)	(57.3, 62.2)	(56.4, 58.5)	(57.1, 60.8)	(57.1, 62.7)
Wondered what life might be like as a civilian	58.7	58.9	48.7	56.9	57.7	56.1	58.5	53.1

Spouse Employment Comparisons

Table 4.6 shows responses concerning actions taken toward leaving the military by spouse employment status. In general, only two differences by employment status were observed.

- **Members with Spouses in the Armed Forces.** Proportionately fewer members with spouses employed in the Armed Forces (47.2%) had gathered information about civilian job options than had members with spouses in the three other employment status groups.
- Members with Spouses Voluntarily Out of the Work Force. Proportionately fewer members with spouses voluntarily out of the work force (32.3%) had gathered information on education programs or colleges than had members with spouses in other employment status groups.

Table 4.6.

Actions Taken During Past 6 Months To Explore The Possibility Of Leaving The Military, Members By Spouse Employment

Q48.	During the past 6 months, have you done any of the following to explore the possibility of leaving the military?
	(MARK ALL THAT APPLY.)

	Employed in Paying Civilian Job	In Armed Forces	Unemployed	Voluntarily Out of Work Force

Summary

This chapter presents findings for members' stated retention intention, perceived support for retention from their spouses (girlfriend/boyfriend), and actions in exploring the possibility of leaving the military.

A majority of members (51.1%) indicated that they were *very likely/likely* to stay in the military if given the choice. Similarly, nearly half (44.7%) of members perceived that their spouse (girlfriend/boyfriend) supported their continued service. Retention intention and perceived spouse or girlfriend/boyfriend support for retention both varied by Service, paygrade group, gender, and family type.

Overall, more Air Force and Coast Guard members than other members indicated they perceived that their spouse (girlfriend/boyfriend) supported their continued service (48.9% and 47.5%, respectively) and more Air Force members than other members indicated they were *very likely/likely* to stay in the military (56.6%). Conversely, fewer Marine Corps members than other members said they were *very likely/likely* to stay (42.3%) or perceived that their spouse (girlfriend/boyfriend) supported their continued service (37.1%).

The lowest proportions of members indicating they would be *very likely/likely* to stay or who believed that their spouse or girlfriend/boyfriend supported their continued service were found in the lower paygrade groups. Among paygrade group E1-E3, 28.5% indicated they would be *very likely/likely* to remain in the military and 23.3% indicated that their spouse or girlfriend/boyfriend supported their continued service. Among paygrade group E4, 35.5% indicated they would be *very likely/likely* to remain in the military and 30.7% indicated that their spouse or girlfriend/boyfriend supported their continued service. For both indicators of retention intention, more males than females responded positively as did more members with children.

Members were also asked if they had taken any of several steps associated with exploring the possibility of leaving the military. These activities ranged from thinking or talking about leaving and/or gathering information on civilian career options, to preparing a resume or interviewing for a civilian job. As one might expect, more members had discussed leaving the military and/or civilian opportunities with family and friends (64.0%) than had prepared a resume (21.3%), applied for a job (9.0%), or interviewed for a job (5.9%). These analyses indicate that the proportion of members taking each of the steps in exploring alternative career options decreased as the effort level required for each activity increased.

The analysis also indicated that proportionately more males than females took most of these steps. Relative differences by gender were largest for activities including preparing a resume (22.2% vs. 15.8% for males vs. females), applying for a job (9.6% vs. 5.9%), and interviewing for a job (6.3% vs. 3.6%).

Chapter 5: Financial Position of Service Members

This chapter describes members' responses concerning their financial position. The first section examines military members' total monthly gross household income. The second section explores members' total level of personal unsecured debt. The third section presents a comparison among members' level of savings. The fourth and fifth sections assess types of financial support from government programs received by members and financial problems experienced by members. The sixth section of this chapter presents a comparison of the 1999 and 1992 survey data for member use of three financial support programs. The final section of this chapter summarizes the important findings for each section.

Members' Total Monthly Gross Household Income

Question 88 assessed members' total income from all sources.

What is your <u>total</u> monthly gross (before-tax) household income from <u>all sources</u>? (Please include your military earning, your earnings from a second job, your spouse's earnings, and income or financial support from any other source.)

- \$1-1,000
- \$1,001-2,000
- \$2,001-3,000
- \$3,001-4,000
- \$4,001-5,000
- \$5,001-6,000
- \$6,001-7,000
- \$7,001-8,000
- \$8,001-9,000
- \$9,001-10,000
- \$10,001 and above

For the purposes of this report, responses were recoded to the category mean and the mean income for each group was used to compare responses. Responses in the \$10,001 and above category were set to \$10,000. Complete tables supporting the figures and analysis reported here appear in Appendix E of this document and in Gaines et al. (2000b).

Overall, the mean monthly gross household income indicated by all members was \$3,309. Figure 5.1 shows members' mean monthly gross household income differences by Service. Among the Services, Air Force and Coast Guard members had the highest average monthly gross household incomes (\$3,575 and \$3,641, respectively) while Marine Corps members had the lowest average monthly gross household income (\$2,698). 17

One possible explanation for this difference in income is the distribution of paygrades within each Service. The Marine Corps has a higher proportion of members in paygrade groups

¹⁷ All differences reported are statistically significant.

E1-E4 (36% E1-E3 and 20% E4) and a smaller proportion of officers (10%) than any other Service while the Air Force and the Coast Guard have smaller proportions of members in paygrade groups E1-E4 (18% E1-E3 and 18% E4 in the Air Force and 14% E1-E3 and 21% E4 in the Coast Guard) and larger proportions of officers (20% and 16%, respectively) than other Services.

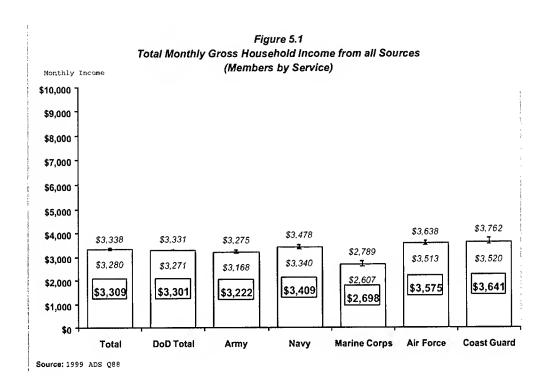

Figure 5.2 compares members' mean monthly gross household income across paygrade groups. As expected, within both enlisted and officer paygrade groups, as the paygrade increased, the total monthly gross household income from all sources increased. Average monthly gross household income ranged from \$1,964 for the E1-E3 paygrade group to \$6,737 for the O4-O6 paygrade group.

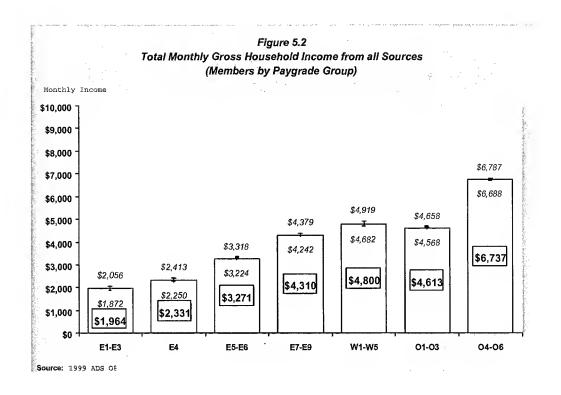

Figure 5.3 compares mean monthly gross household income for male and female members. As shown, females indicated they had a higher average monthly gross household income than did males (\$3,500 vs. \$3,277), although the difference was less than \$300.

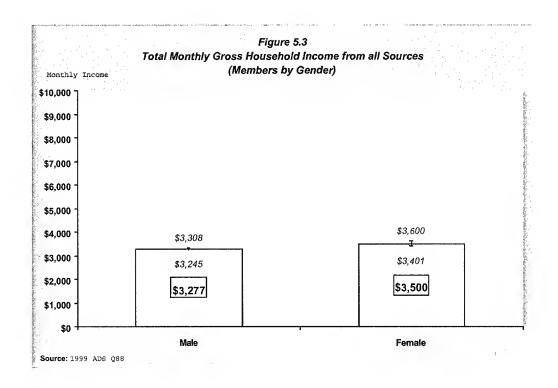

Figure 5.4 shows the differences between mean monthly gross household income among racial/ethnic groups. Overall, White members had a higher monthly gross household income (\$3,466) than did other racial/ethnic groups, although the difference between White and African American member groups was less than \$200. African American members had a higher monthly gross household income (\$3,298) than the following racial/ethnic groups: All Other Races (Alone), Reporting More Than One Race, and Hispanic.

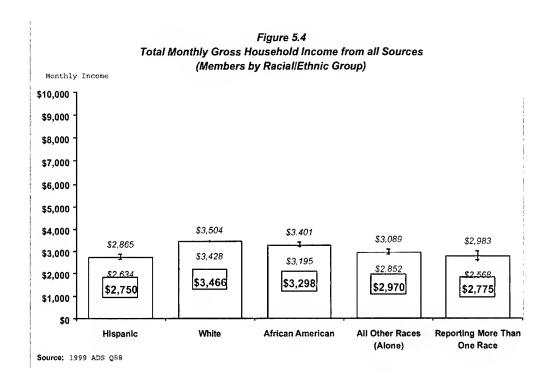

Figure 5.5 shows the differences between mean total monthly gross household income by family type. Overall, proportionately more members with active-duty spouses and with children and unmarried members with children stated higher monthly gross household incomes (\$4,716 and \$3,042, respectively) than did members with the same spouse characteristic but with no children. Unmarried members with no children had lower monthly gross household income (\$2,272) than did all other family types. ¹⁸

¹⁸ Difference in average monthly gross household income for members with and without children could be, at least in part, the result of differences in housing allowance and dependent pay for those with and without children.

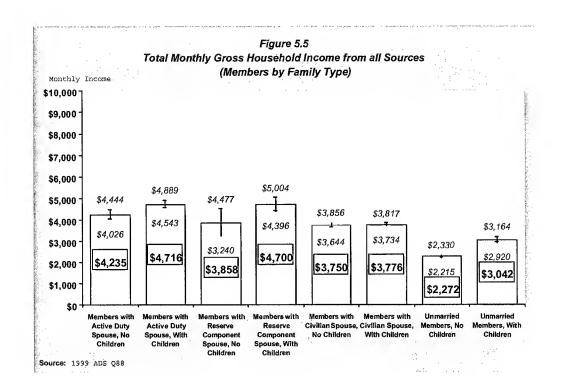

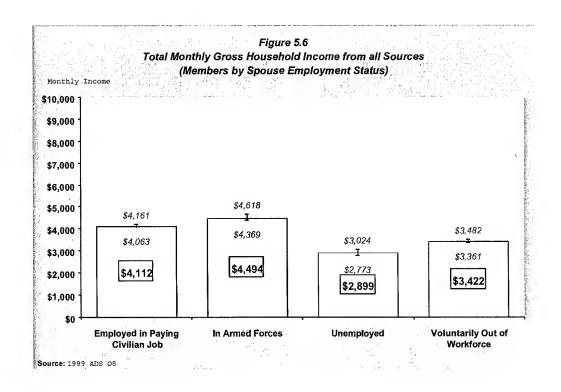

Figure 5.6 compares mean total monthly gross household income by spouse employment status. Members with spouses in the Armed Forces had a higher monthly gross household income (\$4,494) than did members with spouses in all other employment status groups. As would be expected, members with unemployed spouses had a lower monthly gross income (\$2,899) than did members with spouses in all other employment status groups.

Members' Total Level of Personal Unsecured Debt

Question 94 asked members to assess their total level of personal unseeured debt.

After the last payment was made on personal unsecured debt, what was the total amount you (and your sponse) still owed? (<u>Include</u> all credit cards, debt consolidation loans, AAFES loans, NEXCOM loans, student loans, and other personal loans; <u>exclude</u> home mortgage and car loans).

- · \$0
- \$1-1,000
- \$1,001-2,500
- \$2,501-5,000
- \$5,001-7,500
- \$7,501-10,000
- \$10,001-12,500
- \$12,501-15,000
- \$15,001-17,500
- \$17,501-20,000
- \$20,001 and above

For the purposes of this report, responses were recoded to the category mean and the mean personal unsecured debt for each group was used to compare responses. Responses in the \$20,001 and above category were set to \$20,000. Complete tables supporting the figures and analysis reported here appear in Appendix E of this document and in Gaines et al. (2000b).

Overall, the mean personal unsecured debt for all members was \$5,288 (Figure 5.7). Figure 5.7 shows differences in members' mean total personal unsecured debt by Service. As shown, Marine Corps members had the lowest average personal unsecured debt (\$4,111) among the Services. One possible contributing factor for this finding is the proportion of unmarried members without children for each Service. The Marine Corps has the largest proportion of unmarried members without children (45%) of all of the Services. Figure 5.11 shows that unmarried members without children have the lowest debt of any family type.

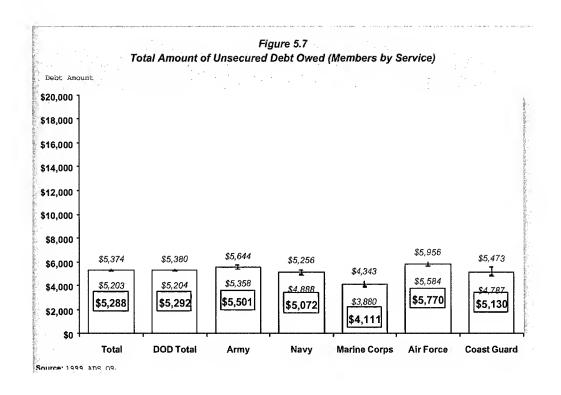

Figure 5.8 compares members' mean total personal unsecured debt across paygrade groups. Among enlisted paygrade groups, as the paygrade increased the total amount of unsecured personal debt also increased. Conversely, among the officer paygrade groups, as the paygrade increased, the level of debt decreased. The E7-E9 and W1-W5 paygrade groups had higher levels of personal unsecured debt (\$7,518 and \$7,594, respectively) than did all other paygrade groups. Paygrade group E1-E3 had a lower level of personal unsecured debt (\$2,159) than did all other paygrade groups. Among officers, the O1-O3 paygrade group indicated a higher average personal unsecured debt (\$6,825) than did the O4-O6 paygrade group (\$5,272).

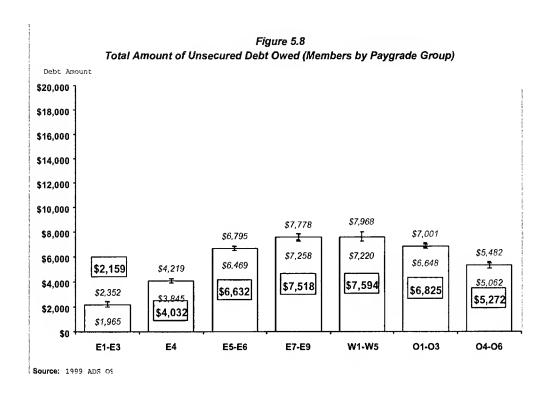

Figure 5.9 compares mean total personal unsecured debt for male and female members. As indicated, no association is shown for gender and personal unsecured debt.

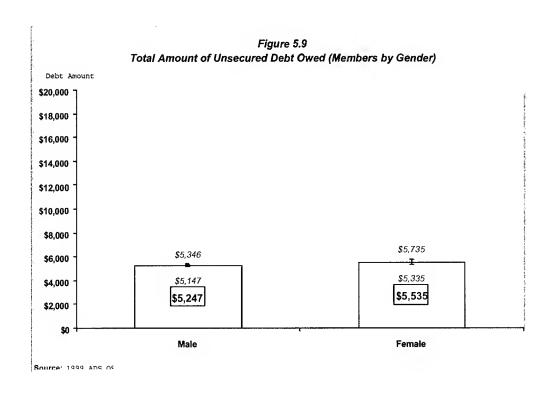

Figure 5.10 shows the differences for mean total personal unsecured debt among racial/ethnic groups. African American members had a higher, average personal unsecured debt (\$5,738) than did all other racial/ethnic groups, although the difference between African American members and White members was less than \$400. White members had a higher average of personal unsecured debt (\$5,364) than the following racial/ethnic groups: Hispanic, All Other Races (Alone), or Reporting More Than One Race.

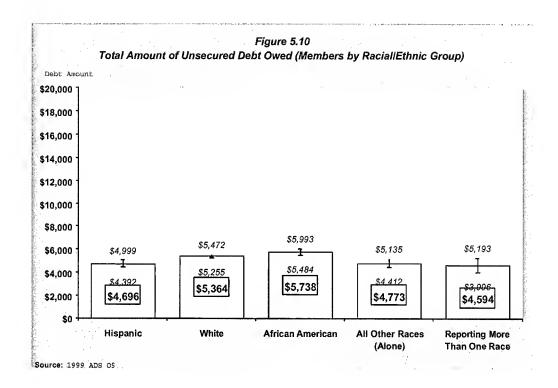

Figure 5.11 shows mean total personal unsecured debt differences by family type. Overall, within each family type except Reserve Component spouse, members with children had a higher level of unsecured personal debt than did members with the same spouse characteristic but with no children. Across spouse characteristics and child status, unmarried members with no children had a lower level of unsecured debt (\$2,799) than did members with all other family types.

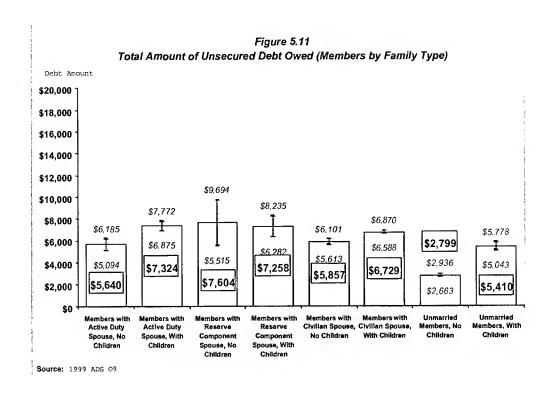

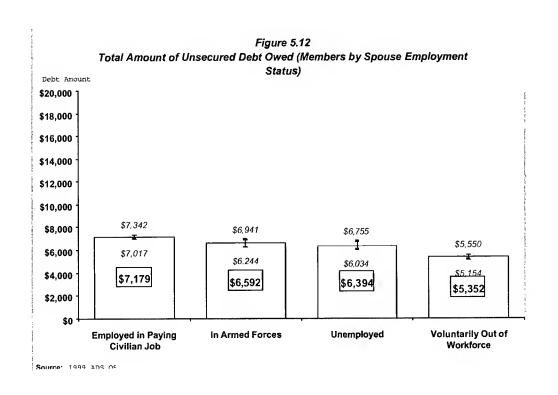

Figure 5.12 compares mean total personal unsecured debt by spouse employment status. Members with spouses employed in civilian jobs had a higher average personal unsecured debt (\$7,179) than did members with spouses in all other employment status groups. Members with spouses voluntarily out of the work force had a lower average personal unsecured debt (\$5,352) than did members with spouses in all other employment status groups.

Members' Total Level of Savings

Question 89 asked members to estimate their total amount of savings from all sources.

Roughly, what is the total amount of savings you (and your spouse) have? (Please include funds in bank accounts, IRAs, money market accounts, Certificates of Deposit (CDs), Savings Bonds, mutual funds, stocks and/or bonds.)

- \$0
- \$1-1,000
- \$1,001-2,500
- \$2,501-5,000
- \$5,001-7,500
- \$7,501-10,000
- \$10,001-12,500
- \$12,501-15,000
- \$15,001-17,500
- \$17,501-20,000
- \$20,001-50,000
- \$50,001-100,000
- \$100,001 and above

For the purposes of this report, each response was recoded to the mean of that response category and mean total savings for each group was used to compare responses. Responses in the \$100,001 and above category were set to \$100,000. Complete tables supporting the figures and analysis reported here appear in Appendix E of this document and in Gaines et al. (2000b).

Figure 5.13 shows mean total savings for all members by Service. Overall, the mean savings for members was \$11,043. Air Force and Coast Guard members had a higher level of savings (\$14,231 and \$13,317, respectively) than did members in all other Services, while Marine Corps members had a lower level of savings (\$7,181) than did members of all other Services. One possible explanation for this finding is the distribution of paygrades within the Services. The Air Force and Coast Guard each have a larger proportion of officers (20% and 16%, respectively) and a smaller proportion of members in paygrade groups E1-E4 (36% and 35%, respectively) than do other Services. In the Marine Corps, the converse is true. The Marine Corps has a larger proportion of members in paygrade groups E1-E4 (56%) and a smaller proportion of officers (10%) than do other Services. Therefore, income is lower for the Marine Corps (see figure 5.2) and savings would be expected to follow the same pattern.

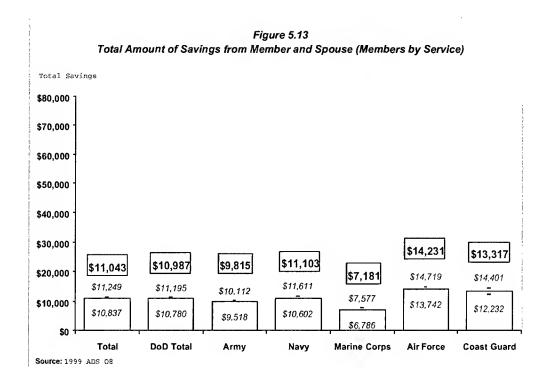

Figure 5.14 compares members' mean total savings across paygrade groups. As enlisted and officer paygrade groups increased, the total amount of savings also increased. The O4-O6 paygrade group had a higher level of savings (\$61,077) than did all other paygrade groups, while the E1-E3 and E4 paygrade groups had lower levels of savings (\$2,553 and \$2,575, respectively) than did all other paygrade groups. Among enlisted members, paygrade group E7-E9 had higher levels of saving (\$15,283) than did other enlisted paygrade groups.

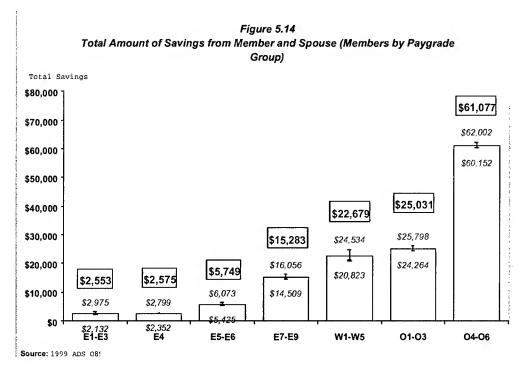

Figure 5.15 compares mean total savings for male and female members. As shown, males had a higher level of savings (\$11,193) than did females (\$10,149).

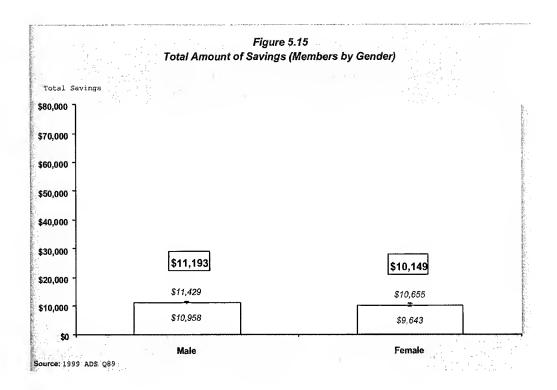

Figure 5.16 shows the differences in mean total savings among racial/ethnic groups. White members had a higher level of savings (\$13,658) than did members in all other racial/ethnic groups.

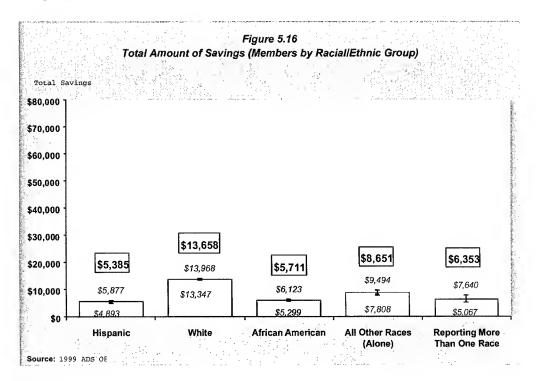

Figure 5.17 shows mean total savings differences by family type. Within each family type, there were no differences in level of savings for members with children than for members with the same spouse characteristics and no children. Across spouse characteristics and child status, unmarried members with no children and unmarried members with children had lower levels of savings (\$6,792 and \$5,761, respectively) than did members with all other family types.

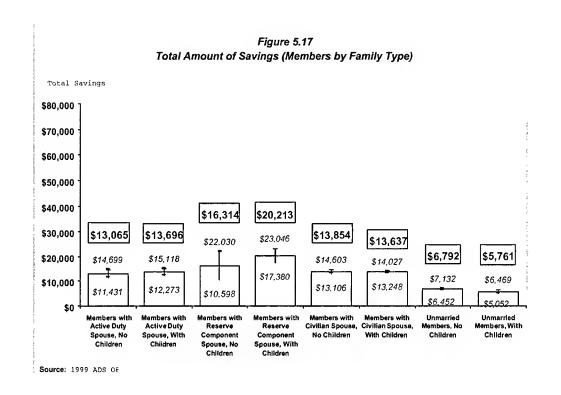

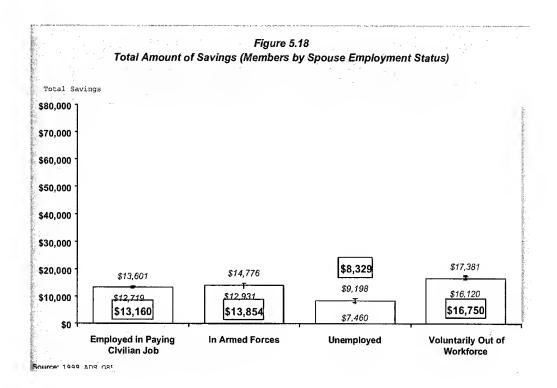

Figure 5.18 shows mean total savings by spouse employment status. Members with spouses voluntarily out of the work force showed a higher level of savings (\$16,750) than did members with spouses in all other employment status groups. Members with unemployed spouses had a lower level of savings (\$8,329) than did members with spouses in all other employment status groups.

Members Receiving Financial Support from Government Programs

Question 87 asked members whether they had used any of 12 listed government financial support programs during the last year.

During the <u>past 12 months</u>, did you (and your spouse) receive any income or financial support from the following sources? (MARK ALL THAT APPLY.)

- A second job
- Alimony
- Child support
- Supplemental Security Income (SSI)
- Unemployment or Worker's compensation
- State-funded childcare assistance
- Women, Infants, and Children (WIC)
- Food Stamp Program
- Head Start Program
- Aid to Families with Dependent Children (AFDC)
- Medicaid
- Other (specify)

For the purposes of this report, the use of the following five government financial resources by members were evaluated: Supplemental Security Income (SSI); Special Supplemental Nutrition Program for Women, Infants, and Children (WIC); Food Stamp Program; Aid to Families with Dependent Children (AFDC); and Medicaid. Complete tables supporting the analysis reported here appear in Appendix E of this document and in Gaines et al. (2000b).

Nine percent (9.0%) of members overall received financial assistance from WIC. This percentage was higher than the percentage of members who received assistance from the other four government programs evaluated (Table 5.1). Table 5.1 shows the percentage of members in each Service who indicated they had received financial support from any of the five government sources. Cell sizes for most Services were too small to facilitate a comparison among the Services for financial support to members from the Food Stamp Program, AFDC, or Medicaid. There were no differences among the Services with regard to receiving support through SSI.

Table 5.1.
Income Or Financial Support Received During The Past 12 Months, Members By Service

Q87.	During the past 12 months, did you (and your spouse) receive any income or financial support from the	following
	sources? (MARK ALL THAT APPLY.)	

		D_0D					
	Total	Total	Army	Navy	Marine Corps	Air Foree	Coast Guard
Supplemental Security Income	0.6	0.6	0.8	0.7*	0.7*	NR	NR
(SSI)	(0.5, 0.8)	(0.5, 0.8)	(0.6, 1.1)	(0.5, 1.1)	(0.4, 1.2)	6)	(,)
Women, Infants, and Children	9.0	9.0	10.5	8.4	9.1	7.7	7.3
(WIC)	(8.5, 9.5)	(8.6, 9.5)	(9.7, 11.3)	(7.5, 9.4)	(8.0, 10.5)	(6.9, 8.5)	(5.8, 9.1)
Food Stamp Program	1.0	1.0	1.6	NR	NR	NR	NR
	(0.9, 1.2)	(0.9, 1.2)	(1.3, 2.0)	6)	(,)	6)	6)
Aid to Families with	0.2*	0.2*	NR	NR	NR	NR	NR
Dependent Children (AFDC)	(0.1, 0.3)	(0.1, 0.3)	(,)	(,)	6)	(,)	(,)

	(0.5, 0.8)	(0.5, 0.8)	(0.4, 0.9)	(,)	6)	(,)	6)

Table 5.2 compares responses concerning member financial support from government resources across paygrade groups. A comparison of the receipt of financial support from WIC across paygrade groups for which data are available reveals that a higher percentage of paygrade groups E4 (14.1%) and E5-E6 (12.8%) received support from WIC than did members in other paygrade groups. Cell sizes for most paygrade groups were too small to facilitate a comparison among these groups for the other four government support programs.

Table 5.2.

	6)	(0.7, 1.4)	(0.4, 0.7)	6)	(,)	6)	6)

Table 5.3 compares responses concerning member financial support from government resources for males and females. Proportionately more male members (9.4%) indicated they (and their spouses) received support from WIC than did female members (6.4%). The female cell sizes for the other financial support sources were too small to allow for further comparisons.

Table 5.3.

Income Or Financial Support Received During The Past 12 Months, Members By Gender

Q87. During the past 12 months, did you (and your spouse) receive any income or financial support from the following sources? (MARK ALL THAT APPLY.)

	Male	Female
Supplemental Security Income (SSI)	0.7	NR
	(0.6, 0.8)	6)
Women, Infants, and Children (WIC)	9.4	6.4
	(8.9, 10.0)	(5.4, 7.5)
Food Stamp Program	1.1	NR
	(1.0, 1.3)	6)
Aid to Families with Dependent Children (AFDC)	0.2*	NR
	(0.1, 0.3)	6)
Medicaid	0.7	NR
	(0.5, 0.9)	(,)

Table 5.4 compares responses concerning member financial support from government sources among racial/ethnic groups. Notable differences included:

- White. A comparison of Hispanic, White, and African American racial/ethnic groups revealed that a lower percentage of White members (0.7%) than Hispanic members (2.1%) or African American members (1.4%) used the Food Stamp Program. (The estimates for Hispanics and African Americans used in this comparison may be unstable.)
- African American. A comparison of White and African American groups revealed that a higher percentage of African American members (1.3%) used Medicaid than did White members (0.4%), although the estimate for African Americans members may be unstable.

Table 5.4.

Income Or Financial Support Received During The Past 12 Months, Members By Racial/Ethnic Group

Q87.	During the past 12 months, did you (and your spouse) receive any income or financial support from the following
	sources? (MARK ALL THAT APPLY.)

		Not Hispanic						
	Hispanic	White	Black/African American	All Other Races (Alone)	Reporting More Than One Race

Table 5.5 shows differences in members' use of government financial support programs by family type. Because data were not reported for a number of cells due to small cell sizes, comparisons could not be made for most of the financial support sources. However, a higher percentage of members with civilian spouses and with children (18.3%) used the WIC resource than did members with civilian spouses and no children (2.6%, though this estimate may be unstable).

Table 5.5.
Income Or Financial Support Received During The Past 12 Months, Members By Family Type

Q87. During the past 12 months, did you (and your spouse) receive any income or financial support from the following sources? (MARK ALL THAT APPLY.)

	Du	Members with Active Duty Spouse		Members with Reserve Component Spouse		Members with Civilian Spouse		Unmarried Members	
	No Children	With Children	No Children	With Children	No Children	With Children	No Children	With Children

Table 5.6 compares responses on members' use of different types of government financial support by spouse employment status. Notable differences were:

- Members with Spouses in the Armed Forces. A lower percentage of members with spouses in the Armed Forces (4.4%) used WIC than did members with spouses in other employment status groups.
- Members with Unemployed Spouses and Members with Spouses Voluntarily out of the Work Force. A higher percentage of members with unemployed spouses and with spouses voluntarily out of the work force used the WIC resource (23.8% and 22.4%, respectively) than did members with spouses in other employment status groups.

Table 5.6.
Income Or Financial Support Received During The Past 12 Months, Members By Spouse Employment Status

Q87. During the past 12 months, did you (and your spouse) receive any income or financial support from the following sources? (MARK ALL THAT APPLY.)

Financial Problems Experienced by Members

Question 96 assessed whether members had experienced financial difficulties over the previous year by asking them to select from a list of possible situations.

In the <u>past 12 months</u>, did any of the following happen to you (and your spouse)? (MARK ALL THAT APPLY.)

- Bonnced two or more checks
- Received a letter of indebtedness (e.g., a letter from a lender to your commanding officer that payment is late)
- Had your wages garnished
- Fell behind in paying your rent or mortgage
- Fell behind in paying your credit card, AAFES, or NEXCOM account
- Was pressured to pay bills by stores, creditors, or bill collectors
- Had a bill collector contact your unit leader
- Pawned or sold valuables to make ends meet
- Borrowed money from friends or relatives to help you with a financial difficulty
- Borrowed money through an Emergency Loan Assistance Program or a Service Aid Society
- Had your utilities (telephone, cable, water, heat, or electricity) shut off
- Had a car, household appliances, or furniture repossessed
- Was unable to afford needed medical care
- Went bankrupt (declared personal bankruptcy)
- None of the above

Complete tables supporting the analysis reported here appear in Appendix E of this document and in Gaines et al. (2000b)

Overall, a higher percentage of members indicated they had not experienced any of the listed financial problems (60.6%) than indicated they had experienced any of the 14 financial problems (see Table 5.7). Among the 14 financial problems, overall, a higher percentage of members indicated they had borrowed money from friends or relatives to help with a financial difficulty (19.2%) or had fallen behind in paying a credit card, AAFES, or NEXCOM account (16.8%) than had experienced any of the other listed financial problems.

Table 5.7 compares members' responses by Service concerning their experience with the 14 financial problems during the past 12 months. Proportionately fewer Army (54.2%) and Marine Corps (54.3%) members than other members said they had not experienced any of the 14 financial problems, in other words, proportionately more Army and Marine Corps members than other members experienced at least one of these financial problems. Among DoD Services, a higher proportion of Air Force members (69.8%) than those of other Services said they had not experienced any of the 14 financial problems. Other notable Service-related differences were:

- Army. A higher percentage of Army members than those of other Services indicated they had bounced two or more checks (16.6%) and fell behind in paying their credit card, AAFES, or NEXCOM account (21.4%) within the past 12 months.
- Air Force. Among DoD Services, a smaller percentage of Air Force members than members of other Services said they had bounced two or more checks (9.7%), had their wages garnished (1.2%), fell behind in paying their rent or mortgage (2.0%), were pressured to pay bills by stores, creditors, or bill collectors (7.3%), or had a bill collector contact their unit leaders (0.8%, although this estimate may be unstable).
- Coast Guard. Proportionately fewer Coast Guard members than those of other Services indicated they had received a letter of indebtedness (2.5%) in the past 12 months. It should be noted that the Coast Guard estimate used for this comparison may be unstable.
- Army and Marine Corps. A higher proportion of Army members and Marine Corps members borrowed money from friends or relatives to help with a financial difficulty (21.9% and 23.9%, respectively) than did members in other Services. Proportionately more Army members and Marine Corps members said they had their utilities shut off in the past 12 months (8.9% and 9.9%, respectively) than did other Services' members.
- Air Force and Coast Guard. Proportionately fewer Air Force and Coast Guard members indicated they had pawned or sold valuables to make ends meet (4.0% and 3.5%, respectively) than did members of other Services. It should be noted this comparison was made with a Coast Guard estimate that may be unstable.

None of the above	60.6	60.4	54.2	62.6	54.3	69.8	66.6
	(59.8, 61.3)	(59.7, 61.2)	(53.0, 55.3)	(61.0, 64.1)	(51.4, 57.1)	(68.4, 71.1)	(63.7, 69.4)

Table 5.8 compares members' experience with 14 financial problems during the past 12 months across paygrade groups. As expected, proportionately more members in paygrade group O4-O6 (90.9%) than other paygrade groups said they had not experienced any of the 14 financial problems. Proportionately fewer members in paygrade groups E1-E3 and E4 (45.0% and 46.2%, respectively) than other paygrade groups said they had not experienced any of the 14 difficulties. In other words, proportionately more members in paygrade groups E1-E3 and E4 than other paygrade groups experienced at least one of these financial problems. A smaller proportion of the E7-E9 paygrade group than all other enlisted paygrade groups said they experienced the

following financial problems: bounced two or more checks (6.2%), received a letter of indebtedness (2.5%), had wages garnished (1.1%, although this estimate may be unstable), fell behind in paying credit card debt (9.6%), pressured to pay bills (6.2%), pawned or sold valuables (2.6%), borrowed money from friends or relatives (7.6%), or had utilities shut off (1.6%, although this estimate may be unstable). Other notable differences for the 14 financial problems were:

- E1-E3 Paygrade Group. Among paygrade groups for which data were available, a higher percentage of the E1-E3 paygrade group than other paygrade groups said they had their utilities shut off in the past 12 months (13.3%).
- **E4 Paygrade Group.** Proportionately more members in paygrade group E4 than other paygrade groups indicated they had fallen behind in paying their credit cards, AAFES, or NEXCOM accounts (24.8%).
- O1-O3 Paygrade Group. A lower proportion of the O1-O3 paygrade group said they had borrowed money through an Emergency Loan Assistance Program or Service Aid Society (0.4%) than did members of other paygrade groups, although this estimate may be unstable.
- **O4-O6 Paygrade Group.** Fewer members in paygrade group O4-O6 than other paygrade groups were pressured to pay bills by stores, creditors, or bill collectors (1.6%), borrowed money from friends or relatives to help with a financial difficulty (2.6%), or fell behind in paying a credit card, AAFES, or NEXCOM account (3.4%). Fewer members in paygrade group O4-O6 than other paygrade groups received a letter of indebtedness (0.5%), although this estimate may be unstable.
- **E1-E3 and E4 Paygrade Groups.** A higher proportion of the E1-E3 and E4 paygrade groups than members of other paygrade groups for which data were available said they experienced the following financial difficulties within the past 12 months:
 - Bounced two or more checks (19.1% and 19.9%, respectively);
 - Received a letter of indebtedness (10.6% and 11.5%, respectively);
 - Were pressured to pay bills by stores, creditors, or bill collectors (18.1% and 18.4%, respectively);
 - Borrowed money from friends or relatives to help with a financial difficulty (31.6% and 28.0%, respectively);
 - Had their wages garnished (4.5% and 4.3%, respectively);
 - Had a bill collector contact their unit leader (3.0% and 3.6%, respectively);
 - Pawned or sold valuables to make ends meet (9.6% and 10.5%, respectively); and
 - Borrowed money through an Emergency Loan Assistance Program or a Service Aid Society (6.9% and 7.2%, respectively).

- E7-E9 and O1-O3 Paygrade Groups. Among paygrade groups for which data were available, proportionately fewer members in the E7-E9 and O1-O3 paygrade groups said they had their utilities shut off (1.6% and 1.3%, respectively) than did members in other paygrade groups, although the estimate used for paygrade group E7-E9 may be unstable.
- W1-W5 and O1-O3 Paygrade Groups. For paygrade groups for which data were available, proportionately fewer members of the W1-W5 and O1-O3 paygrade groups said they fell behind in paying their rent or mortgage (1.3% and 1.0%, respectively) than did members in other paygrade groups, although the eell estimate used for paygrade group W1-W5 may be unstable.
- W1-W5 and O4-O6 Paygrade Groups. A smaller proportion of the W1-W5 and O4-O6 paygrade groups said they had bouneed two or more eheeks (3.2% and 2.5%, respectively) than did members in other paygrade groups.

Table 5.10 compares responses concerning the 14 financial problems across racial/ethnic groups. There were no differences across all racial/ethnic groups for the 14 problems. However, a higher percentage of White members and members of All Other Races (Alone) said they had not experienced any of the 14 listed financial problems (64.3% and 61.7%, respectively) than did members of all other racial/ethnic groups.

Table 5.11 compares experiences with specific financial problems by family type. Five differences were noted between unmarried members with children and other family types. Proportionately fewer unmarried members with children (49.7%) than all other family types said they had not experienced any of the financial difficulties. In other words, proportionately more unmarried members with children than members with other family types experienced at least one of the financial problems. Proportionately more unmarried members with children than members with other family types fell behind in paying their credit cards, AAFES, or NEXCOM accounts (23.5%) and borrowed money from friends or relatives to help with financial difficulties (26.2%). Proportionately more unmarried members with children than unmarried members without children also experienced falling behind in paying rent or mortgage (5.9% vs. 2.1%) and borrowing money through an Emergency Loan Assistance Program or a Service Aid Society (6.7% vs. 2.6%).

A lower percentage of members with unemployed spouses (45.7%) than members with spouses in other employment status groups said they had not experienced any of the financial problems. In other words, proportionately more members with unemployed spouses than other members experienced at least one of the financial problems. Other notable findings include:

- Members with Unemployed Spouses. A higher percentage of members with unemployed spouses than members with spouses in all other employment status groups said they had experienced the following financial problems:
 - Bounced two or more checks (20.7%);
 - Fell behind in paying their credit cards, AAFES, or NEXCOM accounts (24.9%);
 - Were pressured to pay bills by stores, creditors, or bill collectors (20.2%);
 - Borrowed money through an Emergency Loan Assistance Program or a Service Aid Society (11.3%);
 - Had their utilities shut off (10.8%);
 - Were unable to afford needed medical care (5.0%, although this estimate may be unstable);
 - Pawned or sold valuables to make ends mcct (15.1%); and
 - Borrowed money from friends and relatives to help with a financial difficulty (31.7%).
- Members with Spouses in Civilian Jobs and Members with Spouses in the Armed Forces. Proportionately fewer members with spouses in civilian jobs and members with spouses in the Armed Forces than members with spouses in other spouse employment status groups:
 - Pawned or sold valuables to make ends meet (5.0% and 4.6%, respectively); and
 - Borrowed money from friends or relatives to help with a financial difficulty (15.1% and 13.6%, respectively).

Comparison of Members' Receiving Financial Support from Government Programs in 1999 and 1992

This section compares the 1999 and 1992 member responses for survey questions dealing with member use of government financial support programs. For these comparisons, paygrades have been collapsed into the following groups for the two years: E1-E3, E4, E5-E6, E7-E9, W1-W5¹⁹, O1-O3, and O4-O6.

Member use of government financial support programs was assessed by Question 87 on the 1999 Survey of Active Duty Personnel, shown on page 93 of this chapter, which asked members whether they (or their spouses) had used any of 12 listed government financial programs during the past 12 months. Questions 117 on the 1992 Department of Defense Survey of Officers and 118 on the 1992 Department of Defense Survey of Enlisted Personnel, shown next, asked members whether they or their spouses had received income from any of five listed programs in the year prior to the survey.

During 1991, did <u>you or your spouse</u> receive any income from the following sources? Mark yes or no for each item.

- Alimony, child support or other regular contributions from persons not living in your household
- Supplemental Security Income
- Public Welfare or Assistance
- WIC (food program for women, infants, and children)
- Government Food Stamps

For the purposes of this report, three categories of financial assistance from each survey were used for comparison. They include:

- Supplemental Security Income (SSI) (Q87, 1999 survey, Q117, 1992 officer survey, and Q118, enlisted personnel survey);
- Women, Infants, and Children (WIC) (Q87, 1999 survey, Q117, 1992 officer survey, and Q118, enlisted personnel survey); and
- Government Food Stamps (Q87, 1999 survey, Q117, 1992 officer survey, and Q118, enlisted personnel survey).

¹⁹ Because there was no W5 rank in 1992, the 1992 data for warrant officers reflects the ranks W1-W4.

Table 5.13 shows the percentage of members in each paygrade group who used the three sources of financial assistance in 1992. Table 5.2, page 95, shows the same information for 1999. Differences in member use of the three financial assistance programs by paygrade in 1992 and 1999 include:

- Supplemental Security Income (SSI). In both 1992 and 1999, a higher percentage of E5-E6 and E7-E9 members said they received SSI than did all other paygrade groups (0.7% and .6% in 1992, respectively, and .9% and 1.1% in 1999, respectively; although the estimates for both the 1992 and 1999 E7-E9 cells may be unstable.) Further, because the cell size was less than 30 for the E1-E3, E4, O1-O3, and O4-O6 paygrade group cells for members in the 1999 survey who said they received SSI, comparisons between those paygrade groups and their 1992 counterparts were not conducted.
- Women, Infants, and Children (WIC). Among enlisted paygrade groups, a higher percentage of E1-E3, E4, and E5-E6 paygrade group members in the 1999 survey received WIC than did members in the corresponding paygrade groups in the 1992 survey. Because the cell size was less than 30 for the W1-W4, O1-O3, and O4-O6 paygrade group cells for members in the 1992 survey who said they received WIC, comparisons between those paygrade groups and their 1999 counterparts were not conducted.
- Government Food Stamps. Comparisons between all but two paygrade groups (E4, E5-E6) for members on the 1992 and 1999 surveys who said they used government food stamps could not be conducted due to cell sizes smaller than 30. Use of government food stamps was the same or similar in 1992 and 1999 for paygrade groups E4 and E5-E6.

Table 5.13.
1992 ADS: Income Received During 1991, Members By Paygrade Group

Summary

Chapter 5 presents comparisons of the financial positions of military members. Subgroup comparisons were made for the following indicators of financial position: total monthly gross income, total level of personal unsecured debt, total level of savings, receipt of financial support from five government resources, and experiences with 14 types of financial problems.

Overall, the mean monthly gross household income indicated by all members was \$3,309, their mean personal unsecured debt was \$5,288, and their overall mean savings level was \$11,043. Of the five government financial support programs evaluated (i.e., SSI, WIC, Food Stamp Program, AFDC, and Medicaid), proportionately more members received WIC (9.0%) than reported receiving the other programs. Finally, a higher percentage of members (60.6%) indicated that they had not experienced any of the listed financial problems than indicated they had experienced any of the problems.

Service comparisons revealed that Air Force and Coast Guard members indicated a higher mean level of gross monthly household income (\$3,575 and \$3,641, respectively) and a higher mean level of savings (\$14,231 and \$13,317, respectively) than did members from other Services. Marine Corps members indicated a lower mean level of personal, unsecured debt (\$4,111) and a lower mean level of savings (\$7,181) than did members of all other Services. A lower percentage of Army and Marine Corps members (54.2% and 54.3%, respectively) than those of the other Services said they had not experienced any of the 14 financial problems. Service differences in members' financial profiles may, at least in part, be explained by Service differences in paygrade distributions. The disproportionately high number of lower paygrades in the Marine Corps suppresses the mean for monthly gross household income and, in all likelihood, the mean for savings as well.

As would be expected, household income, unsecured personal debt, savings, and financial problems were related to paygrade groups. Paygrades O4-O6 had higher mean monthly gross incomes (\$6,737) and higher mean level of savings (\$61,077) than other paygrade groups. Paygrade group E1-E3 had a lower mean monthly gross household income (\$1,964), a lower mean level of unsecured personal debt (\$2,159), and along with the E4 paygrade group a lower mean level of savings (\$2,553 and \$2,575 for paygrade groups E1-E3 and E4, respectively) than all other paygrade groups. Proportionately more members in paygrade group O4-O6 (90.9%) and fewer members in paygrade groups E1-E3 and E4 (45.0% and 46.2%, respectively) said they had not experienced any of the suggested financial problems than did all other paygrade groups.

Females had a higher mean monthly gross household income (\$3,500) than did males (\$3,277) and they had a lower mean level of savings (\$10,149) than did males (\$11,193). Proportionately more males (61.0%) than females (57.9%) said they had not experienced any of the 14 financial problems.

Comparisons among the racial/ethnic groups revealed that White members had a higher mean monthly gross household income (\$3,466) than did other racial/ethnic groups, a higher mean level of unsecured personal debt (\$5,364) than did all racial/ethnic groups except African Americans (\$5,378), and a higher mean level of savings (\$13,658) than did all other racial/ethnic

groups. African American members had a higher mean monthly gross household income (\$3,298) than did all other racial/ethnic groups except Whites, and a higher level of mean unsecured personal debt (\$5,738) than did all other racial/ethnic groups. A higher percentage of White members and members who were classified as All Other Races (Alone) said they had not experienced any of the suggested financial problems (64.3% and 61.7%, respectively) than did members in other racial/ethnic groups.

Across family types, unmarried members without children had a lower mean monthly gross household income (\$2,272), a lower mean level of unsecured personal debt (\$2,799), and along with unmarried members with children, lower mean levels of savings (\$6,792 and \$5,761 for unmarried members without children and unmarried members with children, respectively) than did members of all other family types. Proportionately fewer unmarried members with children (49.7%) said they had not experienced any of the suggested financial problems than did members with all other family types.

Comparisons of financial position by spouse employment status, revealed that:

- As would be expected, members with spouses who were unemployed had a lower mean monthly gross household income (\$2,899) and a lower level of savings (\$8,329) than members in all other spouse employment status groups. Members with unemployed spouses were also the least likely spouse employment status group to report not having experienced any of the 14 listed financial problems.
- Members with spouses voluntarily out of the work force had a lower level of mean unsecured personal debt (\$5,352) and a higher mean level of savings (\$16,750) than did members in all other spouse employment status groups.
- Members married to Armed Forces spouses had higher mean monthly gross household incomes (\$4,494) than did members with spouses in other employment status groups.
- Members with spouses employed in paying civilian jobs had higher mean levels of personal unsecured debt (\$7,179) than did members with spouses in other employment status groups.

A comparison of member (and spouse) use of financial support programs among paygrade groups in the 1999 and 1992 member surveys revealed that proportionately more E1-E3, E4, and E5-E6 enlisted members in 1999 used WIC than did their counterparts in 1992.

Chapter 6: Personnel Tempo

This chapter presents members' responses to questions dealing with the personnel tempo within their units. The first two sections present findings on the time that members spent away from their permanent duty station over the past 12 months and time they expect to be away over the next 12 months. The third section summarizes the reasons for their being away from their permanent duty station. The fourth and fifth sections in this chapter present findings on members' workload and primary reasons for their having to work more hours than usual in the past year. The sixth section in this chapter compares the number of hours members worked per week in 1999 and in 1992. The final section of this chapter summarizes the important findings for each section. Detailed tables supporting the figures and analysis reported in this chapter appear in Appendix F of this document and in Gaines et al. (2000a).

Time Away From Permanent Duty Station Over the Last Year

Percentage Away From Permanent Duty Station

Question 14 asked members whether their military duties had taken them away from their permanent duty stations over the past year. The survey instrument defined "military duties" as deployments, TADs/TDYs, training, military education, time at sea, and field exercises/alerts.

In the <u>past 12 months</u>, have you been away from your permanent duty station overnight because of your military duties?

- Yes
- *No*

Figure 6.1 shows the overall percentages of members who indicated they spent time away from their permanent duty station by Service. In general, a majority of members (72.8%) spent time away from their duty station for military duties. Proportionately fewer Navy members (64.7%) performed military duties away from their duty station over the previous 12 months than did members of the Air Force (68.0%), Marine Corps (74.6%), Coast Guard (78.4%), and Army (81.1%). Among DoD Services, a higher proportion of Army members than other Service members (81.1%) were away from their duty station overnight because of military duties.

-

²⁰ All differences reported are statistically significant.

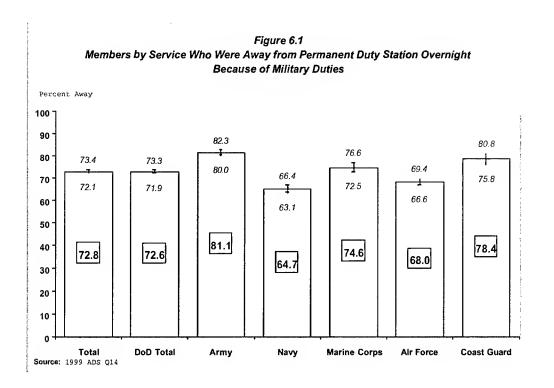

Figure 6.2 compares responses concerning personnel tempo by paygrade group. A distinct relationship can be seen between personnel tempo and rank. Among enlisted and officers paygrade groups, the percentage of members who spent time away from their permanent duty station increased as paygrade increased. A smaller proportion of the E1-E3 paygrade group than other paygrade groups indicated they had spent time away from their permanent duty stations for military duties (53.6%). Proportionately more members of the O4-O6 paygrade group (92.9%) than all other paygrade groups were away from their permanent duty stations overnight because of military duties.

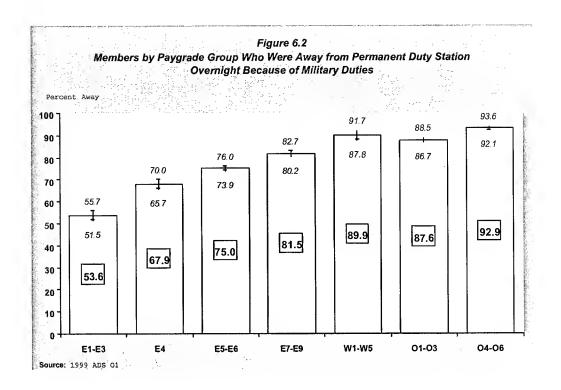

Figure 6.3 presents findings for personnel tempo by gender. Proportionately more male members (75.0%) had been away from their permanent duty station because of military duties within the past 12 months than had female members (59.3%). A potential reason that proportionately more males than females participated in personnel tempo type missions must be viewed in the context of Service manning policies. The majority of the units called upon to perform the missions associated with responses to the personnel tempo questions are closed to females. The <u>Direct Ground Combat Exclusion Policy</u> precludes the assignment of females to units which incur the largest amounts of tempo associated with joint training/field exercises, peacekeeping operations, et cetera. Analysis by gender should consider this limitation.

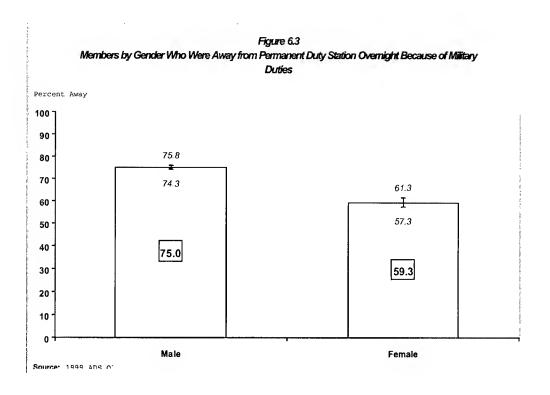

Figure 6.4 compares findings related to personnel tempo for the five racial/ethnic groups. Results indicate that proportionately more White members (76.1%) had been away from their permanent duty station performing military duties than had all other racial/ethnic groups.

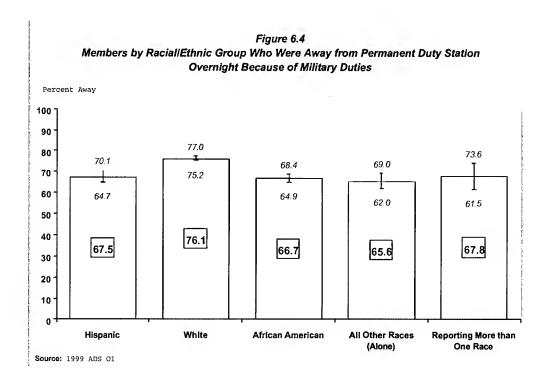

Figure 6.5 shows findings for personnel tempo by family type. As seen, family type is not related to differences in personnel tempo.

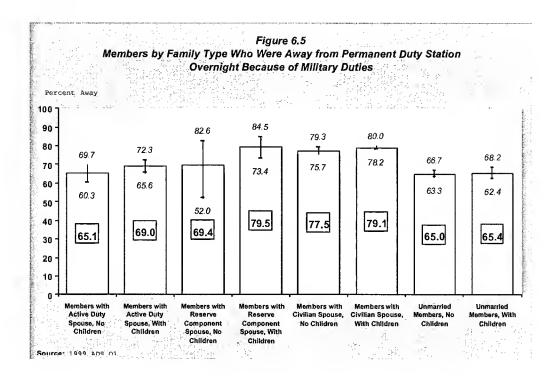

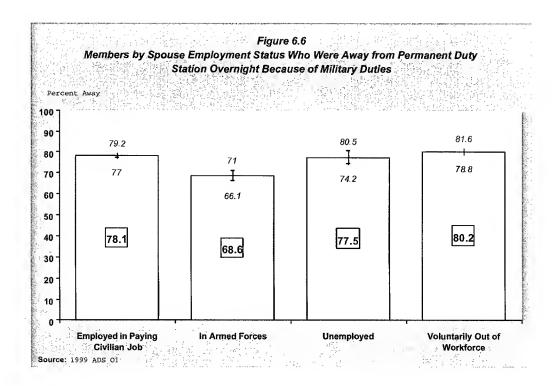

Figure 6.6 highlights the percentage of members who had been away from their permanent duty station in the past 12 months, by employment status of their spouse. Proportionately fewer members with spouses employed in the Armed Forces (68.6%) had spent time away on duty than had members with spouses in other employment status groups.

Length of Time Away From Permanent Duty Station

Question 17 asked members whose military duties had taken them away from their permanent duty station to state the total length of time they had been away in the last 12 months.

In the past 12 past months, what was the <u>total</u> length of time you were away from your permanent duty station because of your military duties? (ADD UP <u>ALL</u> NIGHTS AWAY FROM YOUR PERMANENT DUTY STATION.)

- Less than 1 month
- 1 month to less than 3 months
- 3 months to less than 5 months
- 5 months to less than 7 months
- 7 months to less than 10 months
- 10 months to 12 months

For purposes of this report, response categories were recoded to the mean with the first category (less than 1 month) set to .5. Respondents who, on Question 14, indicated they had not been away from their permanent duty station were set to zero for these analyses. Comparisons below are based on mean lengths of time.

Overall, members indicated that they spent about 2.4 months away from their permanent stations performing military duties. Figure 6.7 shows members' mean length of time away from their permanent duty station performing military duties by Service. Air Force members spent a shorter period (1.8 months) of time away from their permanent duty station than did members of all other Services.

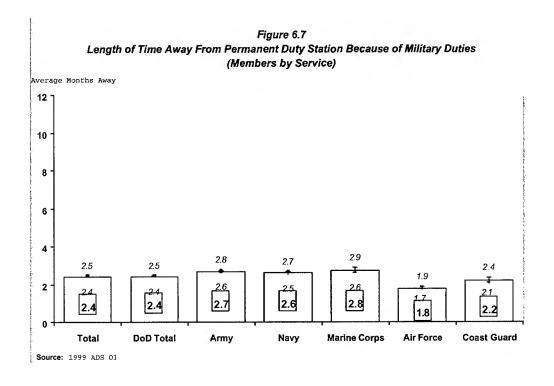

Figure 6.8 compares the time away by paygrade group. Members in the E1-E3 paygrade group spent a shorter average length of time (1.8 months) away from their permanent station than did all other paygrade groups. Members in the O1-O3 paygrade group spent a longer average period of time (2.8 months) away from their permanent duty station than did members in the O4-O6 paygrade group (2.2 months). However, warrant officers spent a longer average length of time (3.1 months) away performing military duties than did all other paygrade groups.

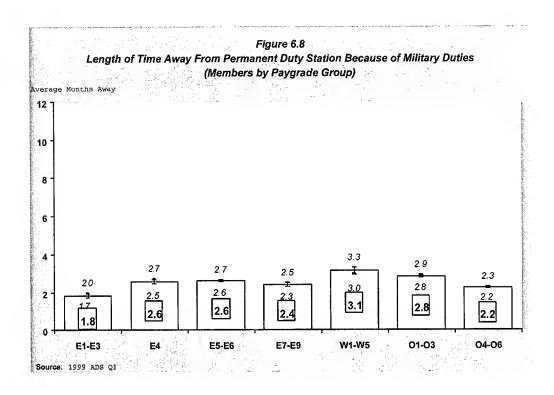

Figure 6.9 shows average length of time away among males and females. Male members spent a longer average period (2.6 months) away from their permanent duty station than did female members (1.5 months).

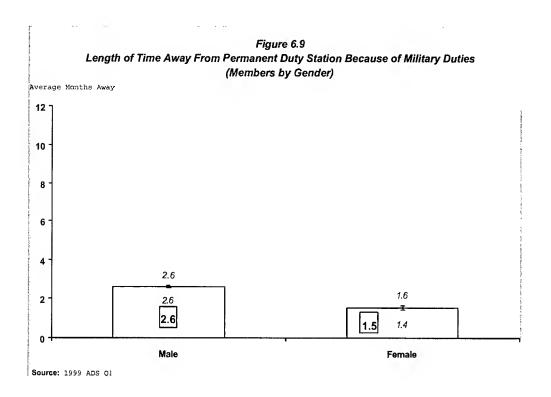

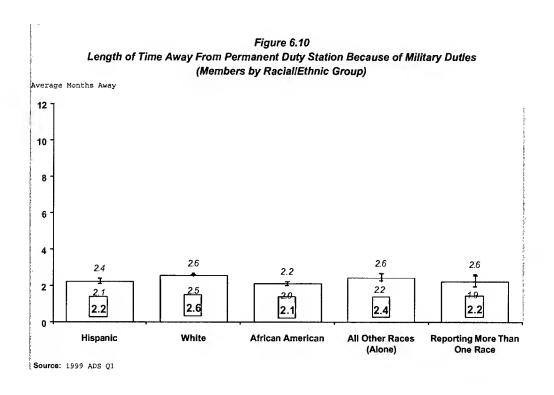

Figure 6.10 shows that differences in time that members spent away from their permanent duty station was not found to be associated with race/ethnicity.

Comparisons of time spent away from permanent duty stations by family type are displayed in Figure 6.11. There were no differences based on family type.

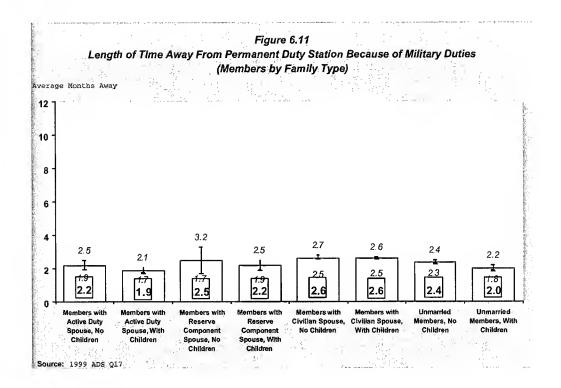

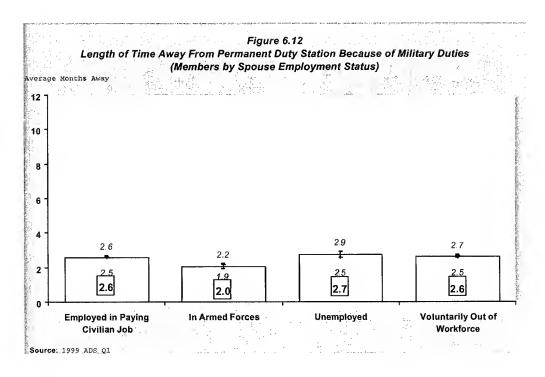

Figure 6.12 displays members' personnel tempo by spouse employment status. Members with spouses employed in the Armed Forces spent a shorter period of time away (2.0 months) from their permanent duty station than did members with spouses in other employment status groups.

Time Expected Away Over the Next Twelve Months

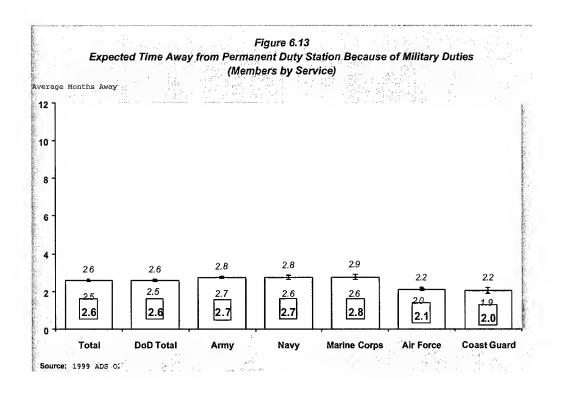

Question 21 asked members to also estimate, based on their remaining in the military, the time they expected to spend way from their permanent duty stations over the coming year.

Suppose you will be in the military for the <u>next 12 months</u>. What is the total length of time that you would <u>expect</u> to be away from your permanent duty station because of your military duties?

- I would not expect to be away from my permanent duty station in the next 12 months
- Less than 1 month
- 1 month to less than 3 months
- 3 months to less than 5 months
- 5 months to less than 7 months
- 7 months to less than 10 months
- 10 months to 12 months

As in the previous section, response categories were recoded to the mean and those who did not expect to be away were set to zero. Results are presented using mean lengths of time.

Figure 6.13 shows lengths of average expected time away from members' permanent duty station for each Service. Overall, members indicated that they expected to spend about 2.6 months in the next 12 months away from their permanent duty stations performing military duties. Air Force members expected to be away from their duty stations more in the future than in the past (see Figure 6.7), while the members in the other Services expected future personnel tempo to be similar to past personnel tempo. Army, Navy, and Marine Corps members expected they would spend a longer average period of time away from their duty stations in the upcoming year (2.7 months, 2.7 months, and 2.8 months, respectively) than did Air Force and Coast Guard members (2.1 months and 2.0 months, respectively).

Differences in members' expectations of upcoming personnel tempo by paygrade group are presented in Figure 6.14. A comparison of average past and expected personnel tempo revealed that members in the E1-E3 paygrade group expected to be away from their duty stations more in the future than they were in the past, while members in the O4-O6 paygrade group expected to be away from their duty stations less in the future than they were in the past. Expected personnel tempo was similar to past personnel tempo for members of all other paygrade groups. Officers in the O4-O6 paygrade group expected to be away from their permanent duty station for a shorter average period of time (2.0 months) than did members in all other paygrade groups. On the other hand, warrant officers expected to be away performing military duties for a longer mean time (3.1 months) than did members in all other paygrade groups.

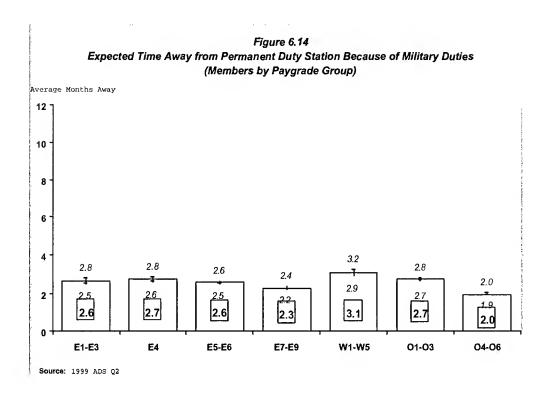

Figure 6.15 presents average expected personnel tempo among military members by gender. Although male members expected personnel tempo for future months to be similar to that of past months, female members expected an increased personnel tempo in the upcoming months from that experienced in the past. Males expected to be away from their permanent duty station more time in the upcoming year than did females (2.7 months vs. 1.8 months).

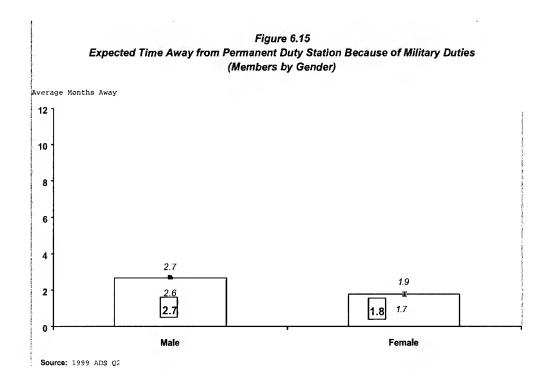

Figure 6.16 compares the average expected personnel tempo of members by race/ethnicity. No differences were observed among the racial/ethnic groups. A comparison of the differences between past personnel tempo and expected personnel tempo for each race/ethnicity group revealed that each group's past personnel tempo was similar to that group's expected future personnel tempo.

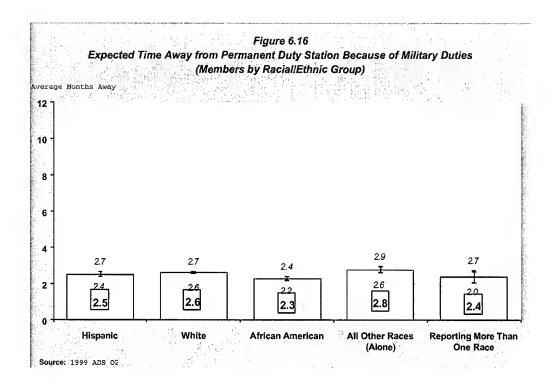

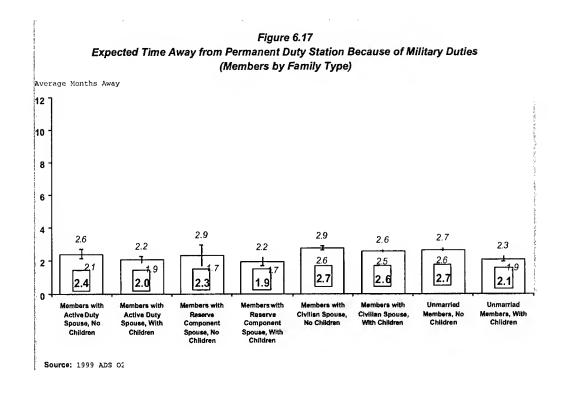

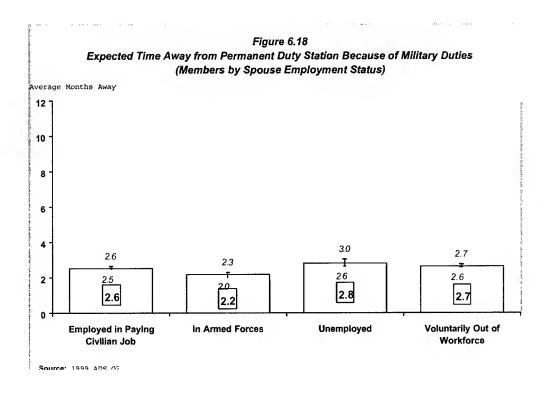

Figure 6.17 shows members' mean personnel tempo expectations by family type. A comparison of the differences between past personnel tempo and expected future personnel tempo for each family type revealed that, with one exception, each family type's past personnel tempo was similar to that family type's expected future personnel tempo. Unmarried members with no children expected an increased personnel tempo in the future over their past experiences. Of all members with children, those married to a civilian spouse expected their future average personnel tempo (2.6 months) to be higher than did all other family types with children. No other differences were noted.

Finally, Figure 6.18 presents findings for expected average personnel tempo by spouse employment status. Findings were similar to results observed in the previous personnel tempo section. Members with spouses in the military indicated that their future personnel tempo (2.2 average months) would be lower than that of members in the other spouse employment status groups.

Reasons for Being Away

Question 16 asked members who had been away from their permanent duty stations during the past year to indicate the types of military roles and missions in which they had participated while they were away and the time they spent in these activities.

During the past 12 months, how long were you away from your permanent duty station for military duties? (ADD UP <u>ALL</u> NIGHTS AWAY FROM YOUR PERMANENT DUTY STATION; ASSIGN EACH NIGHT TO ONLY ONE TYPE OF MILITARY DUTY.)

- A. Peacekeeping or other contingency operation
- B. Foreign humanitarian assistance mission
- C. Unit training at combat training centers
- D. Counter drug operation
- E. Domestic disaster or civil emergency
- F. Time at sea for scheduled deployments (other than for the above)
- G. Other time at sea (other than for the above)
- H. Joint training/field exercises/alerts (other than for the above)
- I. Military education (other than for the above)
- J. Other TADs/TDYs

For the purposes of this report, responses were recoded to *yes* and *no*. Members marking any time spent in an activity were coded *yes*. Percentages that appear in tables in this section indicate the percentage of all Service members who had participated in these types of roles and missions within the past 12 months including those who have not been away.

Table 6.1 shows the overall proportion of members who indicated they had served in the various roles and missions listed above while away from their permanent duty station, and these proportions by Service. Overall, at least 30% of members were involved with 4 of the 10 missions: other TADs/TDYs (40.1%), joint training/field exercises (35.2%), unit training at combat training centers (34.0%), and military education (30.0%). Fewer than 20% of all members indicated participating in each of the other six roles and missions. Notable differences in participation levels among the Services include:

- Army. Proportionately more members of the Army (50.9%) participated in joint training/field exercises within the past year than did other Service members. Among DoD Services, proportionately fewer Army members spent other time at sea (0.8%) than did members of other services. Proportionately more Army members than members of other DoD Services spent time away from their duty stations for military education (33.6%).
- Navy. As expected, proportionately more Navy members spent time at sea for scheduled deployments (31.7%) and other time at sea (25.9%) than did those of other Services. Among DoD Services, proportionately more Navy members than those of other Services were away from their permanent duty stations for counter drug operations (4.1%).

- Marine Corps. Among DoD Services, a smaller proportion of Marine Corps members than those of other Services spent time away from their permanent duty stations for peacekeeping or other contingency operations (11.1%).
- Air Force. Proportionately more Air Force members participated in peacekcoping operations (25.6%) than did members of all other Services. Among DoD Services, proportionately fewer Air Force members than those of other Services were away from their permanent duty stations to participate in unit training at combat training centers (20.7%) or joint training, field exercises, or alerts (21.7%).
- Coast Guard. Proportionately more Coast Guard members participated in missions involving other TADs/TDYs (51.6%), military education (44.9%), counter drug operations (20.5%), and domestic disaster or civil emergency relief (13.0%) than did other members of all other Services.
- **Army and Marine Corps.** Proportionately more Army (47.1%) and Marine Corps (47.8%) members participated in unit training at combat training centers than did those of other Services.
- Navy and Marine Corps. Proportionately fewer Navy (24.5%) and Marine Corps (27.1%) members participated in military education assignments than did other members.

g.	Other time at sea (other than for the above)	8.7 (8.3, 9.2)	8.5 (8.1, 9.0)	0.8 (0.6, 1.1)	25.9 (24.6, 27.3)	10.1 (8.7, 11.7)	NR (,)	16.9 <i>(14.4, 19.6)</i>
h.	Joint training/field exercises/alerts (other than for the above)	35.2 (34.4, 36.1)	35.6 (34.7, 36.4)	50.9 (49.3, 52.5)	25.3 (23.8, 27.0)	41.4 (39.0, 43.9)	21.7 (20.4, 23.1)	21.4 (19.0, 24.0)
i.	Military education (other than for the above)	30.0 (29.2, 30.7)	29.6 (28.9, 30.3)	33.6 (32.5, 34.8)	24.5 (23.0, 25.9)	27.1 (25.1, 29.2)	30.5 (29.3, 31.8)	44.9 (42.0, 47.8)
j.	Other TADs/TDYs	40.1 (39.3, 40.8)	39.8 (39.0, 40.6)	41.6 (40.4, 42.7)	31.7 (30.2, 33.2)	40.4 (38.1, 42.8)	45.3 (43.7, 46.9)	51.6 (48.3, 55.0)

Table 6.2 presents participation rates for duties away from permanent duty station by paygrade group. Notable differences include:

- E1-E3 Paygrade Group. A lower proportion of the E1-E3 paygrade group than members of any other paygrade groups were away from their permanent duty stations for a eounter drug operation (1.4%, although the estimate may be unstable), domestic disaster or civil emergency relief (3.0%), military education (12.7%) and other TADs or TDYs (17.1%). Proportionately fewer members of the E1-E3 paygrade group were assigned to peacekeeping duties (13.4%) than were other enlisted paygrade groups.
- **E4 Paygrade Group.** Proportionately fewer members of the E4 paygrade group than members of any other paygrade group except the E1-E3 paygrade group were away from their permanent duty stations for military education (21.6%) and other TADs or TDYs (25.8%). Among enlisted paygrade groups, a larger proportion of the E4 paygrade group than other paygrade groups participated in joint training/field exercises/alerts (40.7%).
- W1-W5 Paygrade Group. Proportionately more warrant officers than members of any other paygrade groups were away from their permanent duty stations to participate in counter drug operations (6.1%) and joint training/field exercises/alerts (47.8%). Proportionately more warrant officers than members of any other paygrade except the O4-O6 paygrade group, were away from their permanent duty stations for TADs or TDYs (67.5%).
- O1-O3 Paygrade Group. Among officers, a larger proportion of the O1-O3 paygrade group than the O4-O6 paygrade group participated in peacekeeping operations (20.3% vs. 15.9%), unit training at eombat training eenters (34.6% vs. 21.4%), time at sea for seheduled deployments (11.2% vs. 6.0%), other time at sea (9.6% vs. 6.5%), and joint training/field exercises/alerts (37.1% vs. 29.4%).
- **O4-O6 Paygrade Group.** A higher percentage of the O4-O6 paygrade group than other paygrade groups were away from their permanent duty stations for other TADs or TDYs (83.7%). A smaller proportion of the O4-O6 paygrade group than all other paygrade groups stated they were away from their permanent duty stations for unit training at eombat training centers (21.4%).
- E1-E3 and O4-O6 Paygrade Groups. Proportionately fewer members of the E1-E3 and O4-O6 paygrade group were away from their permanent duty stations to participate in peacekeeping or other contingency operations (13.4% and 15.9%, respectively) than were members of any other paygrade group.
- **E4 and E5-E6 Paygrade Groups.** Among enlisted paygrade groups, a larger proportion of the E4 and E5-E6 paygrade groups participated in peacekeeping operations (22.2% and 21.9%, respectively) and in foreign humanitarian assistance missions (8.7% and 7.5%, respectively) than did members of other paygrade groups.

- E4 and W1-W5 Paygrade Groups. A larger proportion of the E4 and W1-W5 paygrade groups were away from their permanent duty stations to participate in unit training at combat training centers (39.3% and 40.9%, respectively) than were members in all other paygrade groups.
- W1-W5, O1-O3, and O4-O6 Paygrade Groups. A larger proportion of the W1-W5, O1-O3 and O4-O6 paygrade groups were away from their permanent duty stations for military education (43.2%, 45.5%, and 42.2% respectively) than were members of all other paygrade groups.

	(36.2, 38.0)	(22.7, 25.8)
i. Military education (other than for the above)	30.6	26.0
	(29.8, 31.5)	(24.6, 27.6)
j. Other TADs/TDYs	41.3	33.0
	(40.5, 42.1)	(31.0, 34.9)

Member participation rates for duties away from permanent duty station are presented by race/ethnicity in Table 6.4. The table shows only two notable differences. Proportionately more White members were involved in assignments related to military education (31.9%) and other TADs/TDYs (43.9%) than were members of other racial/ethnic groups.

i.	Military education (other than for the above)	25.9 (23.6, 28.4)	31.9 (31.1, 32.8)	26.2 (24.4, 28.0)	27.9 (25.2, 30.8)	25.3 (20.6, 30.6)
j.	Other TADs/TDYs	32.5 (30.0, 35.1)	43.9 (43.0, 44.8)	33.2 (31.3, 35.1)	34.4 (31.7, 37.1)	31.7 (26.7, 37.1)

Table 6.5 presents participation levels for duties away from permanent duty station by family type. The only differences are found within the civilian spouse and unmarried member categories and include:

• Members with Civilian Spouses, No Children and Unmarried Members, No Children. Proportionately more members with civilian spouses and no children and unmarried members with no children were away for other time at sea duties (11.2% and 9.1%, respectively) than were their counterparts with children (8.6% and 6.0%, respectively).

- Unmarried Members, No Children. Proportionately more unmarried members without children than unmarried members with children participated in unit training (34.3% vs. 28.0%) and time at sea for scheduled deployments (14.3% vs. 8.0%).
- Members with Civilian Spouses with Children and Unmarried Members with Children. Proportionately more members with civilian spouses and children, and unmarried members with children participated in other TADs/TDYs (48.4% and 37.3%) than their counterparts without children (43.2% and 28.7%). In addition, proportionately more members with civilian spouses and children, and unmarried members with children were away on military education assignments (35.6% and 28.0%) than their counterparts without children (29.9% and 22.5%).

Table 6.6 presents participation rates for duties away from permanent duty station by spouse employment status. Proportionately fewer members with a military spouse participated in missions that involved joint training/field exercises (32.2%), unit training (26.0%), time at sea for scheduled deployments (6.0%), and other time at sea (6.3%) than did members with spouses in other employment status groups. Proportionately more members with spouses employed in paying civilian jobs and those with spouses voluntarily out of work spent time away from their permanent duty stations for TAD/TDYs (47.7% and 48.1%, respectively) than did members with spouses in other employment status groups.

than for the above)	(33.2, 35.7)	(29.1, 33.4)	(30.4, 37.0)	(33.1, 36.2)
j. Other TADs/TDYs	47.7	38.8	41.4	48.1
	(46.3, 49.0)	(36.1, 41.5)	(38.6, 44.3)	(46.3, 50.0)

Workload

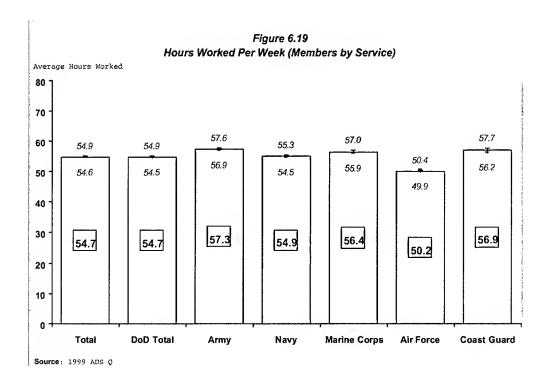

As another measure to gauge personnel tempo within the Armed Forces, Question 1 asked members how many hours per week they had usually worked during the past 12 months.

During the past 12 months, how many hours per week did you usually work?

- 40 hours or less
- 41-50 hours
- 51-60 hours
- 61-70 hours
- 71-80 hours
- 81 hours or more

For the purposes of this report, categories were recoded to the mean, with the exception of the first category, 40 hours or less, which was set to 40, and the sixth category, 81 hours or more, which was set to 81.

Figure 6.19 shows total member responses concerning workload and compares these responses concerning members' workload across Services. Members of the Air Force, on average, indicated they worked fewer hours per week (50.2 hours) over the past 12 months than did members of the other Services.

Findings for weekly workload by paygrade group are shown in Figure 6.20. Overall, the workload of officers, ranging from 56.5 to 57.0 hours, was higher than that of enlisted members, which ranged from 53.8 to 55.1 hours. There were no differences in mean hours worked per week among enlisted paygrade groups, nor were there any differences in mean hours worked per week among warrant officer or officer paygrade groups.

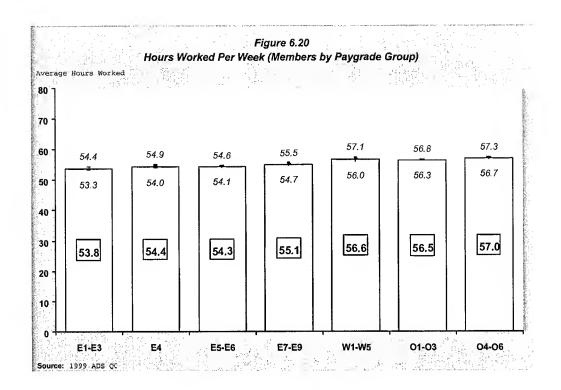

Figure 6.21 presents findings for workload by gender. Similar to findings for personnel tempo, males indicated that they worked more hours per week on average (55.3 hours) than did females (51.7 hours).

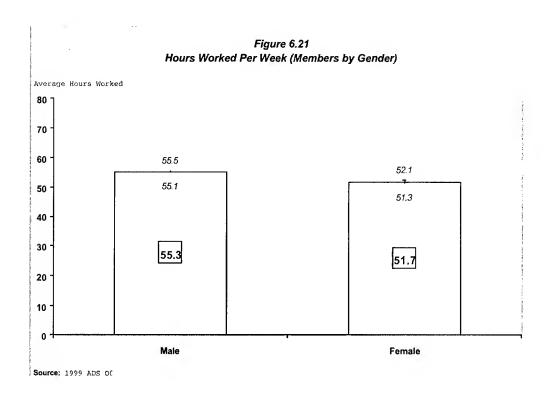

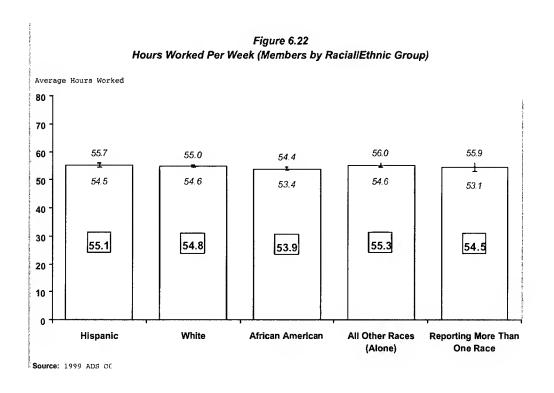

Figure 6.22 shows that there are no differences in the workload of active-duty members among racial/ethnic groups.

Finally, workload results are presented by family type and spouse employment status. Figure 6.23 illustrates the differences in workload by family type. The only difference occurred between unmarried members with and without children. Unmarried members without children stated that they worked more average hours per week (54.7 hours) than did unmarried members with children (53.1 hours).

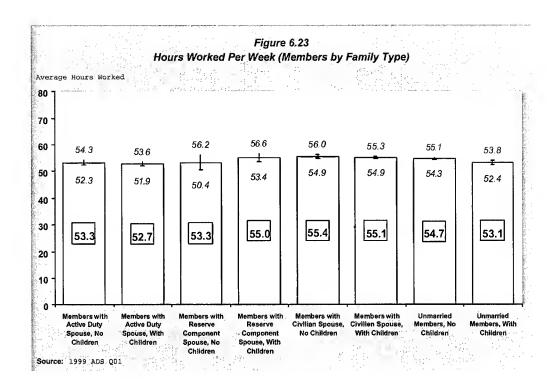

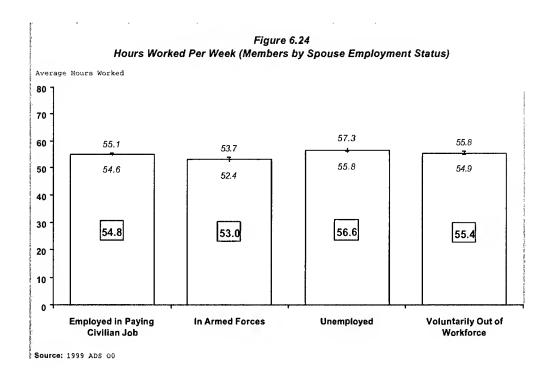

Figure 6.24 presents findings for workload and spouse employment status. Members married to military spouses said they worked fewer hours (53.0 hours) per week than did members with spouses in other employment status groups.

Reasons for Working More than Usual

Question 3 asked members to indicate the primary reasons why they had to work more hours than usual. This section presents findings for the 14 reasons included in the list presented to members by Service, paygrade, gender, race/ethnicity, family status, and spouse employment status.

When you have had to work more hours than usual during the past 12 months, what were the <u>primary</u> reasons? (MARK ALL THAT APPLY.)

- Not applicable
- Mission critical requirements
- Mission preparation/training/maintenance
- Tasked with additional duties (e.g., special projects)
- Unit was getting ready for deployment
- Manning not sufficient for workload (i.e., not enough authorization/billets)
- Unit was under-manned (i.e., authorizations/billets not filled)
- Part of unit was deployed
- Demanding supervisor
- Problems involving subordinates
- High workload
- Poor planning or lack of planning
- Others were not carrying their workload
- Inspections and inspection preparation
- Equipment failure and repairs
- None of the above

In this analysis, percentages are based on all Service members including those who indicated that the question was not applicable to them.

As shown in Table 6.7, overall, more members selected mission preparation (45.7%), mission critical requirements (44.3%), and high workload (39.0%) than all other choices as reasons for working more hours than usual. A lower percentage of members selected problems involving subordinates (7.7%), part of unit was deployed (11.0%), and demanding supervisor (12.8%) than all other choices as reasons for working more than usual.

Table 6.7 compared responses from members in each Service. Notable findings include:

- Army. More Army members selected mission preparation (51.9%) as the primary reason for working more hours than any of the other reasons. Proportionately more Army members than other Service members said they worked more hours than usual because of poor planning or lack of planning (29.0%), and others not carrying their workload (18.6%).
- Navy. More Navy members selected mission preparation (40.7%) as the primary reason for working more hours than any of the other reasons. Proportionately fewer Navy members than those of other Services said they worked more hours than usual because of mission critical requirements (37.1%) and additional duty taskings (30.0%). Also, among DoD Services, proportionately fewer Navy members than other Services' members said their primary reason for working more hours was that part of the unit was deployed (6.2%).
- Marine Corps. More Marine Corps members selected mission preparation (54.4%) as the primary reason for working more hours than any of the other reasons. A higher percentage of Marine Corps members than those of other Services said they worked more than usual due to inspections and inspection preparation (27.6%). Proportionately fewer Marine Corps members than those of other Services selected manning not sufficient for workload (23.0%) as a primary reason for working more hours than usual.
- Air Force. More Air Force members selected mission critical requirements as the primary reason for working more hours (45.9%) than any of the other reasons. Proportionately more Air Force members than those of other Services said part of the unit being deployed (16.9%) was the primary reason they worked more hours than usual in the past 12 months. However, proportionately fewer Air Force members than those of other Services said a demanding supervisor (7.2%) and equipment failure and repairs (10.2%) were primary causes of increased work hours. Among DoD Services, a higher proportion of Air Force members than those of other Services gave manning not sufficient for workload (31.4%) as a primary reason for working more than usual. Proportionately fewer Air Force members said poor planning (10.7%) and others not carrying their workload (9.6%) were primary reasons for their longer than usual work hours than did members of other Services.

- Coast Guard. More Coast Guard members selected mission critical requirements (48.8%) as the primary reason for working more hours than usual than any of the other reasons. Proportionately more Coast Guard members than members of other Services said that high workload (45.9%), and equipment failure and repairs (23.3%) were their primary reasons for working more than usual. A lower percentage of Coast Guard members said inspections and inspection preparation (15.2%) caused longer than usual work hours than did members of other Services.
- Army and Marine Corps. Proportionately more Army and Marine Corps members (51.9% and 54.4%, respectively) than members of other Scrvices said mission preparation, training, and maintenance was the primary reason they had to work more hours than usual during the past 12 months.
- Air Force and Coast Guard. A smaller proportion of Air Force and Coast Guard members (14.1% and 16.0%, respectively) than members of other Services said their primary reason for working more hours than usual was that the unit was getting ready for deployment.

Table 6.7.

Members Who Indicated They Had To Work More Hours Than Usual During The Past 12 Months For The Following Reasons, By Service

Q3. When you have had to work more hours than usual during the past 12 months, what were the primary reasons? (MARK ALL THAT APPLY)

				DoD			
					Marine	Air	Coast

None of the above	3.4	3.4	2.3	5.3	3.2	3.1	4.1*
	(3.1, 3.7)	(3.1, 3.7)	(2.0, 2.7)	(4.6, 6.1)	(2.4, 4.3)	(2.6, 3.7)	(3.2, 5.3)

Table 6.8 presents findings of primary reasons for longer hours worked by paygrade. Notable differences between paygrade groups include:

• **E1-E3 Paygrade Group.** A smaller proportion of the E1-E3 paygrade group than other paygrade groups said they worked more hours than usual for the following reasons: mission critical requirements (33.9%); manning not sufficient for workload (18.5%); unit was under-manned (20.8%); and high workload (27.6%).

- **E4 Paygrade Group.** A larger proportion of the E4 paygrade group than other paygrade groups said equipment failure and repairs (20.7%) was their primary reason for working more hours than usual.
- E7-E9 Paygrade Group. Proportionately more members in the E7-E9 paygrade group than members in other paygrade groups indicated problems involving subordinates (13.0%) as the primary reason they worked more hours than usual. Among enlisted paygrade groups, a smaller proportion of the E7-E9 paygrade group than other paygrade groups gave the following three primary reasons for working more hours than usual: others not carrying their workload (8.7%), inspections and inspection preparations (19.9%), and equipment failure and repairs (10.3%).
- W1-W5 Paygrade Group. A larger proportion of the warrant officer paygrade group than other paygrade groups said they worked more hours than usual due to insufficient manning for workload (42.2%) and that unit was undermanned (37.3%).
- O4-O6 Paygrade Group. A larger proportion of the O4-O6 paygrade group than other paygrade groups said high workload (58.8%) was the primary reason for working more hours than usual. However, a smaller proportion of the O4-O6 paygrade group than other paygrade groups said the following reasons caused them to work more hours than usual: mission preparation/training/maintenance (35.2%); unit was getting ready for deployment (10.5%); poor planning or lack of planning (6.8%); inspections and inspection preparation (12.1%); and equipment failure and repairs (4.2%). Among officers, a larger proportion of the members of the O4-O6 paygrade group than members of the O1-O3 paygrade group said they worked more than usual hours due to insufficient manning for workload (36.0% vs. 28.1%).
- E1-E3 and E4 Paygrade Groups. Proportionately more members in the E1-E3 and E4 paygrade groups than members in other paygrade groups gave the following as primary reasons for working more hours than usual in the past 12 months: a demanding supervisor (16.8% and 16.0%, respectively); poor planning or lack of planning (25.8 and 29.1%, respectively); others were not carrying their workload (18.3% and 20.3%, respectively); and inspections and inspection preparation (26.8% and 27.0%, respectively). A smaller proportion of the E1-E3 and E4 paygrade groups said their primary reason for working more hours than usual was being tasked with additional duties (28.8% and 31.1%, respectively) than did other paygrade groups.
- E7-E9 and W1-W5 Paygrade Groups. Proportionately fewer members in the E7-E9 and W1-W5 paygrade groups said a demanding supervisor was the primary reason for working more hours than usual (7.5% and 6.6%, respectively) than did members in other paygrade groups.
- E7-E9, W1-W5, and O4-O6 Paygrade Groups. Proportionately more members in paygrade groups E7-E9, W1-W5, and O4-O6 indicated that the primary reason they worked more hours than usual was mission critical requirements (51.7%, 56.6%, and 53.3%, respectively) than did members in other paygrade groups.

Table 6.8.

Members Who Indicated They Had To Work More Hours Than Usual During The Past 12 Months For The Following Reasons, By Paygrade Group

Q3. When you have had to work more hours than usual during the past 12 months, what were the primary reasons? (MARK ALL THAT APPLY.)

Table 6.9 compares primary reasons for working more hours than usual during the past 12 months by gender. Proportionately more males than females said 9 of the 14 explanations were primary reasons for working more hours than usual. These included: mission critical requirements (45.9% vs. 35.2%); mission preparation (47.3% vs. 35.6%); unit was getting ready for deployment (21.0% vs. 13.0%); manning not sufficient for workload (28.9% vs. 25.0%); unit was under-manned (27.0% vs. 23.0%); problems involving subordinates (7.9% vs. 6.2%); high workload (39.5% vs. 35.7%); poor planning or lack of planning (20.4% vs. 16.2%); and equipment failure and repairs (16.6% vs. 9.5%).

As shown on Table 6.10, four differences among race/ethnicity groups are noted. Proportionately fewer African American members than members in all other race/ethnicity groups said the primary reasons they worked more hours than usual in the past 12 months were mission preparation/training/maintenance (40.5%), being tasked with additional duties (28.7%), high workload (27.1%), and others not carrying their workload (12.0%).

Table 6.11 compares primary reasons for working more hours than usual among family types. Differences of note include:

- Members with Civilian Spouses, with Children. Proportionately more members married to civilian spouses with children than their counterparts without children said they worked more hours than usual due to problems involving subordinates (9.1% vs. 7.1%).
- Unmarried Members, with Children. Proportionately more unmarried members with children than their counterparts without children said they worked more hours than usual due to insufficient manning for workload (27.0% vs. 22.8%).
- Unmarried Members, No Children. A larger proportion of unmarried members without children than their counterparts with children gave the following three reasons for working more hours than usual: mission preparation/training/maintenance (47.1% vs. 39.8%); unit was getting ready for deployment (22.3% vs. 14.6%), and poor planning or lack of planning (22.9% vs. 17.5%).

Comparison of Hours Worked per Week in 1999 and in 1992

This section compares the number of hours members indicated they worked per week in 1999 and 1992. For these comparisons, paygrades have been collapsed into the following groups for the two years: E1-E3, E4, E5-E6, E7-E9, W1-W5²¹, O1-O3, and O4-O6.

Hours worked per week was assessed by Question 1 in the 1999 Survey of Active Duty Personnel, shown on page 138 of this chapter. Members were asked to indicate the number of hours they usually worked each week by selecting a range of hours (40 hours or less, 41-50 hours, 51-60 hours, 61-70 hours, 71-80 hours, and 81 or more hours). Questions 130 in the 1992 Department of Defense Survey of Officers and 131 in the 1992 Department of Defense Survey of Enlisted Personnel, shown next, asked members how many hours per week they worked at their military jobs.

On average, what is the total number of hours per week you work at your military job?

- 40 hours or less
- 41-50 hours
- 51-60 hours
- 61-80 hours
- More than 80 hours

For the purpose of this report, the 1999 Question 1 categories for number of hours 61-70 hours and 71-80 hours were collapsed into one category, 61-80 hours to resemble the categories used in the 1992 survey. The categories could then be compared (e.g., the percentage paygrade group E1-E3 who indicated they worked 61-80 hours on the 1999 survey are compared with the percentage of paygrade group E1-E3 who indicated they worked 61-80 hours on the 1992 survey).

Table 6.13 shows the hours worked per week for members by paygrade group in 1992. Table 6.14 shows the hours worked per week for members by paygrade group in 1999.

Differences, by paygrade, in the number of hours members worked per week as reported on the 1992 and 1999 surveys include:

• Proportionately fewer members in each of the 1999 paygrade groups indicated they worked 40 hours or less per week than did members in each of the corresponding 1992 paygrade groups (with the exception of warrant officers). Further, in both 1992 and 1999, proportionately fewer members in the warrant officer paygrade group and in the O4-O6 paygrade group than members in other paygrade groups said they worked 40 hours or less per week.

²¹ Because there was no W5 rank in 1992, the 1992 dataset for warrant officers reflects the ranks W1-W4.

- Proportionately fewer members in each of the 1999 paygrade groups, except the E4 paygrade group, said they worked 41-50 hours per week than did members in each of the corresponding 1992 paygrade groups. Also, in both 1992 and in 1999, proportionately fewer members in paygrade groups O1-O3 and O4-O6 than in any enlisted paygrade group said they worked 41-50 hours per week.
- Proportionately more members in the 1999 E5-E6, E7-E9, and O4-O6 paygrade groups said they worked 51-60 hours per week than did members in the corresponding 1992 paygrade groups. Further, in both 1992 and 1999, proportionately more warrant officers and members in the O4-O6 paygrade group than members in other paygrade groups said they worked 51-60 hours per week.
- Proportionately more members in each 1999 paygrade group said they worked 61-80 hours than did members in each of the corresponding 1992 paygrade groups. Further, on the 1992 survey, proportionately more members in the O4-O6 paygrade group than in any other paygrade group said they worked 61-80 hours per week, while on the 1999 survey, proportionately more members in the W1-W5, O1-O3, and O4-O6 paygrade groups than in any other paygrade group said they worked 61-80 hours per week.
- No differences were noted between corresponding 1992 and 1999 paygrade groups in the percentage of members reporting they worked 81 hours or more per week nor are there differences across the paygrade groups in either 1992 or 1999.

Summary

Chapter 6 presents findings for members' past and expected personnel tempo (i.e., time away from permanent duty station for military duties), reasons for being away from their permanent duty station, workload, and reasons for working more hours than usual.

In general, a majority of members had spent time away from their permanent duty station over the past 12 months in connection with their military duties (72.8%). Proportionately more Army, Marine Corps, and Coast Guard members (81.1%, 74.6%, and 78.4%, respectively) were assigned to duties that took them away from their permanent duty station than were Navy and Air Force members (64.7% and 68.0%, respectively). When asked about future assignments, Army, Navy, Marine Corps, and Coast Guard members said they expected to be away from their permanent duty stations for about as long as they were away in the past 12 months, while Air Force members expected to be away slightly more in the future than in the past.

Comparison of survey findings for the paygrade groups showed that the proportion of members who spent time away from their permanent duty station increased as paygrade group increased – a finding that was true for both officers and enlisted members. However, the length of time away was not directly related to the proportion that spent time away from their permanent duty station. For example, junior officers (paygrade group O1-O3) spent a longer period of time away from their permanent station over the past 12 months (2.8 months) than did senior officers (paygrade group O4-O6) (2.2 months). This is despite the fact that proportionately more members of paygrade group O4-O6 than of paygrade group O1-O3 had been away from their permanent duty station. Members were also asked to estimate the length of time that they expected to be away from their permanent duty station during the next 12 months. In general, this prediction of future personnel tempo mirrored the actual personnel tempo that

members experienced over the past year. However, there were two slight deviations. Paygrade group E1-E3 expected to be away from their duty station more in the future while paygrade group O4-O6 expected to be away slightly less in the future.

Gender comparisons for personnel tempo indicated that proportionately more male members were assigned to duties away from their permanent duty station than were female members. Male members also said they spent a longer period of time away from their permanent duty station (2.6 months) than did female members (1.5 months) in the past 12 months. Males expected personnel tempo for future months to be similar to their past personnel tempo while females expected an increased personnel tempo in the upcoming months. A potential reason that proportionately more males than females participated in personnel tempo type missions must be viewed in the context of Service manning policies. The majority of the units called upon to perform the missions associated with responses to the personnel tempo questions are closed to females. The <u>Direct Ground Combat Exclusion Policy</u> precludes the assignment of females to units which incur the largest amounts of tempo associated with joint training/field exercises, peacekeeping operations, etc. Analysis by gender should consider this limitation.

Comparisons of personnel tempo by racial/ethnic group indicated that proportionately more White members (76.1%) were assigned to duties away from their permanent duty station than were all other racial/ethnic groups. However, there were no differences observed among the racial/ethnic groups in the amount of time spent away from the permanent duty station over the past 12 months or in the expected time away for the next 12 months.

No differences based on family type were found for reports of past personnel tempo. Looking only at future personnel tempo, members married to civilian spouses with children expected their future personnel tempo (2.6 months) to be higher than did members in all other family types with children.

A comparison of the differences between past personnel tempo and expected personnel tempo for each family type revealed that, with one exception, each family type's past personnel tempo was similar to that family type's expected personnel tempo. Unmarried members with no children expected an increased personnel tempo in the future over their past experiences (2.7 months vs. 2.4 months).

Comparisons by spouse employment status revealed that proportionately fewer members with military spouses had been away from their permanent duty station than had members with spouses in other employment status groups. Members with military spouses also spent a shorter period of time away (2.0 months) over the past 12 months and expected that their future personnel tempo (2.2 months) would be lower than did members with spouses in other employment status groups.

Members who had been assigned to duties that took them away from their permanent duty station were also asked to indicate the type of roles or missions they had supported in their assignments. Overall, at least 30% of all members had participated in unit training, joint training/field exercises, military education, and other TADs/TDYs during the past 12 months.

The type of duty performed while away from one's permanent duty station differed by Service. For example, proportionately more Air Force members participated in peacekeeping operations (25.6%) than did members in other Services. Proportionately more Army and Marine Corps members participated in unit training (47.1% and 47.8%, respectively) than did members of other Services. Proportionately more Army members participated in joint training/field exercises (50.9%) and proportionately more Navy members (31.7%) spent time at sea than did members of other Services.

Comparisons among paygrade groups revealed proportionately more members in paygrade group W1-W5 than other paygrade groups were away from their permanent duty stations to participate in joint training/field exercises (47.8%), and a larger proportion of paygrade group O4-O6 than other paygrade groups were away for TADs/TDYs (83.7%). Proportionately fewer members of the E1-E3 paygrade group than other paygrade groups were away for military education (12.7%) and proportionately fewer members of paygrade group E1-E3 were assigned to peacekeeping operations (13.4%) than were other enlisted personnel.

Analysis also revealed that proportionately more males were away from their PDS participating in each type of mission than were females. Only one difference was noted among the racial/ethnic groups. Proportionately more White members had been assigned to other TADs/TDYs (43.9%) and military education (31.9%) than had members in other racial/ethnic groups. Additionally, findings among family type showed that proportionately more members without children were assigned to missions that included joint training/field exercises, unit training, and time at sea than were members with children. For spouse employment status, proportionately fewer members with a military spouse were assigned to joint training/field exercises (32.2%), unit training (26.0%), and time at sea (6.0%) than were members whose spouses had another employment status.

Analyses in this area also explored the workload of members. Service comparisons indicated that members of the Air Force worked fewer average hours per week (50.2 hours) than did members of the other Services. Officers (hours ranging from 56.5 to 57.0) also stated they had worked more average hours than had enlisted personnel (hours ranging from 53.8 to 55.1). Workload of active-duty personnel also varied by gender, family type and spouse employment status. Males indicated they had worked more hours (55.3 hours) per week over the past 12 months than did females (51.7 hours). Unmarried members without children worked more hours (54.7 hours) than did unmarried members with children (53.1 hours); members with military spouses said they worked fewer hours per week (53.0 hours) than did members with spouses in other employment status groups.

Finally, this chapter considered the primary reasons given by service members for having to work more hours than usual during the past 12 months. Overall, the highest percentage of members indicated mission preparation/training/maintenance (45.7%), mission critical requirements (44.3%), and high workload (39.0%) as reasons for working more hours than usual. Most of the differences noted were found between Services, paygrade groups, and genders. Of all of the explanations provided, Army, Navy, and Marine Corps members selected mission preparation/training/maintenance (51.9%, 40.7%, and 54.4%, respectively) more often than they selected any other reason. Air Force and Coast Guard members selected mission critical requirements (45.9% and 48.8%, respectively) more than they selected any other reason.

For both the officers and enlisted members, as the paygrade group increased, the proportion of members who gave the following explanations as primary reasons for working more hours than usual also increased: mission critical requirements, insufficient manning for workload, and high workload. Among enlisted paygrade groups also, as the paygrade groups increased, so did the percentage of members indicating that additional duty taskings were the primary reason for working more hours than usual. Among explanations given as primary reasons for working more hours than usual, those with the largest differences for males and females were mission preparation (11.7% difference), mission critical requirements (10.7% difference), and unit getting ready for deployment (8.0% difference). Males were more likely than females to cite these three reasons.

Comparisons by race/ethnicity identified several differences. Proportionately fewer African American members selected mission preparation/training/maintenance, being tasked with additional duties, high workload, and others not carrying their workload as reasons for working more hours than usual in the past 12 months than did all other racial/ethnic groups.

Comparisons among the spouse employment status groups showed that proportionately fewer members with Armed Forces spouses selected mission preparation/training/maintenance as a primary reason for working more hours than usual than did members with spouses in the other status groups.

When member responses for the number of hours worked per week for each paygrade group from the 1992 survey were compared to the member responses for the number of hours worked by the corresponding paygrade group from the 1999 survey, differences were noted for the percentages of members working 40 hours or less, 41-50 hours, 51-60 hours, and 61-80 hours per week. Among paygrade groups for which differences were noted, the percentage of members working 40 hours or less per week and 41-50 hours per week was smaller for the 1999 paygrade groups than for the 1992 paygrade groups, while the percentages of members working 51-60 hours per week were generally larger for the 1999 paygrade groups than for the 1992 paygrade groups. The comparison between the 1992 and 1999 paygrade groups for members working 61-80 hours per week revealed that the percentage of members who said they worked 61-80 hours was larger for each 1999 paygrade group than it was for its corresponding 1992 paygrade group.

Chapter 7: Quality of Life Programs

This chapter describes members' responses concerning the availability and use of quality of life programs including education and childcare arrangements and member attitudes about health care for their families. The final section of this chapter summarizes the important findings for each section. Detailed tables supporting the figures, tables, and analysis reported in this chapter appear in Appendix G of this document and in Gaines et al. (2000b).

Availability and Use of Quality of Life Programs

This section is divided into four parts. The first two parts address availability and members' usage of on base programs. The remaining two parts address availability and members' usage of four off base programs: library services, clubs/dance/night clubs, commissary/supermarket/grocery stores, and main exchange/department stores. Detailed analyses of availability and usage of civilian off base programs will be available in a Special Topics Report.

Question 52 asked members about their use of quality of life programs, both on base and off base. For each option, members were asked to select a level of average monthly use for each service, program, or facility from among the following eight options: not available, 0 times, 1-5 times, 6-10 times, 11-15 times, 16-20 times, 21-25 times, and 26 times or more.

On average during a month, how often do you use the following on base programs, facilities or services and civilian off base programs, facilities, or services?

- 1. Fitness center/gym
- 2. Library services
- 3. Outdoor recreation areas (e.g., campgrounds, picnic areas, beach, stables)
- 4. Outdoor recreation equipment rental
- 5. Recreation center (e.g., recreation room, music/TV, game room/amusement machines)
- 6. Golf course
- 7. Bowling center
- 8. Recreation lodging/hotel or resorts
- 9. Clubs/dance/night clubs
- 10. Commissary/supermarket/grocery store
- 11. Main exchange/department store
- 12. Social activities for service members (e.g., trips, special events, tournaments)
- 13. Auto, crafts and hobby shops

For purposes of this report, responses were recoded into two variables. The first variable has two categories: available or not available. The second variable reported the usage of the service, program, or facility if available. This variable was recoded from the number of times used to the mean of each category (e.g., 0 times was recoded to 0; 1-5 times was recoded to 2.5 times, 6-10 times was recoded to 8 times). The final category, 26 times or more, was set to 26. The mean monthly program use was then used to compare responses between Services, paygrade groups, racial/ethnic groups, family types, and spouse employment statuses.

Availability of On Base Quality of Life Programs

Generally, over 90% of service members said that 11 of 13 on base quality of life programs, facilities, and services were available to them. There were two exceptions. Less than 90% of service members said golf courses (86.7%) and recreation lodging/hotel or resorts (89.3%) were available (Table 7.1).

As shown in Table 7.1, there were notable differences between the proportion of Coast Guard members and the proportion of DoD members who indicated the availability of quality of life programs. Proportionately fewer Coast Guard members than DoD members said the 13 programs were available to them.²² The smallest difference between Coast Guard and DoD was 10.2% (fitness centers) and the largest difference was 49.2% (library services). Other notable differences include:

- **Army.** Among DoD Services, proportionately fewer Army members than members of other Services responded that fitness centers (95.6%), outdoor recreation areas (89.3%), outdoor recreation equipment rental (90.5%), recreation centers (87.6%), and social activities (91.9%) were available.
- Navy. A smaller percentage of Navy members than those of other DoD Services said library services (88.8%) were available.
- **Air Force.** Proportionately more Air Force members than those of other Services said bowling centers (95.2%), clubs (95.4%), commissaries (97.6%), and golf courses (92.0%) were available.

160

²² All differences shown are statistically significant

Table 7.1.

Availability Of On Base Programs, Facilities, Or Services, By Service

This table shows the percentage of respondents who said a program, facility, or service was available.

					DoD			
		Total	Total	Army	Navy	Marine Corps	Air Force	Coast Guard
1.	Fitness center/gym	96.8	97.1	95.6	97.6	97.5	98.2	86.9

A comparison of the availability of 13 on base quality of life programs, facilities or services among paygrade groups is reported in Table G.1 in Appendix G. Generally, among officers, as paygrade group increased, availability of on base quality of life programs decreased. The following differences among paygrade groups were also observed:

- **E1-E3 Paygrade Group.** A higher percentage of members in paygrade group E1-E3 than other paygrade groups indicated that library services (96.2%) and recreation centers (94.9%) were available.
- **E7-E9 Paygrade Group.** Proportionately fewer members in the E7-E9 paygrade group than members of other paygrade groups said library services (85.9%), recreation centers (85.8%), main exchanges (93.9%), and social activities (90.3%) were available to them. Among enlisted paygrade groups, a smaller percentage of the E7-E9 paygrade group than other paygrade groups indicated that fitness centers (93.3%) and auto, crafts, and hobby shops (87.5%) were available to them.
- O1-O3 Paygrade Group. Among officers, proportionately more members of the O1-O3 paygrade group than members of the O4-O6 paygrade group said the following on base programs were available to them: fitness centers (97.1% vs. 93.8%); library services (91.2% vs. 88.1%); outdoor recreation areas (92.0% vs. 88.4%); outdoor recreation equipment rental (94.6% vs. 90.6%); recreation centers (91.4% vs. 88.3%); bowling centers (92.5% vs. 89.1%); recreation, lodging/hotel, or resorts (90.9% vs. 86.9%); commissaries (96.4% vs. 94.5%); main exchanges (97.0% vs. 95.5%); social activities (95.3% vs. 92.9%); and auto, crafts and hobby shops (93.4% vs. 89.2%).
- E1-E3 and E4 Paygrade Groups. A larger proportion of the E1-E3 and E4 paygrade groups said fitness centers (99.4% and 99.0%, respectively) and bowling centers (95.1% and 94.9%, respectively) were available to them than did other paygrade groups. Among enlisted paygrade groups, a higher proportion of the E1-E3 and E4 paygrade groups said that outdoor recreation equipment rental (94.2% and 95.0%, respectively); recreation lodging/hotel, or resorts (91.8% and 90.5%, respectively); main exchanges (98.6% and 97.7%, respectively); and auto, crafts and hobby shops (93.9% and 94.8%, respectively) were available than did other enlisted paygrade groups.
- E1-E3, E4, and O1-O3 Paygrade Groups. Larger proportions of the E1-E3, E4, and O1-O3 paygrade groups (97.9%, 97.4%, and 96.4%, respectively) than other paygrade groups said commissaries were available to them.

Gender comparisons for the availability of on base quality of life programs are reported in Table G.2 in Appendix G. Although there were differences between male and female responses—a higher proportion of females than males indicated six of the programs or facilities were available—all differences were 2.5% or less. Differences included a higher proportion of females than males who said that fitness centers (98.0% vs. 96.6%), golf courses (88.7% vs. 86.3%), bowling centers (93.4% vs. 91.9%), recreation lodging (91.4% vs. 88.9%) commissaries (96.6% vs. 95.4%), and main exchanges (97.4% vs. 96.3%) were available to them.

As shown in Table G.3 in Appendix G, race/ethnicity was found not to be associated with differences in availability of on base quality of life services, programs, and facilities to members.

As shown in Table G.4 in Appendix G, notable differences in availability of on base quality of life programs among family types include:

- Members with Active Duty Spouses, with Children and No Children. A larger proportion of members with active-duty spouses, with and without children (92.3% and 92.1%, respectively) than members with all other family types said golf courses were available to them.
- Members with Civilian Spouses, with Children. Proportionately more members with civilian spouses and with children than members with civilian spouses and no children indicated that fitness centers (98.5% vs. 96.1%) and golf courses (87.3% vs. 85.2%) were available.
- Unmarried Members, No Children. Proportionately more unmarried members with no children than those with children said library services (93.3% vs. 89.6%), recreation centers (91.9% vs. 89.0%), commissaries (96.3% vs. 94.1%), and auto, crafts, and hobby shops (92.2% vs. 89.5%) were available.

One difference in availability of on base quality of life services among spouse employment status is noted in Table G.5 in Appendix G. A smaller proportion of members with spouses in paying civilian jobs (89.3%) than members with spouses in other employment status groups indicated that library services were available to them.

Member Use of On Base Quality of Life Programs

Overall, members responded that they used the on base fitness centers and gyms an average of 9.4 times per month, the main exchanges/department stores an average of 7.3 times per month, and the commissaries an average of 6.6 times per month (Table 7.2). Members said they used these programs more times per month than they used the other quality of life programs.

Table 7.2 shows mean monthly member use of the 13 quality of life programs by Service. Service differences of interest include:

- **Army.** Army members indicated a higher level of average monthly use (3.1 times per month) for library services than did members in other Services.
- Navy. Among DoD Services, Navy members used library services fewer average times per month (1.8 times per month) than did members of other Services.
- Marine Corps. Marine Corps members said they used the fitness centers proportionately more average times per month (11.3 times per month) than did members of other Services.
- Air Force. Air Force members used recreation centers fewer average times per month (1.5 times per month) than did those of other Services. Among DoD Services, Air Force members used the outdoor recreation areas fewer average times per month (2.0 times per month) than did members of other Services.
- Coast Guard. Coast Guard members said they used recreation centers more average times per month (3.8 times per month) than did members of other Services. Conversely, Coast Guard members indicated lower average usage levels than members of other Services for fitness centers and gyms (7.5 times per month), library services (1.0 time per month), bowling centers (1.0 time per month), and main exchanges (5.9 times per month).
- Navy and Marine Corps. Among DoD Services, Navy and Marine Corps members used the recreation centers more average times per month (2.6 times per month and 2.9 times per month, respectively) than did members of other Services.

Table 7.3 compares member use of the 13 on base quality of life programs by paygrade groups. Differences were observed for member use of the on base quality of life programs among paygrade groups. These include:

- E1-E3 Paygrade Group. Paygrade group E1-E3 used the following facilities more average times per month than did other paygrade groups: fitness centers/gyms (10.8 times per month), clubs/ dance/night clubs (2.5 times per month), recreation centers (4.7 times per month), commissaries (7.4 times per month), and main exchanges (8.9 times per month).
- E7-E9 Paygrade Group. Among enlisted paygrade groups, the E7-E9 paygrade group had the highest average monthly usage for golf courses (1.5 times per month) and the lowest average monthly usage for recreation centers (1.0 times per month) and bowling centers (1.9 times per month).
- O1-O3 Paygrade Group. The O1-O3 paygrade group used the commissary fewer average times per month (5.3 times) than did other paygrade groups. Among commissioned officer paygrade groups, the O1-O3 paygrade group had the highest mean monthly use of fitness centers (9.7 times per month), outdoor recreation areas (2.2 times per month), outdoor recreation equipment rental (1.0 times per month), recreation centers (0.7 times per month), bowling centers (1.0 times per month), and auto, crafts and hobby shops (1.3 times per month).
- **O4-O6 Paygrade Group.** The O4-O6 paygrade group used recreation centers (0.5 times per month), bowling centers (0.9 times per month) and auto, crafts, and hobby shops (1.0 times per month) fewer average times per month than did other paygrade groups.
- **E5-E6 and E7-E9 Paygrade Groups.** Among enlisted paygrade groups, the E5-E6 and E7-E9 paygrade groups had the lowest average monthly use for fitness centers (8.7 times per month and 8.7 times per month, respectively).
- **E1-E3, E4, and E5-E6 Paygrade Groups.** The E1-E3, E4, and E5-E6 paygrade groups used the bowling centers more average times per month (2.5 times, 2.3 times, and 2.2 times, respectively) than did other paygrade groups. Paygrade groups indicating the lowest mean monthly use of the golf courses were E1-E3 paygrade group (0.9 times per month), E4 paygrade group (1.0 times per month), and E5-E6 paygrade group (1.2 times per month).
- W1-W5, O1-O3, and O4-O6 Paygrade Groups. The W1-W5, O1-O3, and O4-O6 paygrade groups used the main exchange fewer average times per month (6.2 times, 5.6 times, and 5.7 times, respectively) than did other paygrade groups.

		(1.9, 2.5)	(1.5, 1.6)	(1.9, 2.2)	(1.9, 2.3)	(1.3, 2.1)

Table 7.6 compares average monthly use differences for on base quality of life services by family type. Findings of note include:

- Unmarried Members, No Children. Unmarried members with no children responded that they used the fitness centers/gyms more average times per month (10.7 times) than did members with all other family types. Unmarried members with no children used the main exchanges more average times per month (8.3 times) than did unmarried members with children (7.4 times).
- Members with Civilian Spouses, with Children. Members with civilian spouses and with children used the library services and commissaries more average times per month (2.6 and 7.0 times, respectively) than did members with civilian spouses but without children (2.1 and 6.1 times, respectively).
- Members with Active Duty Spouses and Unmarried Members, No Children. Members with active-duty spouses and no children and unmarried members with no children indicated a higher mean level of use for recreation centers (1.8 and 3.7 times per month, respectively) than did their counterparts with children (1.0 and 1.8 times per month, respectively).

Table 7.7 shows two differences in average monthly use of on base quality of life facilities and programs in relation to spouse employment status.

• Members with Spouses in the Armed Forces. Members with spouses in the Armed Forces used outdoor recreation areas proportionately fewer average times per month (1.9 times) than did members with spouses in all other employment status groups.

• Members with Unemployed Spouses and Members with Spouses Voluntarily out of the Work Force. Members with unemployed spouses and those with spouses voluntarily out of the work force used library services more average times per month (3.1 and 2.7 times, respectively) than did members with spouses in other employment status groups.

Table 7.7.

Average Monthly Usage (Number Of Times) Of On Base Programs, Facilities, Or Services, By Spouse Employment Status

Q52. On average during a month, how often do you use the following on base programs, facilities, or services? (MARK ALL THAT APPLY)

	Employed in Paying Civilian Job	In Armed Forces	Unemployed	Voluntarily Out of Work Force
1. Fitness ecnter/gym	8.8	9.2	8.6	8.4
	(8.5, 9.0)	(8.7, 9.6)	(8.0, 9.3)	(8.1,8.7)

	(1.3, 1.5)	(1.4, 1.8)	(1.3, 1.9)	(1.1, 1.4)
10. Commissary/	6.6	6.5	7.4	6.9
supermarket/grocery store	(6.4, 6.8)	(6.1, 6.8)	(6.9, 8.0)	(6.6, 7.1)
11. Main exchange/ department	6.8	7.2	7.1	6.7
store	(6.6, 6.9)	(6.8, 7.6)	(6.6, 7.7)	(6.5, 7.0)
12. Social activities for service	1.1	1.2	1.2	1.0
members	(1.1, 1.2)	(1.1, 1.3)	(1.0, 1.3)	(0.9, 1.1)
13. Auto, erafts and hobby shops	1.8	1.4	1.8	1.7
	(1.7, 1.9)	(1.2, 1.5)	(1.6, 2.1)	(1.5, 1.8)

Availability of Off Base Quality of Life Programs

Over 92.0% of all members indicated that the four off base facilities (library services, clubs/dance/night clubs, commissary/supermarkets/grocery stores, and main exchange/department stores) were available to them (Table 7.8).

Table 7.8 compares service member responses concerning the availability of four off base quality of life programs, services or facilities by Service. One difference in availability was observed. Proportionately fewer Coast Guard members (95.6%) than members of other Services indicated that off base clubs/dance/night clubs were available to them.

Table 7.8.

Availability Of Off Base Programs, Facilities, Or Services By Service

Q52. On average during a month, how often do you use the following civilian off base programs, facilities, or services? (MARK ALL THAT APPLY.)

This table shows the percentage of respondents who said a program, facility, or service was available.

					DoD			
		Total	Total	Army	Navy	Marine Corps	Air Force	Coast Guard
2.	Library services	92.4	92.3	90.7	93.8	92.0	93.1	95.3
		(92.0, 92.8)	(91.9, 92.7)	(89.9, 91.5)	(92.9, 94.6)	(90.4, 93.3)	(92.3, 93.8)	(94.0, 96.3)
9.	Clubs/dance/night clubs	97.9	98.0	97.6	97.8	98.4	98.5	95.6
		(97.7, 98.2)	(97.8, 98.2)	(97.1, 98.0)	(97.3, 98.3)	(97.5, 98.9)	(98.1, 98.9)	(94.2, 96.6)
10.	Commissary/supermarket/	97.8	97.9	97.0	98.3	98.1	98.4	97.2
	grocery store	<i>(97.6, 98.1)</i>	(97.6, 98.1)	(96.5, 97.5)	(97.8, 98.7)	(97.2, 98.7)	(98.0, 98.8)	(96.0, 98.0)
11.	Main exchange/department store	97.5	97.5	96.9	97.8	97.6	98.0	95.9
		(97.2, 97.7)	(97.2, 97.8)	(96.3, 97.4)	(97.2, 98.2)	(96.7, 98.2)	(97.4, 98.4)	(94.4, 97.0)

Table G.84 in Appendix G shows differences in availability of four off base quality of life programs and facilities by paygrade group. The one difference found was that a smaller proportion of the E1-E3 and E4 paygrade groups (89.5% and 91.0%, respectively) responded that off base library services were available to them.

Tables G.85 through G.88 in Appendix G compare availability of four off base quality of life services, programs or facilities by gender, race/ethnicity, family type, and spouse employment status. As shown in the tables, gender, race/ethnicity, and spouse employment status were not found to be associated with availability of off base quality of life programs to service members. One difference was noted among family types. Proportionately more unmarried members with children than unmarried members with no children said library services were available (93.8% vs. 90.2%).

Member Use of Off Base Facilities

Overall, main exchange/department stores were used by members more average times per month (average 7.0 times) and library services were used by members fewer mean times per month (average 2.0 times) than the other off base quality of life programs examined in this report (Table 7.9).

Table 7.9 shows mean monthly member use of four off base quality of life programs by Service. Service differences include:

- Navy. Among DoD Services, Navy members used off base commissary/supermarkets/ grocery stores more average times per month (6.5 times) than did members of other Services.
- Marine Corps. Marine Corps members used off base clubs/dance/night clubs more average times per month (4.8 times) than did members of other Services.
- Air Force. Among DoD Services, Air Force members used off base clubs/dance/night clubs fewer average times per month (3.1 times) than did members of other DoD Services.
- Coast Guard. Coast Guard members used off base commissary/supermarket/grocery stores more average times per month (8.2 times) than did members of all other Services.²³
- Navy and Coast Guard. Navy and Coast Guard members used off base library services more average times per month (2.6 times and 2.8 times, respectively) than did members of other Services.

174

The lower proportion of Coast Guard members than other Services' members indicating availability of on base commissaries might explain the higher proportion of Coast Guard members than other Services' members using off base grocery stores.

Table 7.9.

Average Monthly Usage (# Of Times) Of Off Base Programs, Facilities, Or Services, By Service

This table shows the average number of times respondents used programs, facilities, or services.

					DoD			
		Total	Total	Army	Navy	Marine Corps	Air Force	Coast Guard
2.	Library services	2.0	2.0	1.9	2.6	1.6	1.6	2.8
		(1.9, 2.1)	(1.9, 2.0)	(1.7, 2.0)	(2.4, 2.7)	(1.4, 1.8)	(1.5, 1.8)	(2.6, 3.1)
9.	Clubs/dance/night clubs	3.9	3.9	4.0	4.2	4.8	3.1	3.5
		(3.8, 4.0)	(3.8, 4.0)	(3.8, 4.2)	(4.0, 4.4)	(4.5, 5.1)	(3.0, 3.3)	(3.1, 3.9)
10.	Commissary/	5.9	5.9	5.9	6.5	5.4	5.3	8.2
	supermarket/grocery store	(5.8, 6.0)	(5.7, 6.0)	(5.7, 6.1)	(6.3, 6.7)	(5.1, 5.8)	(5.1, 5.5)	(7.8, 8.6)
11.	Main exchange/	7.0	6.9	7.2	6.9	6.5	6.8	7.4
	department store	(6.9, 7.1)	(6.8, 7.1)	(7.0, 7.4)	(6.7, 7.2)	(6.2, 6.9)	(6.7, 7.0)	(7.0, 7.8)

Table 7.10 compares members' average monthly use of the four off base quality of life programs by paygrade group. A comparison of members' use of clubs/dance clubs/night clubs revealed that among enlisted and officer paygrade groups, as paygrade increased, use of the clubs decreased. Other differences in the use of the four programs include:

- E1-E3 Paygrade Group. The E1-E3 paygrade group used off base clubs/dance/night clubs more average times per month (6.1 times) than did any other paygrade group.
- O1-O3 Paygrade Group. The O1-O3 paygrade group used off base commissary/ supermarkets/grocery stores and department stores fewer average times per month (5.2 times and 5.8 times, respectively) than did all other paygrade groups.
- O4-O6 Paygrade Group. Members in paygrade group O4-O6 used off base clubs/dance/night clubs fewer average times per month (1.5 times) than did any other paygrade group.

Table 7.10.

Average Monthly Usage (# Of Times) Of Off Base Programs, Facilities, Or Services, By Paygrade Group

This table shows the average number of times respondents used programs, facilities, or services.

	grocery store	(5.4, 6.1)	(5.7, 5.9)	(6.1, 6.7)	(5.8, 6.8)	(4.6, 6.2)
11.	Main exchange/department	7.0	6.7	7.7	7.3	6.5
	store	(6.6, 7.4)	(6.6, 6.9)	(7.4, 8.1)	(6.8, 7.8)	(5.7, 7.3)

Table 7.13 compares average monthly use for off base quality of life services by family type. Except for members married to Reserve Component spouses, all other members with no children used clubs/dance/night clubs more average times per month than members with the same spouse characteristics but with children. Other findings of note include:

- Unmarried Members, with Children. Unmarried members with children used off base supermarkets/grocery stores more average times than their counterparts with no children (6.2 times vs. 5.5 times per month).
- Members Married to Civilian Spouses and Unmarried Members, with Children. Members with civilian spouses and unmarried members with children used off base library services more average times (2.3 times per month and 2.2 times per month, respectively) than their counterparts with no children (1.8 times per month and 1.7 times per month, respectively).

Table 7.13.

Average Monthly Usage (# Of Times) Of Off Base Programs, Facilities, Or Services, By Family Type

This table shows the average number of times respondents used programs, facilities, or services.

Table 7.14 compares members' responses for average monthly use of off base quality of life programs by spouse employment status. One difference was noted. Members with spouses who are voluntarily out of the work force used off base clubs/dance/night clubs fewer average times (2.0 times per month) than did members with spouses in all other employment status group.

Table 7.14.

Average Monthly Usage (# Of Times) Of Off Base Programs, Facilities, Or Services, By Spouse Employment Status

Q52. On average during a month, how often do you use the following off base programs, facilities, or services? (MARK ALL THAT APPLY.)

Member Use of Education Programs

Question 53 asked members about their use of educational services and programs. Members were asked to respond yes or no to each option.

During the past 12 months, have you used any of the following programs and services?

- Adult continuing education/counseling
- Tuition assistance programs for college/higher education
- Technical/vocational programs
- Basic skills education

Detailed tables supporting the figures and analysis reported in this section appear in Appendix G of this document.

In general, fewer than 30.0% of the members said they used each of the four education programs (Table 7.15). More members used adult continuing education/counseling (29.7%) than used any of the other education programs. Fewer members said they used technical/vocational programs (6.7%) than said they used the other education programs.

Table 7.15 shows the proportion of members in each Service who said they used the education programs. Differences of note among the Services include:

- Army. Proportionately more Army members than those of other Services said they used adult continuing education and counseling (36.6%).
- Marine Corps. Among DoD Services, a smaller proportion of Marine Corps members said they used adult continuing education (18.4%) than did members of other DoD Services.
- Army and Air Force. Regarding tuition assistance programs for college and higher education, proportionately more Army and Air Force members (27.7% and 29.3%, respectively) used this program than did those of other Services.
- Navy and Marine Corps. Proportionately fewer Navy and Marine Corps members used tuition assistance programs (21.3% and 22.1%, respectively) than did members of other DoD Services.

Table 7.15.

Q53.	During the past 12 months, have you used any of the following programs and services?
	(MARK ALL THAT APPLY.)

					DoD			
		Total	Total	Army	Navy	Marine Corps	Air Force	Coast Guard
a.	Adult continuing	29.7	29.9	36.6	22.5	18.4	33.5	19.9
	education/counscling	(28.9, 30.5)	(29.2,30.7)	(35.3, 38.0)	(21.2, 23.9)	(16.7, 20.2)	(32.1, 34.9)	(17.9, 22.2)
b.	Tuition assistance programs for college/ higher education	25.5 (24.8, 26.1)	25.7 (25.1, 26.4)	27.7 (26.6, 28.8)	21.3 (20.1, 22.5)	22.1 (20.1, 24.2)	29.3 (27.8, 30.8)	14.7 (12.6, 17.0)
e.	Technical/vocational programs	6.7 (6.3, 7.2)	6.7 (6.2, 7.2)	6.8 (6.1, 7.7)	6.6 (5.8, 7.6)	4.6 (3.7, 5.8)	7.5 (6.7, 8.5)	6.5 (4.9, 8.4)
d,	Basic skills education	10.2 (9.8, 10.7)	10.3 (9.8, 10.8)	12.2 (11.3, 13.1)	9.9 (8.9, 10.9)	10.4 (8.9, 12.2)	8.1 (7.2, 9.2)	8.2 (6.6, 10.1)

Table 7.16 shows use of education programs by paygrade groups. Among officer paygrade groups, as paygrade group increased, member use of education programs and services decreased. Other notable findings include:

- **E1-E3 Paygrade Group.** Among enlisted paygrade groups, proportionately fewer members in the E1-E3 paygrade group used the adult continuing education (23.8%) and tuition assistance (19.2%) programs than did members in all other enlisted paygrade groups.
- **E7-E9 Paygrade Group.** Among enlisted paygrade groups, a lower proportion of the E7-E9 paygrade group than other enlisted paygrade groups used basic skills education (6.2%).
- E1-E3 and E4 Paygrade Groups. A higher proportion of the E1-E3 and E4 paygrade groups used basic skills education (15.4% and 13.7%, respectively) than did other paygrade groups.
- **O4-O6 Paygrade Group.** A smaller proportion of the O4-O6 paygrade group than members of other paygrade groups used adult continuing education (11.2%), tuition assistance programs (7.2%), technical or vocational programs (0.9%, though this estimate may be unstable), and basic skills education (1.1%).

Table 7.19 shows the use of education programs by family type.

- Unmarried Members, with Children. Proportionately more unmarried members with children used tuition assistance programs for college or higher education than did unmarried members without children (29.9% vs. 23.9%).
- Members with Civilian Spouses and Unmarried Members, with Children. A higher proportion of members with civilian spouses and with children, and unmarried members with children (30.9% and 36.3%, respectively) said they used adult continuing education programs than did their counterparts without children (27.8% and 25.8%, respectively).

Table 7.20 presents differences in member use of education programs by spouse employment status. As shown, differences included:

- **Members with Spouses in the Armed Forces.** A higher proportion of members with spouses in the Armed Forces used tuition assistance programs for higher education (35.9%) than did members with spouses in other spouse employment status groups.
- Members with Spouses Voluntarily Out of Work Force. Proportionately fewer members with spouses voluntarily out of the work force used adult continuing education (27.3%), technical or vocational programs (4.4%), or basic skills education (7.0%) than did members with spouses in all other employment status groups.

Member Use of Childcare Arrangements

Question 62 assessed use of childcare arrangements by asking members to indicate which of a range of options they had used in the previous year. Members could also indicate that these arrangements were "not applicable."

During the <u>past 12 months</u>, have you <u>routinely</u> used any of the following childcare arrangements? (MARK ALL THAT APPLY.)

- Not applicable. I have not used any of the following childcare arrangements
- Child's other parent or stepparent
- Child's brother or sister (aged 15 or older)
- Child's brother or sister (under the age of 15)
- Child's grandparent
- Other relative
- Friend or neighbor
- Sitter, nanny, or au pair
- Preschool (on base)
- Preschool (off base)
- "Child Development Center" (on base)
- "Childcare center/day care center (off base)
- "Family Childcare Home" (on base)
- Childcare provider in a home setting (off base)
- "School-Age Care Program" (on base)
- After-school program (off base)
- Federally supported Head Start program
- None of the above

For purposes of this report, responses were assessed for those members who indicated they used the following childcare arrangements: friend or neighbor; sitter, nanny, or au pair; preschool (on base); preschool (off base); child development center (on base); childcare center/day care center (off base); family childcare home (on base); and school-age care program (on base).

Overall, a higher proportion of members said they used a friend or neighbor (31.6%) than said they used any of the other seven arrangements assessed in this report. A higher proportion of members said they used an on base child development center (12.1%) than said they used the other three on base programs including preschool, family childcare home, and school-age care program. Overall, a higher proportion of service members said they used an off base preschool (7.8%) than said they used an on base preschool (3.9%). Conversely, a higher proportion of service members said they used an on base child development center (12.1%) than said they used an off base childcare center/day care center (9.2%) (Table 7.21).

Table 7.21 shows the percentage of members by Service who said they routinely used the eight childcare arrangements. Notable differences include:

- Army. More Army members used off base preschools and on base child development centers (6.6% and 12.3%, respectively) than used on base preschools and off base childcare center (4.4% and 10.3%, respectively).
- Navy. More Navy members used off base preschools than used on base preschools (8.4% vs. 2.9%).
- Marine Corps. More Marine Corps members used off base preschools and on base child development centers (7.8% and 12.6%, respectively) than used on base preschools and off base childcare centers/day care centers (4.5% and 8.7%, respectively).
- Air Force. Proportionately more Air Force members than other DoD Services' members said they used a sitter, nanny, or au pair (16.3%). More Air Force members used off base preschools and on base child development centers (8.4% and 14.3%, respectively) than used on base preschools and off base childcare centers/day care centers (4.2% and 8.1%, respectively).
- Coast Guard. Proportionately more Coast Guard members than other Services' members said they used off base preschools (13.7%). Proportionately fewer Coast Guard members said they used on base child development centers (5.0%, although this estimate may be unstable) than did members of other Services.
- Army and Air Force. Among DoD Services, a higher proportion of Army and Air Force members said they used school-age care programs (3.8% and 4.8%, respectively) than did those of other Services.

• Navy and Marine Corps. Proportionately fewer Navy and Marine Corps members said they used on base school-age care programs (2.4% and 2.2%, respectively) than did other DoD Services' members.

Table 7.21.

Table 7.22 compares the use of childcare arrangements by paygrade. Findings included:

- **E4 Paygrade Group.** Proportionately more members in the E4 paygrade group used on base child development centers (17.3%) than used off base childcare centers/day care centers (7.8%).
- **E5-E6 Paygrade Group.** Proportionately more members in the E5-E6 paygrade group used off base preschools and on base child development centers (8.2% and 13.4%, respectively) than used on base preschools and off base childcarc centers/day care centers (4.7% and 10.5%, respectively).
- **E7-E9 Paygrade Group.** A smaller proportion of the E7-E9 paygrade group (6.1%) than other paygrade groups used on base child development centers. Among enlisted members, a lower proportion of the E7-E9 paygrade group than other paygrade groups used on base family childcare homes (2.4%). More E7-E9 paygrade group used off base preschools (5.7%) than used on base preschools (2.3%).

- O1-O3 Paygrade Group. A larger proportion of the O1-O3 paygrade group than other paygrade groups said they used a friend or neighbor (43.1%) as a childcare arrangement. Among officers, proportionately more members in the O1-O3 paygrade group then O4-O6 paygrade group used on base preschools (5.4% vs. 3.5%) and on base family childcare homes (3.9% vs. 1.6%). More members in the O1-O3 paygrade group used off base preschools and on base child development centers (16.7% and 17.3%, respectively) than used on base preschools and off base childcare centers/day care centers (5.4% and 11.6%, respectively).
- **O4-O6 Paygrade Group.** More members in the O4-O6 paygrade group used off base preschools than used on base preschools (13.2% vs. 3.5%).
- E4 and O1-O3 Paygrade Groups. A larger proportion of members in paygrade groups E4 and O1-O3 (17.3% and 17.3%, respectively) used on base child development centers than did members of other paygrade groups.
- O1-O3 and O4-O6 Paygrade Groups. Proportionately more members in the O1-O3 and O4-O6 paygrade group than other paygrade groups used sitters, nannies or au pairs (26.8% and 24.0%, respectively) and off base preschools (16.7% and 13.2%, respectively).

Table 7.23 presents differences between male and female members' routine usc of eight childcare arrangements. Differences of note include:

- Male. More male members used off base preschools and on base child development centers (7.9% and 10.6%, respectively) than used on base preschools and off base childcare centers/day care centers (3.9% and 8.5%, respectively).
- **Female.** Proportionately more females than males used the following childcare arrangements: friends or neighbors (38.1% vs. 30.8%), sitters, nannies, or au pairs (18.8% vs. 13.3%), on base child development centers (23.7% vs. 10.6%), off base childcare centers/day care centers (14.8% vs. 8.5%), on base family childcare homes (11.2% vs. 3.5%), and on base school-age care programs (9.3% vs. 2.8%). More female members used off base preschools and on base child development centers (7.4% and 23.7%) than used on base preschools and off base childcare centers/day care centers (4.3% and 14.8%, respectively).

Table 7.23. Childcare Arrangements Used During The Last 12 Months, By Gender

	Male	Female
Friend or neighbor	30.8	38.1
	(29.8, 31.7)	(35.1, 41.1)
Sitter, nanny, or au pair	13.3	18.8
	(12.6, 14.0)	(16.7, 21.1)
Preschool (on base)	3.9	4.3
	(3.5, 4.3)	(3.2, 5.7)
Preschool (off base)	7.9	7.4
	(7.4, 8.4)	(6.1, 8.9)
"Child Development Center" (on base)	10.6	23.7
	(9.9, 11.2)	(21.0, 26.5)
Childeare center/day care center (off base)	8.5	14.8
	(7.9, 9.1)	(12.9, 16.8)
"Family Childcare Home" (on base)	3.5	11.2
	(3.2, 3.9)	(9.3, 13.5)
"School-Age Care Program" (on base)	2.8	9.3
	(2.5, 3.1)	(7.9, 11.0)

As shown on Table 7.24, a comparison of the use of eight childcare arrangements revealed only one difference between racial/ethnic groups. Proportionately more African-Americans than other racial/ethnic groups used on base school-age care programs (6.5%). Differences were noted within the White racial/ethnic group and within the African American racial/ethnic group. More White service members used off base preschools and on base child development centers (8.9% and 10.9%, respectively) than used on base preschools and off base childcare centers/day care centers (3.7% and 9.1%, respectively). More African American members used on base child development centers than used off base childcare centers/day care centers (16.4% vs. 10.6%).

Table 7.25 compares members' use of childcare arrangements by family type. Differences of note include:

• Members with Active Duty Spouses, with Children. A higher proportion of members with active-duty spouses with children used on base child development centers (25.1%) and family childcare homes (14.3%) than did other members with children. More members with active-duty spouses with children used on base child development centers than used off base childcare centers/day care centers (25.1% vs. 15.9%).

- Members with Spouses Employed in Civilian Jobs, with Children. More members with civilian spouses and with children used on base child development centers than used off base childcare centers/day care centers (10.8% vs.8.8%).
- Unmarried Members, with Children. Proportionately fewer unmarried members with children used friends or neighbors (26.4%) and sitters, nannies, or au pairs (10.8%) than did members with other family types. More unmarried members with children used on base child development centers than used off base childcare centers/day care centers (12.4% vs. 7.7%).
- Members with Civilian Spouses and Unmarried Members, with Children. Proportionately fewer members with civilian spouses with children and unmarried members with children (8.8% and 7.7%, respectively) than members with other family types used off base childcare centers/day care centers.

Table 7.26 compares members' use of childcare arrangements by spouse employment status. Notable differences include:

- Members with Spouses Employed in Paying Civilian Jobs. More members with spouses in civilian jobs used off base preschools than used on base preschools (8.5% vs. 3.5%).
- Members with Spouses in the Armed Forces. Proportionately more members with spouses employed in the Armed Forces said they used sitters, nannies, or au pairs (21.2%), on base child development centers (23.5%), on base family childcare home programs (12.9%), and school-age care programs (6.7%) than did members in other spouse employment status groups. More members with spouses in the Armed Forces used on base child development centers than used off base childcare centers/day care centers (23.5% vs. 15.4%).
- **Members with Unemployed Spouses.** More members with unemployed spouses used on base child development centers than used off base childcare centers/day care centers (11.4% vs. 6.3%).
- Members with Spouses Voluntarily Out of the Work force. A smaller proportion of members with spouses who were voluntarily out of the work force (1.1%) used the school-age care programs than did members in other spouse employment statuses. A more members with spouses voluntarily out of the work force used off base preschools and on base child development centers (8.2% and 8.9%, respectively) than used on base preschools and off base childcare centers/day care centers (4.4% and 4.2%, respectively).
- Members with Spouses Employed in Paying Civilian Jobs and Members with Spouses in the Armed Forces. Proportionately more members with spouses in civilian jobs and spouses in the Armed Forces used off base childcare centers/day care centers (12.1% and 15.4%, respectively) than did members in other spouse employment status groups.

-

²⁴ This comparison was made using an estimate for members with spouses voluntarily out of the work force that may be unstable. Estimates may be unstable because of a small sample size for that cell (cell sample size is 30 to 59) or large variance in the data weights (cell estimate has a relative standard error greater than 30%).

Table 7.26.

Member Attitudes about Health Care for Their Families

Question 77 asked members about their attitudes toward specific aspects of military health care for their families. Members were first given an option to respond "Does not apply. I do not have any family members eligible to receive military health care."

How satisfied or dissatisfied are you with each of the following aspects of military health care for your family?

- A. My out-of-pocket cost for care
- B. Skill of physicians and other medical providers
- C. Availability of specialists
- D. Ability to get appointments
- E. Waiting time in the clinic
- F. Overall quality of care
- G. Administrative requirements (claims, paperwork, approvals, etc.)

Members responded using a five point scale: very satisfied, satisfied, neither satisfied nor dissatisfied, dissatisfied, and very dissatisfied. For the purposes of this report, the five categories were collapsed into three categories: very satisfied/satisfied, neither satisfied nor dissatisfied, and dissatisfied/very dissatisfied. Respondents who had no family members eligible to receive medical health care were considered not applicable and excluded from these analyses. Complete tables supporting the analysis reported here appear in Appendix G of this report and in Gaines et al. (2000b).

Overall, a higher proportion of members responded that they were *very satisfied/satisfied* with their out-of-pocket costs for care (48.1%) than indicated satisfaction with the other six aspects of family health care (Table 7.27). Proportionately fewer members said they were *very satisfied/satisfied* with the availability of specialists (30.4%), the waiting time in the clinic (32.4%), and the administrative requirements (30.8%) than said they were *very satisfied/satisfied* with the other aspects of military family health care.

Table 7.27 shows member satisfaction with aspects of military health care for their families by Service. Findings include:

- Navy. Among DoD Services, proportionately more Navy members indicated they were *very satisfied/satisfied* with the availability of specialists (36.2%) and the overall quality of care (48.3%) than did those of other Services.
- Navy and Coast Guard. Regarding the skill of physicians and other medical providers, larger proportions of Navy and Coast Guard members (50.8% and 50.6%, respectively) said they were *very satisfied/satisfied* than did members of other Services.

Table 7.27.

Members Who Indicated That They Were Satisfied With Components Of Military Health Care, By Service

f.	Overall quality of care	43.3	43.3	41.4	48.3	42.6	41.5	44.7
		(42.4, 44.2)	(42.4, 44.2)	(39.9, 42.9)	(46.3, 50.2)	(39.7, 45.5)	(39.9, 43.0)	(41.3, 48.1)
g.	Administrative	30.8	30.9	30.8	34.5	30.8	27.9	27.9
J	requirements (claims, paperwork, approvals, etc.)	(30.0, 31.7)	(30.0, 31.8)	(29.5, 32.1)	(32.4, 36.5)	(28.1, 33.6)	(26.4, 29.4)	(25.1, 31.0)

Table 7.28 compares member satisfaction with family health care by paygrade group.

- W1-W5 Paygrade Group. Smaller proportions of the W1-W5 paygrade group than all other paygrade groups indicated they were *very satisfied/satisfied* with availability of specialists (22.3%), waiting time in the clinic (24.2%), and overall quality of eare (34.2%).
- **O4-O6 Paygrade Group.** Among officers, a larger proportion of the O4-O6 than O1-O3 paygrade groups indicated they were *very satisfied/satisfied* with the skill of physicians (51.6% vs. 49.7%). A lower proportion of the O4-O6 paygrade group than the O1-O3 paygrade group said they were *very satisfied/satisfied* with out-of-pocket cost for eare (41.9% vs. 54.3%) and administrative requirements (25.2% vs. 30.3%).
- E1-E3, E4, and O1-O3 Paygrade Group. Higher proportions of paygrade groups E1-E3, E4, and O1-O3 indicated they were *very satisfied/satisfied* with their out-of-pocket costs for care (58.5%, 57.0%, and 54.3%, respectively) than did other paygrade groups.
- W1-W5 and O4-O6 Paygrade Group. Proportionately fewer members in the W1-W5 and O4-O6 paygrade groups were *very satisfied/satisfied* with the ability to get appointments (27.9% and 31.2%, respectively) than were other paygrade groups.

Summary

Chapter 7 describes members' responses concerning the availability of, use of, and satisfaction with quality of life programs. Comparisons were made for use of quality of life programs (on base and off base), use of education programs, use of childcare arrangements (on base and off base), and attitudes about health care. Overall, service members responded that on base quality of life services, programs, and facilities were generally available (85% or more). The programs were generally more available for members in the DoD Services than for the Coast Guard.

Although there were differences between paygrade groups, genders, and spouse employment statuses in the availability of 13 on base quality of life programs, none of the differences was more than 5%. Among the racial/ethnic groups, no differences were found in the availability of the on base quality of life services, programs, and facilities.

Overall, comparisons of members' use of on base programs revealed that members indicated a higher average monthly use of fitness centers (9.4 times), main exchanges (7.3 times), and commissaries (6.6 times) than of other quality of life programs and services. There were several other notable differences in the average monthly use of the quality of life programs:

- Among the Services, Coast Guard members used four of the quality of life programs fewer average times per month than did members of other Services, including fitness centers (7.5 times) and main exchanges (5.9 times). This finding was not unexpected because of the lower reported availability of these facilities by Coast Guard members.
- Among paygrades, the lower enlisted paygrade groups had higher levels of average monthly use than did other paygrade groups for six of the quality of life programs, including fitness centers, recreation centers, bowling centers, clubs, commissaries, and main exchanges.
- Males used four of the programs more average times per month than did females (outdoor recreation equipment rental (1.1 times vs. 0.8 times), recreation centers (2.3 times vs. 1.6 times), golf course (1.3 times vs. 0.6 times), and auto shops (1.8 times vs. 1.2 times)).
- White members used library services and recreation centers fewer average times per month than did members in other racial/ethnic groups.

There were no patterns in the differences in average monthly use of quality of life programs observed when family types or spouse employment statuses were compared.

Overall, members responded that the four off base quality of life services, programs, and facilities evaluated (library services, clubs/dance/nightclubs, commissaries/supermarkets/grocery stores, and main exchanges/departments stores) were generally available. That is, more than 92.0% of members indicated these programs and facilities were available. Members indicated a higher average monthly use of off base department stores (7.0 times per month) and off base supermarkets/grocery stores (5.9 times per month) than for library services or clubs. Gender, race/ethnicity, and spouse employment status were not found to be associated with differences in availability of off base programs. There was a very small difference (less than 3 %) among some paygrade groups and family types in the reported availability of off base library services.

.

²⁵ These 13 services, programs, and facilities were: fitness center/gym; library services; outdoor recreation areas; outdoor recreation equipment rental; recreation centers; golf courses; bowling centers; recreation lodging/hotel or resorts; clubs/dance/nightclubs; commissaries/supermarkets/grocery stores; main exchanges/department stores; social activities for service members; auto, crafts, and hobby shops.

One notable difference among the Services in average monthly use of the four off base programs was the higher average use by Coast Guard members of off base supermarkets and grocery stores (8.2 times per month) than by other Services' members. This finding may be explained, at least in part, by lack of access to on base facilities. When use of off base quality of life programs, facilities, and services were compared across the paygrades, there were several differences. Notable among these was the use of off base clubs. As paygrade groups increased in rank among enlisted and officer paygrade groups, average monthly use of clubs decreased; this was not unexpected given the increased age and proportion of married members in the more senior paygrades. Gender and race/ethnicity were not found to be associated with off base program use. Among family types, except for members with spouses in the Reserve Components, members without children used off base clubs more than did members with children. Among spouse employment statuses, members with spouses voluntarily out of the work force used the off base clubs less (2.0 times per month) than did members in other spouse employment statuses.

A comparison of members' use of education programs revealed that overall, more members replied that they had not used each of the four education programs than had used the programs. There were several notable differences among paygrade groups, genders, and spouse employment statuses concerning members' use of education programs:

- Among paygrade groups, fewer members in paygrade O4-O6 said they used the four programs than did members in other paygrade groups.
- More females than males said they used continuing education (37.2% vs. 28.3%), tuition assistance programs (35.7% vs. 23.7%), and basic skills education (12.6% vs. 9.8%).
- A smaller proportion of members with spouses who were voluntarily out of the work force than members with spouses in other employment status groups used three of the four programs (adult continuing education (27.3%), technical or vocational programs (4.4%), or basic skills education (7.0%)). There were few differences among Services, racial/ethnic groups, or family types for members' use of the four education programs.

A comparison of members' use of eight childcare arrangements (friend or neighbor; sitter, nanny, au pair; on base preschool; off base preschool; on base child development center; off base childcare center/daycare center; on base family childcare home; and on base school-age care program revealed that overall, more members used friends or neighbors for childcare arrangements (31.6%) than used other childcare arrangements. More members used off base preschools and on base child development centers (7.8% and 12.1%, respectively) than used on base preschools and off base childcare centers/daycare centers (3.9% and 9.2%, respectively). There were several notable patterns of differences among gender, family type, and spouse employment status for use of childcare arrangements. More females than males and more members with spouses in the Armed Forces than members with spouses in other employment status groups used sitters, nannies, or au pairs, on base child development centers, on base family childcare home programs, and on base school-age care programs. Among family types, more

members with active-duty spouses with children used on base child development centers, and on base family childcare homes than did other members with children.

The assessment of members' attitudes about military health care for their families revealed several notable findings. Overall, more members indicated they were satisfied with their out-of-pocket costs for care (48.1%) than indicated satisfaction with other aspects of military family health care. Among the Services, a larger proportion of Navy members than those of other Services responded that they were satisfied with three aspects of military health care for their families (out-of-pocket cost for care, skill of physician and other medical providers, and overall quality of care). A larger proportion of females than males were satisfied with each of the seven aspects of military health care for their families. As reported, race/ethnicity, family type (with one exception), and spouse employment status (with two exceptions) were not found to be associated with differences in satisfaction with military family health care.

PRIVACY NOTICE

In accordance with the Privacy Act of 1974 (Public Law 93-579), this notice informs you of the purpose of the survey and how the findings will be used. Please read it carefully.

AUTHORITY: 10 U.S.C. 136, 10 U.S.C. 1782 and 10 U.S.C. 2358

PRINCIPAL PURPOSE: Information collected in this survey will be used to assess attitudes and perceptions of military life. This information will assist in the formulation of policies which may be needed to improve the military working environment and relevant personnel policies.

ROUTINE USES: Reports will be provided to the Secretaries of Defense and Transportation, and each Military Service. Findings will be used in reports and provided to Congress. Some findings may be published by the Defense Manpower Data Center (DMDC) or professional journals, or reported in manuscripts presented at conferences, symposia, and scientific meetings. In no case will the data be reported or used for identifiable individual(s).

DISCLOSURE: Providing information on this survey is voluntary. There is no penalty if you choose not to respond. However, maximum participation is encouraged so that the data will be complete and representative. Your survey instrument will be treated as confidential. Identifying information will be used only by persons engaged in, and for the purposes of, the survey. Only group statistics will be reported.

THIS IS NOT A TEST. SO TAKE YOUR TIME.

SELECT ANSWERS THAT BEST FIT YOU.

MARK ONLY ONE ANSWER FOR EACH QUESTION UNLESS THE QUESTION SAYS TO MARK ALL THAT APPLY.

- MAKE HEAVY BLACK MARKS THAT FILL THE RESPONSE CIRCLES.
- DO NOT MAKE ANY MARKS OUTSIDE OF THE RESPONSE CIRCLES OR WRITE-IN BOXES.
- IF YOU CHANGE YOUR MIND, ERASE OLD MARKS COMPLETELY.
- DO NOT USE INK, BALL-POINT, OR FELT TIP PENS.

(Include all credit cards, debt consolidation loans, AAFES loans, NEXCOM loans, student loans, and other personal loans; exclude home mortgage and car loans.) \$0	
	Do you (or your spouse) pay child support? Yes, I pay child support Yes, my spouse pays child support No What is the total amount you (and your spouse) paid last month for rent or mortgage? \$0 \$1-400 \$401-800 \$801-1,200 \$1,201-1,600 \$1,601-2,000 \$2,001 and above		\$1-1,000 \$1,001-2,500 \$2,501-5,000 \$5,001-7,500 \$7,501-10,000 \$10,001-12,500 \$112,501-15,000 \$15,001-17,500 \$117,501-20,000 \$20,001 and above Which of the following best describes the financial condition of you (and your spouse)? Very comfortable and secure Able to make ends meet without much difficulty Occasionally have some difficulty making ends meet Tough to make ends meet but keeping your head above water In over your head	

96.	In the <u>past 12 months</u> , did any of the following happen to you (and your spouse)? (MARK ALL THAT APPLY.)	98.	Which, if any, of the following is your <u>main</u> concern about the military retirement system?				
	 Bounced two or more checks Received a letter of indebtedness (e.g., a letter from a lender to your commanding officer that payment is late) Had your wages garnished Fell behind in paying your rent or mortgage Fell behind in paying your credit card, AAFES, or NEXCOM account Was pressured to pay bills by stores, creditors, or bill collectors Had a bill collector contact your unit leader Pawned or sold valuables to make ends meet Borrowed money from friends or relatives to help you with a financial difficulty Borrowed money through an Emergency Loan Assistance Program or a Service Aid Society Had your utilities (telephone, cable, water, heat or electricity) shut off Had a car, household appliances, or furniture repossessed Was unable to afford needed medical care Went bankrupt (declared personal bankruptcy) None of the above 		 Does not apply, I have no concerns No pension benefits are earned unless you serve a least 20 years No ability to save toward retirement with a 401(k) of other retirement savings program The government does not match any money you provided away for retirement You cannot transfer your retirement benefits to another employer Other 				
		99.	Currently, military personnel do not qualify for retirement benefits unless they serve for at least 2 years. If the system were changed so that you became eligible after at least 10 years of service f a deferred pension payable at age 62, how much influence would this have on your willingness to stay in the military until at least the 10-year point? O Does not apply, I have already served 10 years O Does not apply, I already intend to stay				
			◯ Little or no influence◯ Some influence◯ Moderate influence◯ Strong influence				
	Thrift Savings Plan (TSP) is a <u>tax-deferred</u> retirement avings plan like a 401(k) plan. Employees may deposit a portion of their pay (typically up to 5 or 10 percent) before taxes into a long-term fund to provide savings for retirement. Employers may match none, some, or all of their employees' contributions.	100.	O. Congress is considering a proposal to modify the retirement pay formula for those who entered the service on or after August 1, 1986 to the same formula that applied to those who entered before that date. Assuming the retirement pay formula were changed, how much influence would this have on your willingness to stay in the military?				
•	A wide range of investment options is generally available, including funds that follow the stock and bond markets. TSP funds may be taken to another employer or rolled over into other qualified retirement savings plans. Funds may begin to be withdrawn at around age 59½—earlier withdrawals are usually penalized.		 This would not affect me since I entered the service before August 1, 1986 Does not apply, I already intend to stay Little or no influence Some influence Moderate influence 				
97.	If this type of plan were made available to you, how likely would you be to participate in each of the following situations?		○ Strong influence				
			BACKGROUND INFORMATION				
	Very unlikely Unlikely Neither likely nor unlikely Likely Very likely		Are you: Male Female Is English a second language for you?				
	a. If there were no government matching		○ Yes ○ No				
	b. If the government matched your contribution up to 5% of pay						
	c. If you could invest any reenlistment or continuation bonus into the fund tax-deferred

Technical Information

Technical Information

Survey Instrument

The 1999 Survey of Active Duty Personnel was designed to provide timely, policy-sensitive information on the military life cycle. The survey was constructed around a core of questions from previous surveys of Active and Reserve members, particularly the 1992 Active Duty Surveys. The questionnaire for the 1999 Survey of Active Duty Personnel focused on attitudes, experiences, and demographic experiences of military members.

The survey's items can be grouped broadly into seven categories: Assignment Information; Career Information; Military Life; Programs and Services; Family Information; Economic Issues; and Background Information. Appendix A contains a copy of the 20-page, 112-item survey instrument (Form A). Survey items were adopted, adapted, or generated from one or more of the following sources:

- The 1985 and 1992 Surveys of Officer and Enlisted Personnel and Spouses;
- Concerns identified by DoD policy officials and personnel from the Office of the Deputy Assistant Secretary of Defense for Military Community and Family Policy [ODASD(MCFP)]; and
- Focus groups conducted with military members similar to those in the sample.

Because focus group research played such a significant role in the development of the ADS instrument, it warrants further discussion. The large number of new and modified items in the ADS required developing and pretesting iterative versions of the questionnaire. Focus groups were conducted with Army, Navy, Air Force and Marine Corps officers, enlisted members, and spouses. Approximately 120 service members participated in 14 focus groups that were conducted at eight installations located throughout the United States. To ensure the applicability of the items for the population of inferential interest, versions of the survey were pretested on members from all four DoD Services. The layout of the surveys used in the pretests closely approximated that found in the final instrument.

In the 1- to 2-hour focus group sessions, participants were asked to imagine that they had received the survey in the mail and to complete it accordingly. Also, participants were instructed to write notes on the survey where they had concerns about items, alternatives, or instructions so that these issues could be discussed after the survey was completed. Participants typically took between 35 and 50 minutes to complete the survey. After everyone had completed the survey, the focus group facilitator reviewed the instrument section by section, asking for specific comments on each section. Facilitators probed to see if all respondents were interpreting the instructions, items, and contexts similarly for specific sections of the survey. The facilitator then asked focus group participants to give general comments about the survey (e.g., survey length and whether respondents would feel free to answer the questions honestly). Facilitators gathered questionnaires at the end of the session to preserve the notes that participants had written.

A DMDC researcher debriefed the facilitators to identify problems and recommendations for revisions. The concerns were incorporated into the next version of the survey. In subsequent focus groups, facilitators probed to determine whether the implemented changes had corrected the problems or whether additional modifications were warranted.

A 20-page survey booklet was printed for the ADS. The final version of the survey instrument was printed by National Computer Systems (NCS) on a machine-readable optical-scan form. The survey instrument has a unique lithographed (litho) code number printed on each sheet.

Sample

The 1999 ADS member sample was drawn from a stratified frame. The samc framc was used for both Form A (the member survey) and Form B (the spouse survey, documented elsewhere). Information for sample frame construction and for variables identifying key domains came from the Defense Manpower Data Center's (DMDC's) May 1999 Active Duty Master File (ADMF) and the May 1999 Reserve Components Common Personnel Data System (RCCPDS). The population of interest for Form A consisted of all active-strength members of the Army, Navy, Marine Corps, Air Force, and Coast Guard (including Reservists on active duty) holding a rank below admiral or general. In addition, eligible members had completed at least 6 months of active-duty service. Members of the National Guard and Reserves in active-duty assignments (e.g., Active Guard and Reserve (AGR) and Navy Training and Administration of Reserve (TAR) for at least 6 months were also eligible for selection. Five variables defined the member sample strata:

- Service: Army, Navy, Marine Corps, Air Force, and Coast Guard;
- Marital Status: married to a civilian spouse or a military spouse who is not eligible for Form A, married to a spouse who is also on active duty (including AGRs) and unmarried;
- **Paygrade:** E1-E3, E4, E5-E6, E7-E9, W1-W5, O1-O3, and O4-O6;
- Gender: male and female; and
- Location: CONUS (within contiguous United States), and OCONUS (outside contiguous United States, including Alaska, Hawaii, Guam, United States Territories and all foreign countries).

The total sample size was defined by precision constraints imposed on prevalence rate estimates in key reporting domains, defined by combinations of demographic characteristics. These domains include subgroups based on Service, paygrade, occupation, gender, and other factors. The sampling frame for Form A consisted of 1,419,269 members in 348 strata.

Respondents

DMDC's May 1999 Active Duty Master File (ADMF) provided information for developing the sampling frame, constructing strata, and determining the sample size and allocation. The previously specified definition of the population resulted in a sampling frame with 1,419,269 eligible members. A non-proportional stratified, single stage random sample of 66,040 members was selected to receive the ADS. Table B.1 presents a summary of the sample allocation by Service.

Table B.1.
1999 Active Duty Sample Allocation

Note. Counts for unknown are not included.

Cell sizes were too sparse in some cases for the fully crossed stratification. For this reason, gender and location were collapsed within some strata for Army, Navy, Marine Corps, and Coast Guard. Some O1-O3 paygrade groups were also collapsed within Navy, Air Force, and Coast Guard. Final sampling strata definitions can be found in Flores-Cervantes and Valliant (in preparation).

The initial sample consisted of 66,040 members, of which 60,834 (92%) were determined to be eligible. A total of 33,189 usable surveys were returned by eligible respondents by the end of data collection. Another 2,911 individuals were determined to be ineligible because they were ineligible in DEERS after the sample frame was constructed; the member reported in Q107 that they were not on active duty; or the member reported being permanently ill, not in the military, or ineligible for some other reason. After making adjustments in accordance with industry standards (Council of American Survey Research Organization (CASRO), 1982) for eligibility and differential sampling rates across the various subgroups, the observed response rate was 56.2% and the weighted response rate was 50.7%.

Data were weighted to reflect the population of interest in a three-step process. The first step calculated base weights to compensate for variable probabilities of selection. The second step adjusted the base weights for nonresponse. Nonresponse may have been due to both inability to determine the eligibility status of the sampled member or to the sampled member failing to return a survey. The final step poststratified the nonresponse-adjusted weights to force estimates to known population totals. Summing across all 36,100 individuals for whom response status and eligibility were determined, the final weights summed to 1,403,423—the number of service members on active duty (including Reservists) below the O-7 paygrade in September 1999. Summing the final weights across the 33,189 eligible respondents gives a weighted estimate that 1,303,750 of these members had been on active duty at least 6 months and were thus eligible for the survey. Table B.2 presents the demographic characteristics of the respondents. Table B.3 shows final weighted estimates that have been poststratified to the population of the same demographic characteristics.

Confidence Intervals for Percentages

The default method of constructing a confidence interval (CI) for a percentage uses a symmetric interval of the form $p \pm t_{1-\alpha/2}(df)\sqrt{v(p)}$ where p is the estimated percentage, v(p) is its estimated variance, and $t_{1-\alpha/2}(df)$ is a multiplier from the t-distribution with df degrees of freedom. A defect of this method is that for extreme percentages the upper or lower confidence bounds can go beyond the acceptable range of [0,100]. In such situations, the Wilson score method (Newcombe 1998, Wilson 1927) can be used to calculate CI's which will always remain within [0,100]. Unlike the t-approximation intervals, the Wilson intervals will not be symmetric around the point estimate of the percentage.

Let y_i be a dichotomous variable with possible outcomes 1 and 0, denoting whether unit i has a characteristic or not. Let s denote the set of sample units used in the estimate. Then, the estimated proportion of units with the characteristic is

$$p = \frac{\sum_{i \in s} w_i y_i}{\sum_{i \in s} w_i}.$$

The estimated proportion of units that do not have the characteristic is q = 1 - p. The effective sample size is defined to be

$$n_{EFF} = n/DEFF$$

where n is the unweighted count of sample cases used for the denominator of p, and DEFF is the design effect, which is equal to the variance of the estimate accounting for the complex design divided by the variance that would be obtained from a simple random sample of the same size.

The Wilson method assumes that the distribution of $T = (p-P)/\sqrt{DEFF*P(1-P)}$ is approximately t where P is the population proportion. Let $t_{1-\alpha/2}(df)$ denote the $1-\alpha/2$ critical point from the t distribution with df degrees of freedom. The inequality $-t_{1-\alpha/2}(df) \le T \le t_{1-\alpha/2}(df)$ is then rearranged to obtain an interval for P. The confidence limits based on the Wilson score method are then calculated as

Lower limit:
$$\frac{\left[\left(2n_{EFF}p+t^2\right)-\left(t\sqrt{\left(t^2+4n_{EFF}pq\right)}\right)\right]}{2\left(n_{EFF}+t^2\right)}$$

Upper limit:
$$\frac{\left[\left(2n_{EFF}\,p+t^2\right)+\left(t\sqrt{\left(t^2+4n_{EFF}\,pq\right)}\right)\right]}{2\left(n_{EFF}+t^2\right)}.$$

where $t \equiv t_{1-\alpha/2}(df)$. In the ADS Member data set, the degrees of freedom are large and a multiplier from the normal distribution (like 1.96 for $\alpha = 0.05$) can be used. For percentages, these endpoints are multiplied by 100.

Testing Statistical Differences In Estimates From Two Independent Surveys

When comparing 1992 estimates to 1999 estimates the following test was used.

Where:

 \hat{y}_1 the estimate of Y obtained form survey 1 (e.g., proportion, total, etc.) $se(\hat{y}_1)$ the standard error of the estimate \hat{y}_1 and

 \hat{y}_2 the estimate of Y obtained form survey 2 $se(\hat{y}_2)$ the standard error of the estimate \hat{y}_2 .

the difference d is defined as:

$$d = \hat{y}_1 - \hat{y}_2$$
 and

the standard error of d is defined as:

$$se(d) = \sqrt{(se(\hat{y}_1))^2 + (se(\hat{y}_2))^2}$$
.

To test if there are significant differences between \hat{y}_1 and \hat{y}_2 , (equivalent to testing the hypothesis $H_0: |d| = 0$ (i.e., the absolute value of d is different from 0) Vs $H_1: |d| \neq 0$ at a α level of significance),

the t was computed:

$$t = \frac{|\hat{y}_1 - \hat{y}_2|}{\sqrt{(se(\hat{y}_1))^2 + (se(\hat{y}_1))^2}}.$$

If $t > t_{1-\alpha/2,df}$, H_o is rejected and H_I accepted; that is, there is a significant difference between Y_1 and Y_2 . (Note $t_{1-\alpha/2,df}$ is the value of the t-Student distribution with df degrees of freedom).

INSTRUCTIONS FOR COMPLETING SF 298

- 1. REPORT DATE. Full publication date, including day, month, if available. Must cite at least the year and be Year 2000 compliant, e.g. 30-06-1998; xx-06-1998; xx-xx-1998.
- 2. REPORT TYPE. State the type of report, such as final, technical, interim, memorandum, master's thesis, progress, quarterly, research, special, group study, etc.
- 3. DATES COVERED. Indicate the time during which the work was performed and the report was written, e.g., Jun 1997 Jun 1998; 1-10 Jun 1996; May Nov 1998; Nov 1998.
- **4. TITLE.** Enter title and subtitle with volume number and part number, if applicable. On classified documents, enter the title classification in parentheses.
- **5a. CONTRACT NUMBER.** Enter all contract numbers as they appear in the report, e.g. F33615-86-C-5169.
- **5b. GRANT NUMBER.** Enter all grant numbers as they appear in the report, e.g. AFOSR-82-1234.
- **5c. PROGRAM ELEMENT NUMBER.** Enter all program element numbers as they appear in the report, e.g. 61101A.
- **5d. PROJECT NUMBER.** Enter all project numbers as they appear in the report, e.g. 1F665702D1257; ILIR.
- **5e. TASK NUMBER.** Enter all task numbers as they appear in the report, e.g. 05; RF0330201; T4112.
- **5f. WORK UNIT NUMBER.** Enter all work unit numbers as they appear in the report, e.g. 001; AFAPL30480105.
- 6. AUTHOR(S). Enter name(s) of person(s) responsible for writing the report, performing the research, or credited with the content of the report. The form of entry is the last name, first name, middle initial, and additional qualifiers separated by commas, e.g. Smith, Richard, J, Jr.
- 7. PERFORMING ORGANIZATION NAME(S) AND ADDRESS(ES). Self-explanatory.

8. PERFORMING ORGANIZATION REPORT NUMBER. Enter all unique alphanumeric report numbers assigned by the performing organization, e.g. BRL-1234;

by the performing organization, e.g. BRL-1234; AFWL-TR-85-4017-Vol-21-PT-2.

- 9. SPONSORING/MONITORING AGENCY NAME(S)
 AND ADDRESS(ES). Enter the name and address of the organization(s) financially responsible for and monitoring the work.
- **10. SPONSOR/MONITOR'S ACRONYM(S).** Enter, if available, e.g. BRL, ARDEC, NADC.
- 11. SPONSOR/MONITOR'S REPORT NUMBER(S). Enter report number as assigned by the sponsoring/monitoring agency, if available, e.g. BRL-TR-829; -215.
- 12. DISTRIBUTION/AVAILABILITY STATEMENT. Use agency-mandated availability statements to indicate the public availability or distribution limitations of the report If additional limitations/ restrictions or special markings are indicated, follow agency authorization procedures, e.g. RD/FRD, PROPIN, ITAR, etc. Include copyright information.
- **13. SUPPLEMENTARY NOTES.** Enter information not included elsewhere such as: prepared in cooperation with; translation of; report supersedes; old edition number, etc.
- **14. ABSTRACT.** A brief (approximately 200 words) factual summary of the most significant information.
- **15. SUBJECT TERMS.** Key words or phrases identifying major concepts in the report.
- **16. SECURITY CLASSIFICATION.** Enter security classification in accordance with security classification regulations, e.g. U, C, S, etc. If this form contains classified information, stamp classification level on the top and bottom of this page.
- 17. LIMITATION OF ABSTRACT. This block must be completed to assign a distribution limitation to the abstract. Enter UU (Unclassified Unlimited) or SAR (Same as Report). An entry in this block is necessary if the abstract is to be limited.
